ORB

~Oddity Rule Book~

Heroic, Epic, Fantasy, Adventure

Work in Progress:

Balance and Rules:

- Magic
    - Must have the affinity of the maneuver or spell you wish to use.
    - Characters can change the affinity of a maneuver or spell they wish to use, however its effects may change as well.

Character Creation:

- Ancestries - change to two abilities only
    - Beastfolk
    - Fungin
    - Groveborn
- Backgrounds
    - Higher level backgrounds.
- Class Abilities:
    - Finish listing Abilities for Levels 1-10
    - CHALLENGE LEVEL IMPOSSIBLE

Conditions:

- Different Diseases
- Levels of Madness

Roleplay:

- Renown/Reputation
- Downtime Activities

Familiars:

- Redo familiar list, layout, and what abilities familiars give

Runes:

- verbiage and wording

Towers, Palaces, and Organizations:

- Fortresses that players can build to improve their characters abilities or gain access to new ones.
- Should be a symbol of power and a milestone for the character's growth.
    - maybe limit them so only level 5-6 characters can begin to make them.

How you can be a GM too:

- GM How To Section
- **Progressing the Game State:**
    - Significant Actions
    - Milestone Actions
- Dungeons:
    - Creating
    - Dungeon Turns

Setting and Flavor:

- Setting:

ODDITY Rule Book

Oddity is an adventure role-playing game where you get together with your friends and come up with individual characters who form a party. Besides the party, there is the Game Master that runs the game and develops the overall narrative.

- The GM has the final say over any disputes.
- If a problem comes up at the table that no one knows the solution to, the GM will make a sensible ruling for it. After the game you can review the rule; if there isn't one, you can use whichever rule you came up with OR create a better one.
- The GM presents a story / quest / adventure to the party (literally or narratively). The party can then follow whichever quest or plot thread that interests them the most.
    - Quests are unique, meaning that no two quests, no matter how similar in structure, will give the same reward. There can even be multiple varied rewards & outcomes for the same quest depending on how a party completes it.

Oddity revolves around three main pillars: **Combat**, **Exploration**, and **Role-play.** While these pillars are the foundation, it's up to the group which ones take precedence. The game's setting and tone is set by the GM, but the campaign is heavily influenced by the player's choices.

Combat:

A turn based system designed to facilitate a battle. Many abilities your character gets will support options you can make in combat, which leads to many players thinking it's the only, or best, option. Each combat is an encounter, but not every encounter is a combat.

Some players relish combat, it's the main reason they play the game. Killing monsters and villains can be fun and feel very rewarding. Other players abhor combat, it can be slow and feel repetitive at times.

Like many parts of this game, combat is what you make of it. You can decide to simply roll your dice and continuously hit a target, or you can strategize with your party and use the environment to your advantage.

Exploration:

Finding new locations by venturing into the unknown. Relies on the skills your character has learned over their life and previous adventures they have been on, if any. Can lead to exciting new encounters of both Combat and Roleplay.

Some groups hate Exploration due to how it can slow down the game and cause the characters to get off track of their goal or main story. This can be true depending on how you run the Exploration. The rules provided within the Exploration section will help you keep it fun while also providing a sense of exploring the unknown.

If the overall Exploration doesn't jive with your table, throw the rules out and just narrate the characters going from location to location with the players having a chance to roleplay and describe how their character travels or acts.

Role-play:
Acting as your character within the world of the game. Some take to this like a fish to water, effortlessly entering into their characters mindset and having fun interacting with the world through that lens. Other players may find this part embarrassing, boring, or hard to grasp. It's important to allow for roleplay moments between characters, but never force them to do so. Roleplay can lead to new moments or discoveries, enhancing the adventure and players' feeling of verisimilitude. Characters and NPCs can allow the players to act in a different way than they normally would in real life.

Character Development:
All three of the fundamental pillars are designed to help your character grow and develop. Oddity was born from a premise that each character's story is unique, and therefore each character's path to power will be different. Abilities are gained through hardships and struggles, as treasures are obtained through quests and trials. How a character acts and presents themselves to the world will determine how their power manifests and grows.

- Rewards should be based on how the character presents themselves to the world and how other players/NPCs view them.
- What quest the party takes, and how they complete it, should dictate the types of abilities they gain.

How To Play:

Playing a game, adventure, or campaign of Oddity is quite easy. All it requires is a willing soul and an open mind to have all the endless adventure you could desire.

Getting a Group:
Gather around a table, preferably within a basement, with some friends of yours that also share some level of interest in playing. One of you will become the Game Master (GM) to run the game and the rest will be the players who get to make characters and explore the world. The GM can be seen as a curse to some, but others enjoy being able to create a world for their friends to explore, and puppetting the NPCs and Villains they must face.

A large part of the game is working together as a whole, players and GM included, to create a story and characters that sounds fun to everyone. It's important that boundaries are respected and everyone has a good time playing at the table. If you are uncomfortable with something in game, or someone at the table, talk to the GM about it to see what changes might be made to help you. Know what group is right for you.

Creating Characters:

Now that you've gotten your group together, after months of rescheduling, it's time to make some characters. These will be your avatars to explore and interact with the world through. You'll want to create a backstory for your character to feel more ingrained in the world. It can be simple, or somewhat complex, but it's always important to share your backstory with the GM to make sure it fits within their world and setting. Your character should have some driving goal that they are set on, and that goal may change or shift over the course of the campaign. It's fun to get caught up in the world with your character feeling real, a bit of verisimilitude goes a long way when playing them.
There is a guide to help players make their characters within the "Creating a Character" section.

Beginning the Adventure:
Once the characters are made the adventure can begin! The GM might establish the place and time of their world and setting, or they might throw you in a tavern where your party meets.

Typically a quest or two is thrown to the party for them to take, depending on the quest the party chooses to follow the rewards gained will be different. Now your characters might explore the wilds in order to find the location of the quest, maybe it's a dank cavern, an abandoned outpost, or a pocket dimension filled with sand. It's also important to remember that players can take whatever actions they want, which includes ignoring the adventure and quests, they say some parties have still never left the tavern.

Player Agency:
It's important that player decisions and actions feel, and be, important. The GM should not "railroad" a party into one course of action and they should never force a player's character to do something. Oddity is a group role playing experience, which means that everyone should have a say in the narrative, especially when it comes to their own character.

Character Growth:
Hopefully you left the tavern and went on a quest that sounded fun to you. Maybe you got some cool loot too. Your GM may also reward you with other things depending on how hard the quest was and if they think you deserve it. Once you've gone on enough quests your characters will level up, gaining better stats and even better abilities.

You might find that your character changes over the course of the adventure or campaign, if you find that the class or abilities no longer suits them you should talk to your GM about changing them out for new abilities.

Death:
One horrible fate that might befall your character is death, typically a tragic end to a character's life, though sometimes a heroic sacrifice. Death is not always the end, as there are ways of resurrecting a character, however sometimes there is just no way to bring someone back, other times they don't want to come back.
Death should be warranted for each character it claims, GMs shouldn't go easy on their players, but they should keep in mind the fun and tone of the table. Playing in a grim dark world where

any bad decision could kill you? Death is probably pretty common and will happen somewhat frequently. Playing in a fairytale world where the theme is lighthearted? Death is reserved for only the most important of fights or situations. The tone of the setting/table should dictate how often death comes knocking.

Finishing a Campaign:
Unfortunately, I have never finished a campaign. But I think you should wrap up all story and character arcs, should a player choose to give one to their character or want to complete it. It should feel like the end of the story for your characters and perhaps even an era within the world. These characters may come back again within a different setting or campaign, but for now their thirst for adventure is quenched and their goals are achieved.
That's how I imagine it should be at least, there are other ends where the BBEG defeats the party during the final confrontation or the party sacrifices themselves to save the world. Those could also be a satisfying end, but it would be much harder to pull off and make fulfilling.

Character Creation:

Creating a Character:
Creating a character can seem like a daunting process that will require research and hard work. This is mostly true on your first time making a character, the process has been streamlined as much as possible for new players but it's always good to have an experienced GM or player at the table to help you out.
Once you get the hang of character creation the process can become very freeing and freeing for some. Creating backstories and character sheets for future campaigns becomes like a hobby to those who enjoy it.
Below is a checklist/guide to help you create your very own character:

Ancestry:
Your Ancestry determines what your character looks like, how they may be perceived within the GMs world, and what type of culture they might have. In additional to those background details it also provides the following:

- **Bonus to Stats**
  - Different ancestries provide different bonus to your main Stat Scores, typically there are two Stats that both get a +1 or one Stat that gets a +2
- **Languages**
  - Your chosen Ancestry can speak their native tongue as well as the common language.
- **Abilities**
  - Abilities that make your Ancestry stand out. Typically closely related to their history and evolution.
- **Size**

    - This determines how tall you are as well as how many 5 foot squares your character takes up. Most Ancestries are Medium or Small, but there are a few Tiny or Large as well.
- **Skill Proficiency**
    - This determines which Skill Proficiency you gain from your Ancestry, relates to their upbringing or their inherent skills.
    - Can also be given a Tool Proficiency instead of a skill.
- **Movement**
    - How fast your character can move during Combat, most Ancestries have a speed of 30 feet.

<u>Class</u>:
Your class determines what abilities your character starts with, as well as providing a style of play that will favor them. As you gain new abilities your character can change and start to develop strengths outside of their main focus.

- Hit die size
    - Determines your HP (max + VIG at level 1). This die, typically, will never change, but you are given another each time you level up.
- Armor and Weapon Type Proficiencies
    - What kind of armor and weapons you are proficient in.
    - Gives a set number of weapons that you can choose to gain proficiency in.
- Class Dice Pool
    - Your class's main feature consists of a pool of D6 that you can gain throughout the day by meeting a certain Trigger. When you have the dice within your pool you gain a Passive ability dependent on how many dice you have. You can also spend the dice to perform a different ability as an Interrupt.
- Class Ability
    - Your class ability typically supports your Dice Pool ability and vice versa. This is what makes your class stand out from the others, providing thematic abilities for you to perform in game.
- Class level up skill challenge
    - Each time you level up you can undergo a Skill Challenge to increase the strength of your character's Class Ability.
- Equipment
    - Starting gear that your character would have access to. Things like weapons, armor, magical focus, and other items.
    - Some GMs give their players a set amount of gold to buy items with instead of having to choose from their class list.

<u>Skills & Saving Throws</u>:

- Choose two Stats to have proficiency on Saving Throws.
- Choose any three Skills or Tools to gain proficiency in.

- Classes will have a Suggested Proficiency section to help determine which ones you should take, but the choice is ultimately the players to decide what kind of character they want to build and play.

Skill Points:
Granted at each level and gained through quests. These can help your character excel at certain skills.

- 3 + TAC (min. 0) skill points that may be put into any skill(s) of your choice.
    - Skills can have points up to your current level.
- Skill Points grant a +1 to whichever skill they are put into. You don't need to put them into skills you are proficient in.

Magic:
Manuevers and Spells:

- At level one your spell and maneuver die is a D4, this increases in size as you level up.
- You know and learn a number of maneuvers and spells determined by your class, but can also learn them through other methods.
- You may prepare a number of these equal to your bonus within your class's main skill, see Magic for more.

Affinities:

- You may either choose two Affinities or roll a D4 and gain affinities equal to the amount rolled.

Foundation:

- Choose a Foundation for your Martial or Spellcaster Class.

Discipline:

- Decide which Discipline you wish to pursue for your Martial or Spellcaster Class.

Level:
This determines how powerful your character is when the campaign begins and is decided by the GM. Most campaigns start at level 1, though some prefer to start at higher levels.

- Oddity is designed to start at level 1 for any long form campaign, though that is ultimately decided by the GM. The higher the level the more resources you will have to use to your advantage, but also you will have to manage and track them.

Additional Abilities:
You may take a number of abilities decided by the GM from the Class Abilities section.

- When starting at Level 1 you may not get any additional abilities, it is entirely up to the GM.

Background (Optional):
Backgrounds can provide some backstory context for your character. where they came from or how they began their adventuring career. There are three parts to your Backstory:

- Who You Were

    - Gives context for your life before becoming an adventurer. Also provides an ability that goes along with your character's past.
- Your Motivation
    - What drives you to continue adventuring, helps you focus on what goals you might have. Provides skill points in a skill that is thematic to Your Motivation.
- Who You Are
    - Entirely determined by the player. Should feel like a natural progression of the other two choices you made.

At level one:

When starting a campaign at Level 1 you should be sure you write down the different aspects of your character, listed below. A GM can help you understand and break down the options with you during Session 0 so your character fits into the setting and the playstyle you wish to achieve.

- Ancestry
    - Ancestry determines what your character looks like, where they might come from, as well as any Stat increases they gain.
- Class Dice Pool
    - Each class can have a maximum of dice equal to their level.
- Class Ability
    - Each Class has a specific Ability that synergizes with their Class Die Pool.
- Hit Point Maximum
    - Determined by max. number on your Hit Die + VIG.
- Skills & Saving Throws
    - You may choose two Stats to be proficient in their Saving Throws.
    - You may choose three Skills to become proficient in.
    - 3 + TAC skill points are given each level.
- Armor & Weapons
    - Determined by your class.
- Equipment
    - Either gain an amount of gold, decided by the GM, to spend or choose from your Class's equipment list.
- Maneuvers and Spells
    - Each Class starts with a D4 for their Maneuver and Spell die.
    - Different classes get different amounts of Maneuvers and Spells at first level.
- Affinity
    - Gives flavor and will change the aspects of your maneuvers and spells.
    - Choose two Affinities at Level 1. Or roll a D4 and choose the same amount of affinities as you rolled.
- Foundation
    - Spell Casters get Magical Foundation
    - Martial Classes get Physical Foundation.
    - You can only have one Foundation
- Discipline

    - Spell Casters get a Casting Discipline
    - Martial Classes get a Technique Discipline.

Class:

Choose a Class from one of the 12 options. Each Class plays differently than the others, however they also can overlap with each other as well. Some Classes are Spellcasters able to bend the world's magic to their will. Some Classes are Martial Fighters able to perform feats of strength and might from legend.

Class Dice Pool:

Class determines the main theme of your character, the each of them have a Dice Pool of D6 that has three parts:

- Trigger: What must happen in order to gain your class specific die.
- Passive: The ability you gain while you have your class dice. Able to store an amount equal to your level.
- Interrupt: What your character may do as an Interrupt for spending one or more dice.

Maneuver and Spell Die:

- Martial and Spellcasters gain a D4 at level one. This die represents their ability to perform certain Maneuvers and Spells.
- When using a Maneuver or Casting a Spell the player must roll their respective Die.
- The spell or maneuver is always performed, however the die may be decremented if it rolls the Spell or Martial Skills tier or lower. (I.e. Mage casts a Level 3 Fireball but rolls a 3, their Spell Die is decremented by 1.)
- Each class can improve their Spell/Martial Die size, once a character has completed their Class Skill Challenge, at Levels 2,4,6,8, & 10, then their die is increased by one size.
    - D4->D6->D8->D10->D12->D20.
- A Spell or Martial Skill whose tier is not represented on the Die cannot be used until the die is incremented or restored to full.
    - *IE. A Warrior cannot use a Martial Skill that has a Tier of 5 or higher when they only have a D4 for their Martial Die.*
- Attempting to cast a Spell or use a Maneuver above your Class Level will give you Exhaustion points equal to its Tier.

Ancestry:

Ancestry determines what type of creature you are, where you might have come from, how you were raised, what sort of culture you might have, but most importantly it gives you bonuses to your character sheet. Main stats get bonuses depending on your bloodline. You also might get, or get to choose, some new skills to gain proficiency in.

- Different ancestries may be more common in certain areas than others. Always check with your GM to see if the Ancestry you want to play as would fit the setting, or how it could fit in. Now you can always craft a backstory detailing why your character might be in an area that is far from home, as that's quite typical when creating a backstory, but you shouldn't just choose an ancestry because you like it's abilities or bonuses (just go with the custom Bloodline at that point).
- Some GMs will care greatly about the game's theme so always clear your character with them in session 0, or if you aren't having session 0 just ask them in advance.
- GMs, let your players have fun when deciding an ancestry and crafting their backstory, Garfield the Gallnyant Knight might have the most compelling character arc this world has ever seen.

Stats:

Rolling for stats:

Rolling stats is one of the most important, and least important, parts of your character. These skills determine almost everything, and nothing, about your character.
When rolling for stats every player must roll them the same way. Ultimately the GM should decide on what method to use. These are a few of the options:

- Not Your Average Commoners:
  - Players roll 1D6 - 3 for each stat.
  - This gives a spread of -2 through +3
- Average Adventurers:
  - Players Roll 1D6 - 2 for each stat.
  - This gives a spread of -1 through + 4.
- Seasoned Adventurers:
  - Roll 1D6 - 1 for each stat.
  - This gives a spread of 0 through +5.
- Champions:
  - Roll 1D4 + 1 for each stat.
  - This gives a spread of +2 through +5
- Fate Spun:
  - When generating a character you roll your stats one at a time, filling in Might first making your way down to Charm
  - This might tempt players into playing classes or Ancestries that they might not usually go for, and makes it unlikely to be a fully optimized build.
- All for One, One for All:
  - Players roll a pool of stats, maybe each player rolls for one stat.
  - Characters all use the same pool of numbers for their starting stats, causing each player character to be balanced with each other.
- Homebrew:
  - Whatever way you like rolling stats.

Stat Benefits:

MIGHT

- Used for physical feats
- You gain more Stored Item Slots the higher your Might Stat.
    - Every +1 in your Might Stat gives you an additional +2 Stored Item Slots.
- Improved Grappling:
    - +3: Able to grapple one size category larger than yourself
    - +5: Able to grapple 2 size categories larger than yourself.
    - +8: Able to grapple 3 size categories larger than yourself.

GRACE

- Fast, quick reflexes
- Your GRA stat modifier will affect the speed of your character

GRA Mod	-8	-6	-4	-2	0	2	4	6	8
Speed (ft)	-20	-15	-10	-5	0	+5	+10	+15	+20

VIGOR

- Hardy; tough to kill by poison or by blade
- Add to your HP every level

TACT

- How much knowledge you have
- Gain an additional amount of known Maneuvers or Spells at Level 1 equal to your Tact modifier.

WHIT

- Knowing how to apply your knowledge
- Some things can only be seen by those with a keen eye, some may even peer through wards and charms that an otherworldly being created.

CHARM

- Silvered tongue, dashing looks, or the ultimate combo between the two
- Number of hirelings you can have is equal to your CHA modifier. Increases at certain levels.
    - When you reach level 4 your hirelings are now powerful enough to be considered adventurers, they are upgraded to Retainers and they may now employ hirelings equal to their CHA.
    - At level 8 your influence spreads, if you haven't already made an organization now would be an opportune time.

Skills:

Skill Points:

- your character can put skill points into any skill of their choice
    - Gain 3 + TAC skill points each level.
- The number of skill points you have in a skill cannot surpass your current level
    - (ie. level 5 Tradesman can only have a maximum of 5 skill points in Passion).
- The Maximum number of skill points in one skill is 10.
- Skill totals are calculated by:
    - (**skill points**) + (**stat modifier**) + (**proficiency**) = total

Proficiency:

- Characters that have Proficiency in a skill can add their Proficiency Bonus whenever they roll a check using that skill.

Expertise:

- A character that has Expertise in a skill can double their proficiency bonus whenever they roll a check using that skill.

Skill Checks:

- These are called for when the player is attempting an action that either has consequences or the possibility of failure.
- A natural 20 will always succeed the check and a Natural 1 will always fail.
    - If you do not want a player to succeed or it is impossible for them to, do not have them roll.

Natural 20s:

- When a player rolls a natural 20 they should gain narrative control of the scene to describe how their character succeeds.

Taking 10:

- Sometimes a skill check is called for, but there is nothing that is really challenging the character.
    - No enemies around to attack the party.
    - No time limits they must keep to.
    - No prying eyes or wandering sights to behold them.
- In these situations the player can “take a 10” adding whatever skill or tool bonus they have to the 10.
- This will not always let the character succeed, this can cause them to fail if they still do not meet the DC of the skill check.

Suffering 20:

- When a character wants to really succeed at something they can decide to take a 20, however this comes at a cost.

- The character is acting out each process until they finally succeed with the critically correct one, this means that they must suffer the consequences of their actions.
- The player's character must suffer any consequences of rolling a 1-19 on the die before they get a natural 20.
- The reason this works differently from “Taking 10” is due to the fact that critically succeeding is much more difficult than getting the average. Thus your character will have to suffer through until they critically succeed.

Might

- Command
    - Giving Orders to others.
    - The Mighty will command, and the weak shall obey.
    - Sometimes a command takes action.
    - Used if you need to take command of a group of people
- Power
    - Basic Strength.
    - How much Might you contain within yourself.
    - Basic strength checks, how hard you throw something, or lifting a heavy object.
- Valor
    - Bravery and Heroic deeds are all a part of the job.
    - How well you fare within the thick of combat, to test your steel against your foes even when you know it could lead to your death.
    - Proving your righteous actions through a test of strength and bravery.

Grace

- Finesse
    - Picking locks, balancing on rooftops, and opening a bottle with a sword.
    - Writing script or forgeries.
    - Manipulating something else with a degree of skill
- Flexibility
    - How much you’re able to bend, in mind and body.
    - Good for getting into hard to reach or cramped places
- Nimbleness
    - How agile you are, and how well you can jump over a candle.
    - Relating to your own body and how well it can maneuver.
    - Reaction time
    - Great for hiding in a hurry or needing to escape quickly

Vigor

- Endure
    - No pain no gain, it’s only temporary.
    - Short term pain or restrictions.
- Grit
    - How much of a beating you can take.
    - Punch for punch how well you can do.
- Persistence

    - Working towards goals one step at a time.
    - Used against poisons or other long lasting effects that slowly erode the body.

Tact

- Astuteness
    - Making plans and calculations, overcoming obstacles and outsmarting others, all to achieve your goals.
    - Appraising items of value or worth.
    - Searching a room or area to find clues or other information.
- Focus
    - Lock it in, we're going turbo mode.
    - How well you can keep calm in combat and keep things under control.
    - Giving the majority of your attention to a problem or puzzle.
- Ingenuity
    - Solving problems has never been so efficient. Smart solutions aren't always elegant.
    - Being clever, original, and inventive when solving problems.
    - Typically involved in a creation process, either a trap, magic item, or technology.

Whit

- Compassion
    - Connecting with others through the use of empathy or sympathy.
    - Being able to give a soothing feeling to other creatures.
    - Helps in handling animals
    - Connect with nature to feel its age and wisdom.
- Intuition
    - How well your guts can predict the future.
    - Gain insight into the smallest of details and clues. Read body language.
- Ponder
    - To think about something in depth.
    - explore unthought paths of knowledge.
    - Gain a new perspective on a situation.

Charm

- Face
    - How personable you are when talking with others.
    - How well you can hide your tells.
    - Interacting with an NPC and trying to get them to do something through persuasion, deception, intimidation, bribery, or some other way.
    - How well you react to something, or can keep your reaction from showing.
- Passion
    - How much passion you have towards completing a goal or perfecting craft.
    - How authentic you seem when doing something
- Zest
    - People tend to gravitate toward your energy.
    - Attempting to infect/change others with your ideas or energy.

Hiding:

Hiding can be done in a number of ways. Making a Grace skill check to disappear into the shadows or cling to the rafters, putting on your best Face to blend into a crowd, using your Astuteness and Intuition to decide where the best place to hide would be.

Making a Hide Check:

- Make a skill check that is narratively reasonable for the game and current scene. The DC is determined by the Skill Check you make within the circumstances.
    - Very Easy: 5
    - Easy: 10
    - Medium: 15
    - Hard: 20
    - Very Hard: 25
    - Near Impossible: 30
    - Impossible: 35
- To hide from a creature you must have something to hide behind or within.
    - This can be a wall, another creature, scattered terrain, broken furniture, a screen of smoke, a dark shadow, or anything similar.
    - the object or terrain doesn't have to provide cover, but it does need to make sense that a character could hide behind/within it.

While Hiding:

- If a creature takes the Search action and you move into their line of sight you are immediately Found by them.
- Talking above a whisper gives advantage to those searching for you.
- You gain advantage on Attack Rolls, but attacking will cause you to be Found by the target you attacked.
- You cannot be targeted for an attack.

Searching for the Hidden:

- A creature can search for hidden creatures by making an Astuteness or Intuition check.
- Depending on the result of the check the creature either remains hidden, is detected, or is found.
    - **Detected**: You meet the creatures Save DC.
    - **Found**: You beat the creatures Save DC by 5 or more.

Detected:

- A searching creature meets the Hide Check.
- The searching creature knows the approximate location of the hidden creature, but doesn't necessarily know what it is.
    - Perhaps they heard a noise, saw some movement, smelled something unfamiliar, or felt some weird vibe from that dark corner in the room.
- The searching creature can make attacks at disadvantage on the hidden creature.
- The searching creature gains advantage to find the hidden creature on subsequent checks.
- The Hidden creature can move spots, however they must make a new Hide Check, upon which the result may reveal or conceal themselves.

    - If the hidden creature comes within line of sight of a searching creature that has Detected them, then they will be Found.

Found:

- Beat the Hide Check by 5 or more.
- The searching creature knows the exact location of the hiding creature.
- The Hidden condition is ignored by this creature.
- The creature makes a Search check on their turn and the hidden creature moves into their line of sight before the round is over.

Lock picking:

Lock picking is not as easy as making a finesse, ingenuity, or any other check.

- It is done by rolling D6.

A player who wants to unlock something must roll a D6 + GRA or TAC modifier to try and beat the locks DC. There are ways to gain more D6 to roll and even be able to reroll.

Additional D6:

- Using thieves tools gives: +1D6
- Hounds gain a number of D6 equal to their Level.
- Having a **+5** GRA mod: 1D6
- Having a **+5** TAC mod: 1D6
- Any other ability that gives additional dice

Failing?:

- Failing once makes it so the lock can now only be picked using thieves' tools.
- If a player fails the check then they can choose to Cheat the Roll if they meet the requirements below.

Cheat the Roll	
Requirements	Cheat
Proficiency in thieves tools	Re-Roll one Die
Expend a Lock Pick	Re-Roll 1 or 2 on one die
Every 2 skill points in Ingenuity	Re-Roll one Die
Every 2 skill points Finesse	Change Die Face to Adjacent one

How much time?

- Every reroll costs the player an additional 6 seconds (1 round).
- The lock DC determines the base amount of time a player must spend

DC	Seconds	Rounds
5	3	1/2
10	6	1
15	12	2

20	24	4
25	42	7
30	60	10

Helping with Skill Checks:

The help action can be used to assist another player character or even an NPC. To help the character you must explain how you're helping them in the situation, the GM and Player should agree on a skill that would be appropriate, depending on how good you roll, they get a bonus their roll:

Skill Check Total	Bonus to roll
5	+2
10	+4
15	+6
20	+8
25+	+10

Saving Throws:

When an Ancient Red Dragon makes a breath weapon attack against you and your allies, your character must make a GRA saving throw to jump out of the way and avoid being reduced to ash.

- Saving throws are made by your character when they need to succeed against an enemies ability, a natural effect, or a force of nature
- There is a DC that characters need to beat if they want to succeed, meets beats.
- Succeeding a saving throw usually means half damage or the effect of whatever forced you to make the save does not take hold
- Occasionally effects will occur even when you succeed on a saving throw, depending on the ability and nastiness of the creature you're fighting

Critically Saving:

- When you roll a Natural 20 or get 10+ over the Saving Throw DC, you suffer no effects and take no damage.

Determining DC:

- Determined by your main stat modifier + proficiency + 10

Hit Points:

Max HP:

- A character's maximum HP may not actually represent how many times they can be stabbed with a sword, you could also think of them as hero points, as stated by Matt Coville.
- A character cannot heal past their number of maximum hit points.
- When a creature Hits 0 HP they gain the Dying Condition

Temporary HP:

- Certain spells or abilities can give a player temporary hp to give them a buffer
- Temporary hp always gets subtracted first when a character takes damage
- Doesn't stack
- Has a limit on how long it lasts
    - If not specified, until short or long rest is completed.
- Will not restore an unconscious creature to consciousness, but will prevent them from taking further levels of exhaustion from attacks.

Non-Lethal Damage:

Creatures can take non-lethal damage from effects or attacks from creatures or hazards. Nonlethal damage is tracked separately from your current HP and is deducted directly from your MAX HP, ignoring temporary HP.

- When your non-lethal damage supasses your current HP you gain the Dazed Condition.
- If your non-lethal damage exceeds your MAX HP, you gain the Dying Condition.
- After taking a Short Rest, remove half your Non-Lethal damage. A Long Rest removes all Non-Lethal damage.

Dying:

Death comes for every character, and there are many ways to die while adventuring. When your character is near death they gain the Dying Condition. This can be caused from the following effects:

- Your HP hits 0.
- Your Non-Lethal Damage surpasses your Current HP.
- Some magical curse or effect.
- Your GM wants you to make different creative choices.

Dying Condition:

A Dying Creature can still act on their turns, in return their injuries worsen and their condition slips further towards death. You will take levels of Exhaustion depending on the type of Acts you take on your turn.

- A Dying creature takes half the usual levels of exhaustion to fall unconscious.

Act	Exhaustion Levels

One Act Turn | Major Act	2
Minor Act	1

<u>Slay the Dead</u>:
Attacks against Dying Creatures give more levels of exhaustion depending on the attack:

Attack	Exhaustion Levels
Melee	3
Ranged	2
Saving Throw	1 (Success)
Saving Throw	2 (Failure)

- Any attack or forced saving throw against a Dying and Unconsious creature will kill them.

<u>Stabilizing</u>:
To Stabilize you must remove the Dying Condition by restoring HP to the dying creature. A character can use an Action to make a (narratively reasonable) Skill check, DC = 10 + (Level of Character being Stabilized), in an attempt to stabilize a Dying Creature.

- On a failure nothing happens, but the DC for the next check is lowered by 2.
- On a success the creature is stabilized, and regains HP equal to 1D6 x Proficiency Modifier of the Character who stabilized them.
- If the creature has 10 levels of exhaustion, they remain unconscious.
- Magical effects or Conditions that bestow the Dying Condition may have an alternative way of removing this condition.

If a dying creature falls unconscious then they will wake up after a long rest.

<u>Massive Damage</u>: Optional
When a player character takes so much damage that they could not feasibly live, then the GM can decide that their character dies.

- Alternatively the GM can give Exhaustion levels to the player.

Typically this should only be done if a ludicrous amount of damage was just done to a player or if the damage is high enough and it feels narratively justified.

- It's not fun to kill your players when they did not, or could not have known the outcomes of their actions.

IE. Mark's character, the Armored Armadillo Mage, Dunhill got critically hit by a fungus creature, reducing his hit points past his maximum by three times over. Instead of dying immediately, Dunhill now has the Dying Condition with 3 levels of exhaustion.

<u>Bargaining With Death</u>: Optional
When a character is going to die or be insta-killed, the player may bargain with the GM, or "Death," in order to keep their character alive.

- A player might wish to spend their fate die, maybe even rolling to see if fate would favor them.
- They could ask to give up some abilities or some boon that they had received earlier.

- Perhaps they wish to sell their service or soul to a greater power.
- Let them make a deal with Death to escape its cold grasp, it will serve as a great narrative device and can even drive that character forwards within the story.

Senses

- Blindsight:
    - Able to sense anything within a certain radius. Does not pass through solid objects.
- Cavesight:
    - While inside a cave that has no daylight coming in you can see as though it was normal light.
    - Normal Sunlight is entirely too powerful for your eyes, causing you to suffer disadvantage when in sunlight.
- Dark Vision:
    - Able to see in the dark.
- Depth sense:
    - Able to sense how far you have ascended or descended within a cave like environment, in relation to sea level.
- Echolocation:
    - Able to sense the surrounding environment through sound and vibrational waves.
- Emotionsense:
    - Able to sense emotions within a certain radius. Can be from living things or a feeling brought from an area or item.
- Eyesight:
    - Vision is based off of your eye's perception of the area surrounding them
- Frostsight:
    - Able to see cold objects and creatures but cannot sense warm objects or creatures.
- Moonsight:
    - When the moon is full and unobstructed you can see as though it were daylight
- Northsense:
    - Always know which way is north.
- Smell:
    - Sniff that dank cavern and get ready for adventure
- Sound:
    - Hear the rustling of a bird in the tree… no wait that's an owl bear
- Sunsight:
    - no matter where you look it is as if you are looking in a brightly lit area.
    - Creatures relying on dim or darker light to hide from you are no longer hidden.
- Taste:
    - Probably the best one tbh
- Touch:
    - Feel the grass. Be free.

- Torchsight:
    - Able to sense warm objects and creatures, but can't sense lack of heat in objects or creatures.
- Tremorsense:
    - Able to sense through the ground within a certain radius.
- Truesight:
    - Able to see through all illusions and spells. Allows one to peer through the Worlds of existence.

Size

There are many shapes and sizes that both characters and the monsters they face can come in. Different sizes grant different benefits as well as different drawbacks. Even weapons can come in different sizes which in turn change the amount of damage they deal (more info in Weaponry.) It's an important factor for almost every part of the game.
The following is a list of size categories going from the smallest size to the largest:

- Tiny
    - Space: ¼ a 5 foot square
    - Height: 1-2 feet
    - Weight:
    - Reach: 5 feet
- Small
    - Space: ½ a 5 foot square
    - Height: 2-4 feet
    - Weight:
    - Reach: 5 feet
- Medium
    - Space: 1x1 5 foot square
    - Height: 4-8 feet
    - Weight:
    - Reach: 5 feet
- Large
    - Space: 2x2 5 foot squares
    - Height: 8-16 feet
    - Weight:
    - Reach: 5 feet
- Huge
    - Space: 3x3 5 foot squares
    - Height: 16-32 feet
    - Weight:
    - Reach: 10 feet
- Giant
    - Space: 4x4 5 foot squares
    - Height: 32-64 feet

    - Weight:
    - Reach: 15 feet
- Massive
    - Space: 5x5 5 foot squares
    - Height: 64-128 feet
    - Weight:
    - Reach: 20 feet
- Enormous
    - Space: 6x6 5 foot squares
    - Height: 128-256 feet
    - Weight:
    - Reach: 30 feet
- Gargantuan
    - Space: 8x8 5 foot squares
    - Height: 256-512 feet
    - Weight:
    - Reach: 45 feet
- Titanic
    - Space: 12x12 5 foot squares
    - Height: 512-2048 feet
    - Weight:
    - Reach: 80 feet
- Colossal
    - Space: 25x25 5 foot squares
    - Height: 2048-8192 feet
    - Weight:
    - Reach: 150 feet
- Mountainous
    - Space: 100x100 5 foot squares
    - Height: 8192 feet - 6 miles
    - Weight:
    - Reach: 300 feet

Leveling Up:

Leveling does not give you new abilities, it only gives more HP, occasional Stat Modifiers, higher proficiency, and improved Maneuver and Spell Die size.

- Every level up you gain an additional hit die of your class and your HP increases by (roll class hit die) + (VIG modifier.)
- Every level characters get 3 + TAC (min. 0) skill points that they can put into skills of their choosing.

Level Up Table:

Level	Proficiency	Stat Points	Maneuver and Spell Die
1	+2		D4
2	+2		D6
3	+3	2	D6
4	+3		D8
5	+3		D8
6	+4	2	D10
7	+4		D10
8	+4		D12
9	+5	2	D12
10	+5		D20

Class Skill Challenge:
Each time your character levels up they will be able to attempt their Class Skill Challenge. This will improve their Main Class ability in some way.

- This is typically supposed to be done during Downtime and can take a varying amount of time depending on the GM's discretion. It can be done during a Quest if the GM allows it.
- Optionally the GM can have the players skip their Class Skill Challenge and just gain the benefits from it.

Ancestry

Custom Ancestry:

- Choose an Ancestry
- Gain 2 Stat points
- Choose a Skill or Tool proficiency
- Choose a Language
- Choose a size category
    - Must be within 1 size category of the chosen Ancestry.

Beast Folk:

Anjing: Dog folk

- +1 MIG

- Languages: Anjian and one other
- Size: Medium
- Speed: 30 feet
- Ability:
    - **Dogs Honor**: When you give the help action the creature being helped gains a +3 to their roll

Bloodlines

Poladog: Thick Fur

- +1 to VIG
- Your size is medium
- Gain proficiency in Endure.

Abilities:

- **Natural Armor**: You have a natural AC of 12 + GRA or VIG.

Huntsky: Sleek Hunter

- +1 to GRA
- Your size is medium
- Gain proficiency in Nimbleness.

Abilities:

- **Silent Bite**: You deal an additional damage die when attacking while hidden.

Bullybark: Vicious Bark

- +1 to CHA
- Your size is Small
- Gain proficiency in Face.

Abilities:

- **Mean Mug**: Creatures that become intimidated by you gain the Dazed condition until the end of your next turn.

Lapguard: Loyal Guard

- +1 to TAC
- Your size is medium
- Gain proficiency in Astuteness.

Abilities:

- **Keen Watch**: You gain a +5 to your Passive Astuteness.

Balgun: Monkey folk

- +1 to GRA
- Languages: Balgan and one other
- Size: Medium
- Speed: 30 feet
- Ability:
    - **Climbing speed:** You gain a climbing speed equal to your walking speed.

Bloodlines

Goldenback: Gorlinan

- +1 to MIG
- Your size is medium
- Gain proficiency in Power.

Abilities:

- **Mighty Form**: You can push/pull and grapple one size category larger than yourself.

Blankcoat: Organti

- +1 to TAC
- Your size is medium
- Gain proficiency in Astutness.

Abilities:

- Ability:
    - **Sight Beyond Death**: Once per long rest you can communicate with the lingering spirits that reside within this world. While you use this you can see invisible and incorporeal beings and all undead glow faintly to you. This lasts for 10 minutes. Do not make eye contact with [Them].

Classes

Classes each have their own Main Class Ability, as well as a Skill Challenge that will improve said main class ability. Abilities change the way your character can be played and even expand on your Main Class Ability.

Berserker:

Berserker Class Specs			
Hit Die:	D10	**Proficiencies:**	
Starting Equipment:		**Armor:**	Light, Medium, & Shields
Round Shield		**Weapons:**	Choose 5 Weapons
One Martial Weapon		**Tools:**	Choose 1 Instrument
Two Simple Weapons		**Suggested Proficiencies**	
One Instrument		**Skills & Tools:**	**Saving Throws:**
Explorer's pack		Command	VIG
		Grit	MIG
		Leather Workers Tools	WHI

Class Abilities:

- **Wrath**: Use what drives your life forward, thrive from the battle that surrounds you. Each time your Trigger is activated you gain a Wrath die, maximum equal to your level, while you have them you will gain a Passive benefit, you can also spend them to use a different ability as an Interrupt.
    - Trigger:
        - When the number of enemies within 5 feet outnumber you.
    - Passive:
        - When you would take damage, reduce the amount by twice the number of your Wrath dice.
    - Interrupt:

        - Attack a creature within range, roll the spent dice and add it to the damage roll.
- **Natural Armor**:
    - Your body is a moving fortress, ready to siege any castle. While you are not wearing armor you have an AC equal to 10 + VIG + (MIG or GRA).
    - When you take non-magical Damage, reduce the amount equal to Your Level x 2.
- **Martial Maneuvers**:
    - Berserkers use Vigor for their Maneuver modifier.
    - Berserkers can prepare a number of Maneuvers equal to their Grit skill modifier.
    - At Level 1 you know 2 Maneuvers. Each time you Level up you can learn 2 additional Maneuvers.
    - Your Maneuver Save DC = 10 + proficiency modifier + VIG modifier.

Class Skill Challenges:

- **Growing Pains:**
    - Every level after 1st, your body surges with might and you struggle to keep it under control.
    - Make a **Grit** check as your muscles begin to spasm out of control, DC equal to 10 + Level.
    - Next succeed a **Endure** check as your body surges with pain from your bones growing, DC equal to 12 + Level.
    - Finally make a **Persistence** to finalize the transformation, DC equal to 14 + Level.
    - If you fail During this process you must succeed a **VIG** saving throw, DC equal to Level x 3. If you fail you take (D6 x level) of force damage (cannot be reduced). You suffer a point of exhaustion equal to the stage failed, and you must wait a day before you can attempt this again.
        - If you succeed you may continue on the skill challenge.
    - After passing each stage your body's transformation has completed, increasing your durability and endurance. Your HP increases by 1D6 + VIG.

Cultivator:

Cultivator Class Specs			
Hit Die:	D10	**Proficiencies:**	
Starting Equipment:		**Armor:**	None
One Martial Weapon		**Weapons:**	Choose 4 weapons
Two Simple Weapons		**Tools:**	Choose 2 Tools
Explorer's pack		**Suggested Proficiencies**	
		Skills & Tools:	**Saving Throws:**
		Command	MIG
		Grit	GRA
		Healers Tools	WHI

Class Abilities:

- **Momentum**: Your movements flow into each other causing your form to become an unstoppable force. Each time your Trigger is activated you gain a Momentum die, maximum equal to your level, while you have them you will gain a Passive benefit, you can also spend them to use a different ability as an Interrupt.
    - Trigger:
        - When you miss an Unarmed Attack.
    - Passive:
        - When you make a melee attack you gain a bonus to hit equal to your number of your Maneuver dice.
    - Interrupt:
        - Roll as many Momentum Dice as you want, rolling one at a time, and take a melee attack for each one, adding the spent die to the Attack Roll.
- **Unarmored Training**:
    - Unarmed attacks deal 1D6 + MIG or GRA bludgeoning damage. You can increase your damage die by refining your body.
    - When you take the Attack Action, you may make a number of Unarmed Attacks equal to your Proficiency Modifier.
    - While you are not wearing armor your AC = 10 + MIG + (WHI or GRA).
- **Martial Maneuvers**:
    - Cultivators use Might for their Maneuver modifier.

    - Cultivators can prepare a number of Maneuvers equal to their Power skill modifier.
    - At Level 1 you know 3 Maneuvers. Each time you Level up you can learn 2 additional Maneuvers.
    - Your Maneuver Save DC = 10 + proficiency modifier + MIG modifier.

Class Skill Challenges:

- Refining The Body:
    - At every level after first you can refine your body to bolster your attacking power.
    - Each Cultivator has different methods of refining their body, some sit under powerful waterfalls while others sit upon mountain tops to let the heavens lightning strike their body filling them with power.
    - Each time you succeed in refining your body your Unarmed Attacks increase in damage by 1 size increment.
        - 1D6 —> 1D8 —> 1D10 —> 1D12 —> 2D8 —> 2D10 —> 2D12 —> 3D8 —> 3D10 —> 3D12
    - The time it takes to refine your body is a number of days equal to half the dice total (3, 4, 5, 6, 8, 10, 12, 12, 15, 18).
    - To begin you must first make a **Power** check, <u>DC equal to 10 + Unarmed Attack Die Size</u>. For this check you can use GRA instead of Might. This is to break the body.
    - You must next make a **Command** check, <u>DC equal to 12 + Unarmed Attack Die Size.</u> This is to refine the body and get rid of impurities.
    - Last you must make a **Valor** check, <u>DC equal to 14 + Unarmed Attack Die Size</u>. This is to reform your refined body, after which your Unarmed Attack die increases by one stage.
    - If you fail at any stage during this process you must make a **VIG** saving throw, <u>DC equal to (6 x stage) + Unarmed Attack Die Size</u>, or else you gain exhaustion equal to the stage failed and you cannot attempt this for a day.
    - Upon success you may increase your Unarmed Attack Damage and gain one skill point to put into any MIG or GRA skill.

Guardian:

Guardian Class Specs			
Hit Die:	D10	**Proficiencies:**	
Starting Equipment:		**Armor:**	All Armor & Shields
Chain or Scale mail		**Weapons:**	Choose 4 Weapons
Buckler or Round Shield		**Tools:**	None
One Martial Weapon		**Suggested Proficiencies**	
Two Simple Weapons		**Skills & Tools:**	**Saving Throws:**
Holy symbol		Command	MIG
Explorer's pack		Grit	WHI
		Healers Tools	CHA

Class Ability:

- **Guard**: You protect the ones around you, using your body as a shield for the weak. Each time your Trigger is activated you gain a Guard die, maximum equal to your level, while you have them you will gain a Passive benefit, you can also spend them to use a different ability as an Interrupt.
    - Trigger:
        - When your ally(ies) becomes outnumbered by enemies.
    - Passive:
        - Allies within your Shielded Stance Range gain a bonus to their Saving Throws equal to twice the amount of dice you have.
    - Interrupt:
        - You can move to intercept an attack made against an ally that is within your Shielded Stance Range, roll your spent dice and add the total to your AC until the end of your next turn.
- **Shielded Stance:**
    - Allies within 5 ft of you gain half your Shield's AC bonus (rounded down to a minimum of 1).
    - Enemies have disadvantage on attacks of opportunity against allies within this range.
- **Martial Maneuvers**:
    - Guardians use Might for their Maneuver modifier.

    - Guardians can prepare a number of Maneuvers equal to their Valor skill modifier.
    - At Level 1 you know 3 Maneuvers. Each time you Level up you can learn 2 additional Maneuver.
    - Your Maneuver Save DC = 10 + proficiency modifier + MIGHT modifier.

Class Skill Challenge:

- Reaffirming the Oath:
    - At every level you must confirm the oath you made when you first became a Guardian.
    - First you must make a **Valor** skill check to pray out to whatever being granted you power, an angel, a god, a devil, an abstract force, or even yourself. DC equal to 12 + Level.
    - Next you must make a **Command** skill check, DC equal to 14 + Level.
    - Lastly make a **Power** check, DC equal to 16 + Level.
    - If you fail during this process you must succeed a **CHA** saving throw, DC equal to (5 x stage) + Level, or you suffer D8 per level radiant damage and cannot attempt again for a day. If you succeed you move to the next stage.
    - After confirming and strengthening your oath, your Shielded Stance range increases by 5 ft.

Hound:

Hound Class Specs			
Hit Die:	D6	**Proficiencies:**	
Starting Equipment:		**Armor:**	Light
Leather Armor		**Weapons:**	Daggers & 2 GRA Weapons
Two Daggers		**Tools:**	Thieves Tools
Rapier or Scimitar		**Suggested Proficiencies**	
Any Simple Ranged Weapon		**Skills & Tools:**	**Saving Throws:**
		Command	GRA
Thieves Tools		Grit	TAC
Burglar or Explorer's pack		Healers Tools	CHA

Class Ability:

- **Shade**: Living your life within the Shadows has made you into one. Each time your Trigger is activated you gain a Shade die, maximum equal to your level, while you have them you will gain a Passive benefit, you can also spend them to use a different ability as an Interrupt.
    - Trigger:
        - When you fail to Hide or are Found by an NPC.
    - Passive:
        - You gain a bonus to Hide checks equal to twice your amount of Shade dice.
    - Interrupt:
        - You can spend dice to move and attempt to hide, adding the spent dice to the Hide check.
- **Slick Sneaking**:
    - It takes 30 minutes to craft a lock pick from raw material. With a simple tool or item as the base creation (paperclip, needle, hairpin, etc.) it only takes 30 seconds, but it breaks after 1 use.
    - Picking a lock takes half as much time as it usually does.
    - When you attack a creature you are hidden from, your critical hit range increases by 1.
- **Martial Maneuvers**:

- Hounds use Grace for their Maneuver modifier.
- Hound can prepare a number of Maneuvers equal to their Flexibility skill modifier.
- At Level 1 you know 4 Maneuvers. Each time you Level up you can learn 2 additional Maneuvers.
- Your Maneuver Save DC = 10 + proficiency modifier + GRACE modifier.

Class Skill Challenge:

- Shadow Work:
  - At every level after 1st, you, an organization you work for, or a patron can test yourself. Choose something that is befitting of your character/ organization/ patron.
    - *A thief may have to steal a precious gem within a vault.*
    - *An investigator might have to gather intel on an enemy organization, or a noble whose money runs a little too deep.*
    - *A watcher might have to stalk someone for a long period of time without being noticed.*
  - Whatever you choose it will take a number of days equal to your level (or whatever the GM seems appropriate).
  - As you start you must make a **Flexibility** check to begin your plan, DC equals 12 + Level.
  - After your plan has been laid out you must make your move. Make a **Finesse** check, DC equal to 14 + level.
  - Lastly make a **Nimbleness** check to get out without being seen, DC equal to 16 + Level.
  - If you fail at any point you can make a **GRA** based skill check to try and get yourself out of the situation, DC equal to (5 x stage) + Level. If you fail you take blame for whatever you were caught doing. If you succeed you can move to the next stage.
  - On a success you manage to become a bit more adept at living as a Shadow. You half the time it takes to make lock picks and the time it takes to pick locks. Your critical hit range on creatures you are hidden from increases by 1.
  - You may also be rewarded depending on what you did and if your GM deems it appropriate.

Jinx:

Jinx Class Specs			
Hit Die:	D6	**Proficiencies:**	
Starting Equipment:		**Armor:**	Light & Medium Armor
Leather or Chain Shirt		**Weapons:**	Choose 2 Weapons
One Martial Weapon		**Tools:**	Choose One Tool
One Simple Weapon		**Suggested Proficiencies**	
Component Pouch or Arcane Focus		**Skills & Tools:**	**Saving Throws:**
		Command	CHA
Explorer's pack		Grit	TAC
		Healers Tools	WHI

Class Ability:

- **Omen**: People look at you as cursed, afflicted by some otherworldly power, it's time to let them know that it's true. Each time your Trigger is activated you gain an Omen die, maximum equal to your level, while you have them you will gain a Passive benefit, you can also spend them to use a different ability as an Interrupt.
    - Trigger:
        - You fail a saving throw.
    - Passive:
        - Subtract twice your amount of Omen dice from your target's saving throws.
    - Interrupt:
        - Roll your dice and cast a spell of that tier or lower, the target auto-fails their saving throw if one is required.
- **Patron Hex**:
    - With each Pact you form you obtain a Hex. This is an ability that is from whatever entity you Bonded with, it is sometimes altered to better suit you.
    - Gain one of the pacted Patron's abilities as a Hex, approved by the GM (This part could be worked out in character as it is probably put into the contract.) The ability may be scaled to the player's current level.

    - Players can direct gain an ability from a monster stat block, work out a new ability with the GM, or choose an ability (see Class Abilities section) that the GM deems as appropriate.
- **Spell Casting**:
    - Jinx can use Charm or Tact for their spell casting modifier
    - Jinx counts as a special class of casters. They only have one Spell die that does not decrement when spent, and is instead regained on a Short Rest.
        - If a Level 6 Jinx casts *Tribulation*, a 5th tier spell, and rolls 5 or less on their die, they must take a Short Rest to regain use of their Spell Die again.
    - At Level 1 you know 3 Tiered Spells and 2 Tier 0 Spells. Each time you Level up you can learn 2 additional Spells.
    - A Jinx can prepare a number of spells equal to their Zest skill modifier.
    - Your Spell Save DC = 10 + proficiency modifier + CHA

Class Skill Challenges:

- Bonding Pact:
    - At every even level you have a chance to further your Pact with your Patron, or begin another Pact with a suitable Patron.
        - What you offer in return for their power may influence the DC of the roll.
    - First make a **Face** check, this is based on the sincerity of your Vow, <u>DC equal to 12 + Level</u>.
    - Next roll a **Zest** check to see what your partner is requiring of you, <u>DC equal to 14 + Level</u>.
    - Lastly you must seal the contract, you and your patron both use your powers to form a Binding Vow on the contract, make a **Passion** check, <u>DC equal to 16 + level</u>.
    - If you fail during this process you must make a **TAC** saving throw, <u>DC equal to (5 x Stage) + Level</u>. On a success you move onto the next stage, on a failure you take (D6 x number of Binding Vows) force damage and you must appease the sentient being before you can try again.
    - On a successful completion of the Skill challenge you are granted with a strengthened Pact or a new Pact along with a Hex from the Patron.

Mage:

Mage Class Specs			
Hit Die:	D6	**Proficiencies:**	
Starting Equipment:		**Armor:**	None
Two Daggers		**Weapons:**	Daggers & Quarterstaffs
One Simple Weapon		**Tools:**	Choose 2 Tools
A Spellbook		**Suggested Proficiencies**	
Component Pouch or Arcane Focus		**Skills & Tools:**	**Saving Throws:**
		Command	TAC
Explorer's or Scholar's Pack		Grit	GRA
		Healers Tools	WHI

Class Abilities:

- **Mastery**: Researching magic has led you down an unending road of knowledge. Each time your Trigger is activated you gain a Mastery die, maximum equal to your level, while you have them you will gain a Passive benefit, you can also spend them to use a different ability as an Interrupt.
    - Trigger:
        - When an enemy succeeds your Discipline's Spell Saving Throw DC or you miss an attack with a Spell of your Magical Discipline.
    - Passive:
        - For each Mastery Die you have, you may recall two unprepared spells.
    - Interrupt:
        - Roll as many Mastery dice as you want and add it to your Magical Disipline's Spell Attack Roll or Saving Throw DC**.**
- **Arcane Knowledge**:
    - Choose another magical discipline:
        - EX. abjuration, conjuration, divination, evocation, enchantment, illusion, necromancy, or transmutation
    - Learning your magical discipline's spells takes half the time and gold as normal.
- **Spell Casting**:
    - Mages use Tact for their spell casting modifier
    - A Mage can prepare a number of spells equal to their Ingenuity skill modifier.

    - At Level 1 you know 5 Tiered Spells and 3 Tier 0 Spells. Each time you Level up you can learn 3 additional Spells.
    - Your Spell Save DC = 10 + proficiency modifier + TAC modifier.

Class Skill Challenge:

- Arcane Research:
    - When you level up you have the chance to develop improve your Arcana Reserves to store more dice.
    - To do so you must first make an **Ingenuity** check to begin expanding your reserves, DC equal to 10 + level.
    - Next make an **Astuteness** check, DC equal to 12 + your level. This is to make sure there are no issues or flaws when expanding your reserves.
    - Finally you must stabilize the Arcana Reserves structure. Make a **Focus** check, DC equal to 14 + level.
    - If you fail at all during this process you can make an Insight check, DC equal to (5 x stage) + level, If you succeed you move on to the next stage. On a failure your spell backfires and you take D6 per level force damage.
    - If you pass all three stages then you can now choose an additional Magical Discipline as well as a spell of that discipline.

Medium:

Medium Class Specs			
Hit Die:	D6	**Proficiencies:**	
Starting Equipment:		**Armor:**	None
Two Daggers		**Weapons:**	Choose 2 Simple Weapons
One Simple Weapon		**Tools:**	Choose Two Tools
Dungeoneer or Explorer's Pack		**Suggested Proficiencies**	
		Skills & Tools:	**Saving Throws:**
		Command	VIG
		Grit	TAC
		Healers Tools	CHA

Class Ability:

- **Flux**: Being connected to magic in such a way has caused you to effect it more intimately. Each time your Trigger is activated you gain a Flux die, maximum equal to your level, while you have them you will gain a Passive benefit, you can also spend them to use a different ability as an Interrupt.
    - Trigger:
        - When you don't cause a Wild Magic Surge.
    - Passive:
        - When you cast a spell, you may increase the Chaos Magic Surge Chance equal to your Flux dice.
    - Interrupt:
        - Roll as many Flux Dice as you want, casting a known spell for each die with a tier equal or lesser to the amount rolled**.**
- **Wild Touch**:
    - Your spellcasting comes from the direct manipulation of Magic, while it gives powerful spellcasting it also leads to some drawbacks.
    - When you cast a spell of 1st Tier or greater you can roll a Chaos Magic Surge Chance (D20). On a 1, roll on the Chaos Magic Surge table. When you cause a Chaos Magic Surge you may increment your spell die (unless it is already at the max for your level.)
    - Gain Innate Spell Casting

- **Spellcasting**:
    - Mediums use Vigor for their spell casting modifier
    - When leveling up, a Medium does not need to choose a new spell immediately. Instead they can let the magic come to them and wait for an opportunity for a new spell to be formed.
        - You can spontaneously choose a spell that matches at least one of your affinities, at any time after leveling up, after which it will become a permanent spell on your list.
    - At Level 1 you know 2 Tiered Spells and 2 Tier 0 Spells. Each time you Level up you can learn 2 additional Spells whenever you decide.
    - Mediums can prepare a number of spells equal to their persistence skill modifier.
    - Your Spell Save DC = 10 + proficiency modifier + VIG modifier.

Class Skill Challenge:

- Engraving Circles:
    - Medium are able to cast spells from their innate magic ability. To harness and control this energy they must engrave magic circles onto their hearts.
    - When you level up you can engrave a new circle onto your heart (or other organ). This magic ritual takes place over <u>one hour x Level</u>. You must make it through the rituals three stages before you are finished.
    - To begin the ritual roll a **Grit** check, the <u>DC equal to 12 + level.</u>
    - The second check requires an **Endure** check, <u>DC equal to 14 + level.</u>
    - The final check requires an **Persistence** check, <u>DC equal to 16 + level</u>.
    - Each time you fail an stage you have two options: end the ritual and try again in 1D4 days or continue the ritual with a risk.
    - To continue the ritual you must make a VIG saving throw, <u>DC equal to (5 x ritual stage) + level)</u>, if you succeed then you can successfully pass to the next stage of the ritual.
    - If you fail the VIG saving throw, then the mana in your body explodes, you take force damage equal to <u>1D6 x Level</u> and your hit points are reduced by that amount for the next day, while your hp is reduced in this way you cannot attempt the ritual.
    - Once the ritual is over your Wild Magic Chance starting DC increases by 1.

Shaman:

Shaman Class Specs			
Hit Die:	D8	**Proficiencies:**	
Starting Equipment:		**Armor:**	Light, Medium, & Shields (No Inorganic Materials)
Bark or Leather Armor			
Buckler or Round shield		**Weapons:**	Quarterstaffs & 2 Weapons
One Martial Weapon		**Tools:**	1 Instrument
One Simple Weapon		**Suggested Proficiencies**	
Component Pouch or Primal Focus		**Skills & Tools:**	**Saving Throws:**
		Command	WHI
One Instrument		Grit	MIG
Explorer's pack		Healers Tools	VIG

Class Ability:

- **Instinct**: You may build up an amount of Instinct dice equal to your level, when you have them you will gain a benefit, you can also spend them to use another ability as an interrupt.
    - Trigger:
        - When you are hit by attack with an Elemental Affinity.
    - Passive:
        - Roll your dice and reduce any elemental damage by the amount rolled.
    - Interrupt:
        - Spend any amount of Instinct Dice, a number of beasts equal to the dice total come to your aid. Their hit dice total cannot exceed the amount of spent dice. They act immediately.
- **Natures Blessing**:
    - Choose an additional Affinity from the elemental affinities table.
    - Gain a spell of that Affinity.
- **Spell Casting**:
    - Shamans use **Whit** for their spell casting modifier
    - Shamans can prepare a number of spells equal to their Compassion modifier.
    - At Level 1 you know 4 Tiered Spells and 2 Tier 0 Spells. Each time you Level up you can learn 2 additional Spells.

    - Your Spell Save DC = 10 + proficiency modifier + WHI modifier.

Class Skill Challenges:

- Nature Palace:
    - A Nature Palace is a place within your mind. It is a temple of Nature that you hold with you everywhere you go. For each Shaman it is different. A Beastborn might imagine a wild sanctuary for all kinds of different creatures. An Elementalist meditates on the sound of waves as they sit isolated on a rock within a storming sea. A Guardian of Nature might envision the actual location or kind of Nature they took an Oath to protect
    - At every level after first, you can gain the chance to incorporate a new Affinity into your Nature's Palace.
    - First envision your Nature Palace, make a **Ponder** check, DC equal to 12 + Level.
    - Next you must expand your Palace and fill it with Nature's Beauty. Make a **Compassion** check, DC equal to 14 + Level.
    - Lastly you must observe and learn from the expanded Nature as it settles into your Palace. Make an **Intuition** check, DC equal to 16 + Level.
    - If you fail during this process it means that Nature does not wish to enter your Palace. Make a **TAC** saving throw, DC equal to (6 x Stage) + Level. If you fail then the process ends and you take D8 per level psychic damage and you cannot attempt this for another day. On a success you move to the next stage.
    - If you pass all stages then your Nature Palace has successfully incorporated another Affinity. You can choose a new Elemental Affinity and gain a spell of that affinity or one you previously had.

Tradesman:

Tradesman Class Specs			
Hit Die:	D8	**Proficiencies:**	
Starting Equipment:		**Armor:**	Light & Bucklers
Leather armor		**Weapons:**	Choose 3 Finesse Weapons
One GRA Martial Weapon		**Tools:**	3 Tools or Instruments
One Simple Weapon		**Suggested Proficiencies**	
Two Instruments		**Skills & Tools:**	**Saving Throws:**
One Tool		Command	CHA
Entertainers, Diplomat, or Explorer's pack		Grit	GRA
		Healers Tools	TAC

Class Ability:

- **Inspiration**: Your sense of artistic expression has led you to become your own muse. Each time your Trigger is activated you gain a Craft die, maximum equal to your level, while you have them you will gain a Passive benefit, you can also spend them to use a different ability as an Interrupt.
    - Trigger:
        - When you fail a skill check.
    - Passive:
        - When you make a Skill Check, gain a bonus equal to twice your Craft Dice.
    - Interrupt:
        - When an ally within your line of sight makes an Attack Roll, Skill check, or Saving Throw you may add as many Craft Dice to the roll as you want.
- **Special Craft**:
    - When you make a Craft Check with tools you have proficiency with, it takes an hour to craft one item with a complexity equal to or less than your level.
    - When you help an ally on a Skill Check you may roll with advantage.
- **Spell Casting**:
    - Tradesmen use Charm for their spellcasting modifier.
    - Tradesmen can prepare a number of spells equal to their Passion modifier.

    - At Level 1 you know 3 Tiered Spells and 2 Tier 0 Spells. Each time you Level up you can learn 2 additional Spells.
    - Your Spell Save DC = 10 + proficiency modifier + CHA.

Class Skill Challenges:

- Quality Craftsman:
    - You constantly strive to become the best in your craft. At every level after 1st you can undergo a trial to hone your skills even further.
    - Start by making a **Passion** skill check, DC equal to 10 + Charm Die Size.
    - Next make an **Zest** skill check, DC equal to 12 + Charm Die Size.
    - Lastly make a **Face** check, DC equal to 14 + Charm Die Size.
    - If you fail during this process you can make a **TAC** saving throw DC equal to (6 x stage) + Level. On a success you move on to the next stage. On a failure you lose face and take Stage x charm dice size of psychic damage
    - Success allows you to craft an additional item during the hour and you gain proficiency in a new tool.

Traveler:

Traveler Class Specs			
Hit Die:	D8	**Proficiencies:**	
Starting Equipment:		**Armor:**	Light & Medium
Leather armor		**Weapons:**	All Bows & 3 GRA Weapons
Two GRA Martial Weapons		**Tools:**	Choose One Tool
Two Simple Weapons		**Suggested Proficiencies**	
(D20) Bolts/Arrows or 2 Daggers		**Skills & Tools:**	**Saving Throws:**
		Command	GRA
Explorer's Pack		Grit	MIG
		Healers Tools	WHI

Class Ability:

- **Hunt**: Living in and wandering through the wilds has led you to become an experienced survivor. Each time your Trigger is activated you gain a Hunt die, maximum equal to your level, while you have them you will gain a Passive benefit, you can also spend them to use a different ability as an Interrupt.
    - Trigger:
        - When you fail to learn something about a target.
    - Passive:
        - You gain a bonus to learning about creatures equal to twice your Hunt Dice.
    - Interrupt:
        - You may spend a Hunt Die to move and make an attack, adding the die to the Attack Roll**.**
- **Survival Sense:**
    - As a Quick Action you may make a Skill Check to attempt to learn something about a target. The DC is equal to the target's Save DC.
        - EX. Hit Die Size & Amount, Stat Score, Ability, Special Skill, Attack & Damage.
    - You can choose an additional language to learn or choose to read lips.
    - You gain an additional 5 feet of movement.
- **Martial Maneuvers**:

    - Travelers use Grace for their Maneuver modifier.
    - Travelers can prepare a number of Maneuvers equal to their Nimbleness skill modifier.
    - At Level 1 you know 4 Maneuvers. Each time you Level up you can learn 2 additional Maneuvers.
    - Your Maneuver Save DC = 10 + proficiency modifier + CHA modifier.

Class Skill Challenge:

- Trial by Wild:
    - At every level you can venture out into a new terrain. You must survive living within the wilderness.
    - First make a **Flexibility** check to locate a suitable location, DC equal to 12 + Level.
    - Next make a **Nimbleness** check to avoid needless confrontation with the wildlife, DC equal to 14 + Level.
    - Finally make a **Finesse** check to return your temporary home to how you found it and safely leave the terrain, DC equal to 16 + Level.
    - If you fail during this process you must make an Animal handling check, nature, or survival check, DC equal to (5 x stage) + level, on a success you can pass to the next stage. On a failure you must immediately evacuate the area and get to the safety of a town. You suffer exhaustion equal to the stage failed and you must restart your Trial by Wild.
    - If you succeed, your movement increases by 5 feet, you may learn a new language, and you gain advantage on learning about creatures within that terrain.

Warrior:

Warrior Class Specs			
Hit Die:	D10	**Proficiencies:**	
Starting Equipment:		**Armor:**	All Armor & Shields
Leather or Chain Mail		**Weapons:**	Choose 6 Weapons
Buckler or Round Shield		**Tools:**	One Tool or Instrument
Two Martial Weapon		**Suggested Proficiencies**	
Two Simple Weapon		**Skills & Tools:**	**Saving Throws:**
Crossbow and (D10) Bolts or Two Hand Axes		Command	MIG
		Grit	GRA
Dungeoneer's Pack or Explorer's Pack		Healers Tools	TAC

Class Abilities:

- **Command**: Formal training has made you a fearsome foe and reliable ally. Each time your Trigger is activated you gain a Command die, maximum equal to your level, while you have them you will gain a Passive benefit, you can also spend them to use a different ability as an Interrupt.
    - Trigger:
        - When you fail to alter a maneuver.
    - Passive:
        - Lower the DC for Altering Maneuvers by twice your Command Dice.
    - Interrupt:
        - Spend any amount of Command dice to give an ally movement equal to Spent Dice x 10. Or you may spend Command Dice to have an ally Attack, roll the Dice and add it to the Attack roll.
- **Fighting Prowess**:
    - The time it takes for you to train/master a weapon is halved.
    - You can mark an enemy as a part of an attack against them.

    - You may take an additional attack or use an additional maneuver against your marked targets.
- **Martial Maneuvers**:
    - Warriors use Tact for their Maneuver modifier.
    - Warriors can prepare a number of Maneuvers equal to their Astuteness skill modifier.
    - At Level 1 you know 5 Maneuvers. Each time you Level up you can learn 3 additional Maneuvers.
    - Your Maneuver Save DC = 10 + proficiency modifier + TACT modifier.

Class Skill Challenges:

- Battle Intuition:
    - At every level you can attempt to better your Fighting abilities.
    - First make an **Astuteness** check, DC equal to 12 + level.
    - Next make an **Ingenuity** check, DC equal to 14 + level.
    - Lastly make **a Focus** check, DC equal to 16 + level.
    - If you fail during this process you can make a **TAC** saving throw, DC equal to (6 x stage) + Level, or take D8 per level Psychic Damage and can't attempt this again for a day. If you succeed you move onto the next stage.
    - Once you pass all the stages your abilities are improved. Gain proficiency in a new weapon or choose to master one you already have proficiency in. You may also mark an additional target.

Worshiper:

Worshiper Class Specs			
Hit Die:	D8	**Proficiencies:**	
Starting Equipment:		**Armor:**	Light, Medium, & Shields
Leather armor, Chain Shirt, or Scale Mail		**Weapons:**	Warhammers & 2 Weapons
		Tools:	None
Buckler or round shield		**Suggested Proficiencies**	
One martial weapon		**Skills & Tools:**	**Saving Throws:**
Two simple weapons		Command	WHI
Holy symbol		Grit	VIG
Explorer's pack		Healers Tools	CHA

Class Ability:

- **Faith**:
  - You may build up an amount of Momentum dice equal to your level, when you have them you will gain a benefit, you can also spend them to use another ability as an interrupt.
  - Trigger:
    - When an ally within your Divine Aura fails a Saving Throw or Skill Check.
  - Passive:
    - Allies within your divine aura gain temporary HP equal to twice your Faith Dice at the end of each of their turns.
  - Interrupt:
    - Roll as many Faith Dice as you want, heal a creature you can see by the amount rolled**.**
- **Divine Aura:**
  - You have an aura that extends 5 ft from you. Whenever magical healing takes place within that range you can increase the amount by 2D6.
- **Spell Casting**:
  - Worshippers use Whit for their spell casting modifier
  - Worshippers can prepare a number of spells equal to their Intuition modifier

    - At Level 1 you know 4 Tiered Spells and 2 Tier 0 Spells. Each time you Level up you can learn 2 additional Spells.
    - Your Spell Save DC = 10 + proficiency modifier + WHI

Class Skill Challenge:

- Ceremony of Faith:
    - Every time you level up, you can strengthen your bond with whatever your worship.
    - Make a **Compassion** check, DC equal to 10 + level.
    - Next make a **Intuition** check, DC equal to 13 + level.
    - Finally tighten the bond by making a **Ponder** skill check, DC equal to 16 + level.
    - If you fail during this process you must succeed a **WHI** saving throw, DC equal to (6 x Stage) + Level, or you suffer D6 per level radiant damage and cannot attempt again for a day. If you succeed you move to the next stage.
    - On a successful completion of the ceremony your Divine Aura increases by 5 feet and healing within that range increases by 1D6.

Quests:

- A Main Quest is something that the players work towards over a period of time
- They can be set by the GM or made up by the players
- Quest rewards are not always known (Unless it's something like gold, or an item that a NPC will give them in exchange, ultimately it's up to the GM to decide).

Quest Rewards:

Going on quests actively rewards the players, different quests will reap different rewards.

- **Abilities**: major boons that can change how a character is played or enhance current play style.
    - Abilities can almost be directly related to how powerful a character is
    - Avoid making abilities power-up with player level, but allow for characters to improve their abilities over time through different quests.
    - Typically what abilities you are given are determined by the GM or the adventure you are playing. GMs may allow players to choose whatever ability they want.
- **Followers/Reputation**: boons that can vary depending on who you won the favor of. Can be good or bad depending on what kind of followers you get and what kind of reputation you receive.
    - Sometimes reputation or followers may be gained as a reward for completing a quest.
    - Followers will see you as their leader and pledge their service to you. Their usefulness varies.
        - Not all followers will do exactly as you say, they might have their own agendas that they wish to accomplish.
    - Reputation means your relationship with a certain group of people (or monsters) deepens, you either gain their favor or their ire.
- **Items**: magic items. non magic items. These can greatly impact your character or be completely useless, all depending on your creativity.
- **Skills**: minor boons, usually handed out for completing side quests. Multiple options can be rewarded for skills:
    - Gain proficiency in a skill or tool
    - Gain a +# of skill points to a skill(s)
    - Gain a bonus in a skill while in certain areas or interacting with certain organizations
- **Maneuvers or Spells**:
    - Maneuvers or Spells can be given as a minor or major boon depending on the quest completed for it.
- **Stats**: Completing a quest can be a great challenge for your characters, so much so that they come out the other end noticeably stronger.
    - The GM should give out Stat Bonuses as rewards when they think it's appropriate, much like any reward for a quest.

- After every quest a player's character will gain more hp, this should be pretty standard for any main quest, but it's up to the GM's discretion.

Class	HP Gained
Berserker	5 + (Level)
Cultivator	4 + (Level)
Guardian	4 + (Level)
Hound	3 + (Level)
Jinx	3 + (Level)
Mage	2 + (Level)
Medium	3 + (Level)
Shaman	3 + (Level)
Tradesman	3 + (Level)
Traveler	4 + (Level)
Warrior	4 + (Level)
Worshipper	3 + (Level)

When completing quests it is very likely that you won't gain one of each reward, it's up to the GM. A GM should think of the appropriate boon for the quest the adventures completed. Boons can be chosen prior to a quest or rolled for randomly, GM are encouraged to consider changing the boon depending on how the players complete the quest.

- Due to this system it is easily feasible for characters at level 3 to be stronger than characters at level 5, depending on how quick they level up and how many quests they have completed. This is completely controlled by the GM.
- There is no real guideline about when to level your players up, it's all about the pacing you want to set for your campaign. Below is a chart designed to help decide when characters should level up.

	Number of Completed Quests		
Level	Fast	Medium	Slow
2	1	1	2
3	2	2	3

4	3	4	5
5	4	5	7
6	5	6	9
7	6	8	11
8	7	10	13
9	8	12	15
10	9	14	18

Encounters:

Encounters should be problems with no intended solution, like a good puzzle. The players need to decide if they should fight, talk, or run. There are a few, very few, situations where your characters might decide to run from a fight, they typically take the opposite option: they decide to fight when they really should run. It is always best to let your players know everything their characters would, so that they can make an informed decision on the matter. It is also important to let them make their own choices, even if it means the Level 1 party tries to fight the Lich during the first encounter.

This doesn't mean you should kill your players for getting excited about combat, after all it's a part of the game! You should instead change your perspective on the puzzle: it's no longer "Run from the Lich," it's now "Fight the, now risen, corpses of the innkeeper and his family." The lich probably doesn't have any interest in Level 1 characters, instead deciding to send a few undead to deal with them. Once the party has kicked enough undead ass, then the Lich might start to think of where they could hang a new Chandelier of Skulls.

If the Players run from an encounter that you thought they would fight, then it could change into a Skill Challenge where the players now must escape from their pursuers. The party must use their skills and knowledge of the area in order to escape their pursuers, or the reverse and now the players must catch up with a group of enemies that escaped. A fleeing Party might just get to run away, but now the villains know of them, and the villains know that the Party knows of them, so the villains will eventually come to sever any loose ends. Or the Villains might not care because they are about to complete the super dark and evil ritual that summons the Lich King Vran'gal, The Immortal Emperor.

<u>Roll for Initiative:</u>

Most encounters typically begin when the GM says ***Roll for Initiative***. This is a Skill Check that will determine when your character gets to go in the turn order.

- Some abilities give an additional boost to their initiative score, but for the majority of characters it's based on your **GRA modifier**.
- The first to go is the one who rolled the *highest* initiative.
- After everyone in initiative has gone, the order starts over again at the top.

<u>20s Matter</u>: *Optional*

An option rule for initiative where natural 20s matter a little more and are not "wasted".

- When you roll a natural 20 for your initiative you may take an additional action that turn.

<u>Grouped Turns</u>: *Optional*

An optional rule for initiative to allow players to take their turns in unison, with the enemies also going in unison per group of monsters.

- Players may elect one person to roll for initiative and add their GRA to the roll.
- Players may also all roll and find the median of their rolls for their initiative.
- Enemies always roll one die per monster group/type.

Taking Your Turn:

During your turn in combat you can use different types of Turn Options to use abilities and items that your character has.

- A character's turn takes around 6 seconds in game time, while a turn in real life might take 1-5 minutes (possibly more depending on the level of chaos.)

Each character has a number of **Major Acts** equal to their *proficiency* and each Major Act can be split into **two Minor Acts**. You can also choose to combine all of your Acts into a **Full Round Act**. Aside from their Acts, characters also have a **React** they may use inside or outside their turn.

Major Acts:

- **Ability**
  - Use an ability that requires one action.
- **Administer a potion**
  - Pour a potion down another creature's gullet.
- **Attack**
  - Make an attack against a creature within your weapon's range.
  - A character may only take the Attack Act once per turn.
- **Charge**
  - Move up to your speed to a creature in a straight line. To gain the benefits, one must move at least 10 ft. Once reaching the creature, you gain a **+D6** (per 10ft moved) to damage on your next attack this round.
  - If your charge is interrupted by another creature causing you to stop, you can either attack that target (if at least 10 feet of movement has been taken) or stop your charge.
  - You cannot retreat from an enemy before attempting to charge within the same turn.
- **Dash**
  - Gain full use of your movement again.
- **Disengage**
  - Exit the range of all enemies without provoking attacks of opportunity.
- **Dodge**
  - Expand your awareness so that you are more alert to your surroundings. Attacks and grapples have disadvantage against you, additionally any GRA saving throw is made with advantage.
- **Help**
  - Give an ally a bonus to any attack roll, skill check, or saving throw.
- **Maneuver or Spell**:
  - Use a Maneuver or Spell. A character may only use a Maneuver or Spell once per turn.
- **Skill Check**
  - Using one of your skills during combat.
- **Bag Mining**:
  - Interact with an object or item within your Stored Items.

Minor Acts:

- **Quick Action Ability**:
  - Any ability that dictates the use of your Quick Action
- **Potions and Oils**:
  - Drink a potion.
  - Oil a weapon or handful (10) of ammunition.
- **Pouch Searching**:
  - Interact with an item within one of your secondary item slots.
- **What is Around?:**
  - The character surveys the scene to spot anything that may be of use.
  - This doesn't always constitute a skill check, sometimes it's best just to give the player some new useful information about the battlefield or scene. If there is something for the player to interact with, then the GM can call for a skill check to see what happens.
  - *Examples:*
    - *Teg, the Bonedrunk Berserker, surveys the battlefield and sees a gap in their line of defense; he calls out to his troops to cover that gap. Teg makes a Command Skill Check and gets an 18, pretty solid, two of his Orc soldiers cover the hole in their defenses.*
    - *Quizbin the Treasure Mage, cowers, no, strategically hides in the corner as Shade Wraiths strip his party of their shadows. As he looks over the ancient slabs he spots a slightly dusty mirror that he had seen earlier when they had entered the room. Quizbin, very bravely, wipes off the dust causing the sun to reflect off of it. The Wraiths are vanquished in the light of the mirror.*
  - Obviously the two scenarios in the examples are very different from each other, and also carry a different narrative sense. It would not have been satisfying for the battle to have ended when Teg called out to his allies to cover the gap, it also would not have made sense. Quizbin saving his party from near annihilation from a Shade Wrath by utilizing something that had been set in the room from the beginning fits in line with the theming, maybe a less merciful GM would only have the mirror deal damage instead of destroying the Wraiths.
- **Move your speed**
  - Move up to your current speed (you don't have to spend it all in one go).
  - You can move in-between your other Combat Options, but not during them.
  - While moving your speed you may also do any of the below as a part of the Minor Act:
  - **Shift**
    - Spend half your movement to move 5 ft away from a hostile creature without provoking attacks of opportunity.
  - **Getting up**
    - Spend half your movement to stand up from being prone.
  - **Mounting**
    - Mounting a creature takes half your movement.

- **Dismounting**
    - 5 ft of movement.

Free Action:

A free action is something that does not constitute the use of one of your Acts or React.

- **Object Interaction**
    - Interact with an object on the battlefield (that is not being worn or carried) or in your main item slots.

Full Round Act:

Some abilities require a full round to use, this is called a Full Round Act. During this time you may not use any other type of action, quick action, or movement unless the ability specifically states so.

- **Strategic Delay**
    - In combat you can choose to hold your entire turn, not just your action. You can delay your turn until the start of your next turn (you do not get two turns in a row) or go directly after someone else's turn. This shifts your initiative order to that point for the rest of combat unless you choose to hold it again.
- **Coup De Grace**
    - You can use a weapon attack to deliver a coup de grace to an incapacitated creature.
    - You automatically hit and score a critical hit. If the defender survives the damage, they must make a **VIG** saving throw, DC 5 + damage dealt, or gain the dying condition.
- **Sprint**
    - Move 5 times your movement.
- **Prepare**
    - On your turn you can set a trigger to plan a certain Act to use as a Reaction. If nothing triggers your prepared action, then it is wasted. (Maneuvers or Spells that did not trigger do not invoke their die and any ability with limited uses are not expended.)

React:

A reaction allows you to act outside of your turn. You may only use a React once per round, and only when something happens that would trigger your reaction. You are acting after something else happens, like someone attempting to run away, not disengaging, and you getting to attack them.

- **Attacks of Opportunity**
    - Leaving a creature's threatened range.
    - Any Ability that allows someone to take an Attack of Opportunity.
    - Weapons with the thrown property have advantage provided the attacker is already holding it.
- **Ability**
    - One that provides a reaction, typically with a specific trigger.

Attack Rolls:

As an action on your turn, you can select an enemy within range of your weapon or spell and make an attack against them.

- roll a **D20** and add your ability modifier to it; if you are trained in the weapon you are using or casting a spell then add your proficiency bonus.
- to know if you succeeded in an attack roll you must meet or beat your targets AC.
- Unarmed strikes deal your **MIG** bludgeoning damage (min. 1)
- Unarmed slaps deal non-lethal **GRA** bludgeoning damage (min. 1)

Critical Rolls:

- Natural 20s count as an auto success for attack rolls, also known as a “crit”
    - When you “crit” you may roll double the damage dice as you usually would roll. Modifiers only get added onto the attack once.
    - Another way to “crit” is when you roll exceptionally well on an attack roll and score 10+ over the target's AC.
- Natural 1s count as an auto failure for attack rolls, also known as a “nat 1”
    - These attacks will always miss, no amount of modifiers can change that. However, if you have an ability to reroll that 1, or to roll with advantage, then the outcome may be changed.

Positioning:

Cover:

- Your position on the battlefield can grant you certain bonuses.
- Hiding behind terrain can grant you a bonus to your ac.
    - 1/2 cover **+2** to AC and **GRA** saving throws.
    - 3/4 cover **+4** to AC and **GRA** saving throws.
    - Full Cover: cannot be targeted by an attack.

High Ground:

- Shooting an enemy from high ground will give you a clearer shot, granting you a bonus to your attack.
    - When you are at least 15 ft higher than your target you add **+2** to your ranged attacks.
- If you jump and attack a target, they suffer an additional D6 damage for every 10 feet you fall. However, you take a **-1** to hit per 10 feet fallen.

Morale: (Optional)

This rule typically only applies to enemy characters, however it can also apply to troops or other NPC non-combatants.

- Each creature has a Morale bonus equal to their number of Hit Dice.
- A Morale check’s DC is equal to the severity of the action that caused the check, often set by the GM.
    - If a creature fails their Morale check then they flee the battlefield at any cost.

When to Roll for Morale:

- Boss or General type figure goes down
- Half or more of their side is defeated

- An effect is used to shake a groups Morale
- Someone does something really badass.

Damage Types:

Air	Water	Earth	Fire
Lightning	Ice	Marsh	Glass
Ash	Blood	Wood	Metal
Radiant	Necrotic	Psychic	Force
Light	Shadow		
Slashing	Bludegoning	Piercing	

- Siege
    - A subtype of damage, deals double damage to constructs, terrain, and other items/objects.

Damage Resistance, Immunity, and Vulnerability:

- Resistance: You take half the amount of damage from certain affinity types or non-magical attacks.
- Immune: You take no damage from certain aunt toes or non-magical attacks.
- Vulnerability: You take twice the amount of damage from certain affinity types.

Exploration:

Exploration can be a thrilling part of Adventuring; meeting the wildlife that surrounds the area your character has called home, fighting with daring bandits, or even finding unclaimed treasure. These are all things that could take place when traversing the wilds of your World.

However, it is to be said that Exploration can sometimes become bogged down with rules and rolls. If the characters are a high enough level, or the journey not very treacherous, then the following rules can be ignored.

- Each GM should decide if the party should make these checks. If you find that the traveling takes away from the main adventure then you should probably ignore the rules or change them so they are not used as frequently.
- Perhaps you only roll the initial Job check once for the entire journey, then the rest of the time is determining the encounters you might come across.
- Some adventures can skip the traveling all together, the GM narrating what the players might have overcome to arrive at their destination.

Traveling Rules:

Each job is responsible for different things while the party journeys. If there are not enough party members for the jobs then the party can drop that job entirely and suffer the consequences, or someone can gain a level of exhaustion for each additional job they take on.

- Each Stretch consists of a Day, during which each player makes a Skill Check VS the Environments DC, determined by the GM.
    - On a success, the party is able successfully do their job, gaining a small boon for the party.
    - On a failure, a penalty is given to the party relating to their job, the encounter die decrements by 1.
- Players without a job can give their ally's the Help Action.
- Any job that goes undone will cause the Encounter Die to automatically decrement by 1.
    - A GM can decide if a job doesn't apply or wouldn't have an effect on the party to allow the players to skip it with no consequences.

Jobs:

Pathfinder		***Watcher***	
Jobs:	**Skill Check:**	**Jobs:**	**Skill Check:**
Navigate the terrain	Astuteness	Keep watch on surroundings	Intuition
Uses the map or tool	Ponder	Alert the party of danger	Focus
On a Success:		**On a Success:**	
The party moves as expected.		Avoid an encounter	
On a Failure:		**On a Failure:**	
Party moves in random direction (Roll a D8 for direction.)		If the environment has any dangerous terrain, the party must now find their way through it.	

Advancer		***Hunter***	
Jobs:	**Skill Check:**	**Jobs:**	**Skill Check:**
Scout ahead	Nimbleness	Finding Shelter and Food	Command
Report on anything around	Face	Taking care of animals	Grit
On a Success:		**On a Success:**	
Gain Surprise round on your next encounter		Restore 1 Hit die or remove a level of exhaustion	
On a Failure:		**On a Failure:**	
Next encounter, enemies gain a surprise round		Party Members regain 1 less hit die.	

Traveling Encounters:

Depending on how difficult the journey, there will be different encounters that the players may come across.

After all players have rolled their Traveling skill checks, one of them must roll the Encounter Die to determine if there is an Encounter.

- The Encounter Die starts at a D12, with each Traveling Skill Check failure decrementing the Encounter Die by 1 size (D12->D10->D8->D6->D4.)
- If the Encounter Die rolls a 1, then an encounter ensues.

D6:

The type of encounter is determined by a D6 rolled by the GM. That way players will not anticipate the encounter after seeing the roll. Or the GM can prepare in advance, or prepare one of each kind. If they feel so motivated.

1. Landmark:
    - Encounter a landmark within the wilds. Could be used as a resting point or made into a den for the nearby creatures.
2. Structure:
    - Some buildings or ruins. Could be in disrepair or still in use.
3. Combat:
    - Encounter a monster or group of enemies who must be fought or fled.
4. Roleplay:
    - Encounter an NPC or group of NPCs who can be interacted with.
5. Beast:
    - Find some rare game to hunt down for dinner. Could evolve into combat depending on the situation or type of beast. May give some materials.
6. Monster:
    - Instead of a tasty deer you find a monster that thinks you're the tasty one. May give some materials.

Traveling DC

The difficulty will be determined by the terrain they are traversing. Some areas are more dangerous than others, either the terrain itself or what dwells within.

- The players determine what direction they want to travel in, either by map, spell, or just by landmarks they can see. They roll checks determined by their traveling rolls, attempting to beat the DC of the terrain.
- Terrain difficulty should be decided by the DM while the players should come up with how they are deciding to traverse the terrain.

Difficulties:

- 5-10: Just beyond that hill.
    - An easy journey fit for beginners and novices.
- 10-15: Through the Woods.
    - A journey that takes some effort but it's more scary than dangerous.
- 15-20: Over the Mountains.
    - A weathering and maybe even life changing journey.
- 20-25: Through the Lands.
    - A long journey not fit for the weak.
- 26-30: Across the Seas.
    - We might lose some people.
- 35+: To Hell and back.
    - I just want to go home.

Combat or Roleplay: Optional

An optional rule for traveling and exploration that gives the players the options of choosing between Combat encounters or Roleplaying out their traveling experience.

- When Exploration begins you may ask your party to choose if they encounter a Combat or if they would like to roleplay what happens during this length of the journey. The GM may ask this a few times during the journey to allow the players multiple options.
    - Sometimes players want to skip to the next part of the adventure, cutting out anything that might just feel like filler fights.
    - Other times players just got some new weapons and items and they need a volunteer to step up to be their punching bag.
- These rules may be used with or in place of the standard rules shown above.
    - If used with then you can ask them after each round of skill checks which option they would like instead of rolling the encounter dice.
    - If used in place of them, no skill checks or encounter dice are rolled and the GM asks the players this a number of times that feels appropriate for the length of the journey. The GM may also ask it only once if they choose.

Falling:

Humanoid Creatures falling can take massive amounts of damage depending on how far and fast they fall.

Free Fall:

- Humanoid Creatures in free fall move 500ft. per round in whatever direction is 'Down'.
    - Increase in 500ft. each round until terminal velocity is hit.
- Humanoid Creatures reach terminal velocity at 1,000ft per round.

Falling Damage:

- Creatures take 1D6 of Force damage per 10ft. they fall, up to 500D6

- Falling in water halves the amount of fall damage a creature takes.
- Falling on a surface harder than dirt or cobble doubles the amount of damage a creature takes.

Dungeons:

- Dungeon Turns (Torch?)
    - 10 in-game minutes
- Player Actions:
    - Searching
    - Taking Caution
    - Casting spell
    - Keeping watch
    - Loot the room
    - Sneaking Around
    - Helping

Roleplay:

Backgrounds:

Backgrounds are used for giving your character abilities or skills that correspond with their life story, not the class or lineage they chose.
Backgrounds are meant to help embellish a character to make them feel more robust within the game. They are designed to provide two things for your character's story: Who You Were and Your Motivation. The last part of your character, Who You Are, is determined by the player.

- Who You Were describes your character before they had become an adventurer. It provides a foundation on which to build your character's life story, as well as providing strings that the GM may pull on should they desire.
- Your Motivation describes what pushes your character to continue striving the path of life and death, the path of an adventurer. It gives your character more depth and provides insight onto the third step.
- Who You Are is not provided within the Background creation, it is something that is entirely determined by the player as they see fit. Who You Were and Your Motivation should feel like previous steps along your path, leading you to Who You Are.

Background Mechanics and Roleplay:
Backgrounds each provide a small ability, that the character had learned during sometime in their past, as well as skill points that reflect the progression or previous life of the character. Besides that, character Backgrounds provide only as much mechanical benefit as the player leans into it and the GM allows. A player who fleshes out their background into a story of their character's past may find themselves gaining certain advantages when those backstory elements become relevant to the story.

- IE: A GM may provide a bonus or flat advantage when a player who belongs, or once belonged, to an organization is dealing with them.

Backgrounds may also lead players to suffer disadvantages, should the player and GM deem it appropriate.

- IE: The villain who killed your father, and thus the one who sent you on a conquest of vengeance, now stands before you. Should a player have decided that their character is wary or scared of this villain they may suffer a bane or disadvantage until they can overcome their fears.

<u>Who You Were:</u>
This helps a player decide what their character was doing before taking up blade and book to slay monsters and save lives. These are loose ideas that should be changed to better align with what the player expects from their character’s story. Make sure to create a story that interests you and the GM, and always be sure to create a backstory that will have a progressive impact on the campaign and setting.

- Who You Were provides a small ability that either grants a bonus or provides a tool proficiency.

- Any other bonuses must be created and agreed upon by the GM and player. GM's are encouraged to reward players who lean into their backstory with bonuses and advantages that pertain to the story of the campaign.
- A character may have had a long life prior to becoming an adventurer, causing them to have developed more abilities and skills. If the GM allows you may choose more than one option for Who You Were.

Acolyte:
- Description: A member of an official religious organization, typically belonging to one of the Circle of Ten.
- Holy man:
    - You gain advantage on checks when interacting with a priest of your religion.

Advisor:
- Description: You have spent time at the side of someone in power, though you never have taken the spotlight many of your ideas have made their way to the front where they may shine. You have a way with words that are backed by your years of advice.
- Keen Advice:
    - You gain advantage on checks when giving advice to those in power.

Attorney:
- Description: An official of some local government or institution. You practice law to help your clients in court, or whatever equivalent you have to it.
- Rules Lawyer:
    - You gain advantage on checks made when interacting with authority figures about matters of law.

Apprentice:
- Description: You study under a local Mage who has decided to nurture whatever skills you have.
- Novice:
    - Choose a Tier Zero and 1st Tier spell of the same school. You can cast the 1st tier spell once per day.

Brewer:
- Description: You make drinks or other tonics through brewing. Perhaps you even had a prosperous brewery or a famous signature drink.
- Bubbling Brew:
    - You can fix up a mean brew, gain proficiency in Brewing Tools.

Bouncer:
- Description: You are the guard to some club or establishment. Either your broad frame, mean scowl, intimidating aura, or some combination keeps people in line.
- Built Body:
    - You've been in your fair share of fights, you have proficiency in Unarmed Attacks.

Boatman:
- Description: You worked on a boat for most of your life. Though you never worked your way up to captain, you've seen your fair share of your local waterways.
- Sea Legs:

        - You have advantage against being knocked prone.

Counselor:

- Description: You have spent your life as a mediator, someone who guides others. During that time you have picked up a knack for reading others.
- Life Advice:
    - You gain advantage on Intuition checks made against those you have spent at least 5 minutes talking to.

Craftsman:

- Description: You have picked up some professional craft, either through a mentorship or being passed down from a family member.
- Crafty:
    - Gain proficiency in one tool of your choice.

Entertainer:

- Description: You are a natural performer, able to draw an audience in using stories, music, dance, or some other form of entertainment.
- Natural Charm:
    - Your entertainment, good or bad, is able to draw a crowd's attention.

Guardsman:

- Description: Hardened by years of training, you have been prepared to protect those unable to do so themselves. You were once a part of some formal body of guards, now turned adventurer.
- Formal Training:
    - You gain proficiency in one martial weapon and light armor.

Hiker:

- Description: You are adept at traveling within hills and mountains. A starry sky is all you need over your head when you fall asleep.
- Path Sense:
    - You are not able to get lost while traversing an area you have been to before.

Iron Worker:

- Description: Banging hot metal into shape takes time, accuracy, and great patients. You’re used to hard and dirty work.
- Forged:
    - Gain proficiency with Blacksmithing Tools.

Middle Man:

- Description: You are the guy. Or at least that’s what you tell your clients, really you’re just the guy who knows the real guy.
- I Know A Guy:
    - You are in the know, you seem to have a connection for almost anything (within reason). Some of these connections like you, others really do not.

Money Made:

- Description: You’ve never had to work for gold in your whole life, being handed down anything you could want from your family.
- Gold Lined:

        - Gain an additional 600GP for each level you have at the beginning of the campaign.

Nature Guide:

- Description: Growing up you have always loved the outdoors, so it makes sense that you act as though they are your backyard.
- Nature Knowledge:
    - You may gain advantage when attempting to identify a wild plant or animal.

Spirit Whisperer:

- Description: You see dead people. Their wandering souls will often tell you the secrets of the dead, if only they had something better to say than the secret to their cake recipe.
- Soul Seer:
    - You can see creatures who are on the ethereal plane.

Secretary:

- Description: You have a knack for paperwork and thorough organization. Something about the process calms you, or sends you into a fit of rage when you can't find a lost file.
- Perfectly Organized:
    - Your bags are supremely organized, you always know when an item is missing.

Street Rat:

- Description: You've lived on the streets for as long as you can remember. Getting by was never easy, but you know all the tricks.
- Street Smarts:
    - You can traverse urban environments with ease, as well as avoid the patrol of any urban guard.

Weaver:

- Description: You enjoy weaving reeds, yarn, and other mediums together to make wonderful, and functional, creations.
- Silk Smooth:
    - You gain proficiency with Sewing Tools.

<u>Your Motivation:</u>

This helps a player understand what their character is motivated by. It may even help them decide on certain courses of actions when playing the game, what does your character seek to accomplish. Motivation is different from a goal, the thing that pushes your character forward is not what they are striving towards.

- Players that achieve their goal, whatever that may be, may find their character's motivation come to an end. They could choose to create a new goal for their character, or retire them and play as a new one.
- Motivations are not the same as a goal, those who seek power to right a wrong or find lost knowledge may wish to continue adventuring even after they accomplish said goal. They are always seeking more, wishing to go further.
- Each Motivation gives a number of ranks to certain skills equal to the starting level of the campaign.

- The Reason, Enemy, Goals, and Skill Ranks are all suggestions for your character. The real reason for them is to inspire you in making your character's backstory. Should you wish to change anything make sure to get your GM's approval.

Child of Prophecy:

- Reason: As a young child you were deemed the one of prophecy. You now seek to fulfill your purpose and bring honor to your people.
- Enemy: The one said to try to stop you in the prophecy or the one you are destined to defeat.
- Goals: Fulfill the prophecy, discover what the prophecy is for, or choose to forsake your prophecy.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Nimbleness or Persistence

Control:

- Reason: Lacking any control in their life up until recently, constantly repressed due to those above them and factors outside of their control.
- Enemy: Others in places of power or those that seek control over them.
- Goals: Become the leader of a large group, preferably a commune, town, city, or even kingdom.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Intuition or Astuteness

Destined for Greatness:

- Reason: You know that you're destined for greatness, everyone has told you so. Now you will prove it to them, or die trying.
- Enemy: Those who threaten you with dishonor or attempt to bring you to ruin.
- Goals: Make a name for yourself, become the greatest version of yourself, be the one that everyone always knew you to be.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Command or Intuition

Entertainment:

- Reason: You do this for fun, it's more of a hobby than a job to you.
- Enemy: Anyone who tries to take away your fun.
- Goals: Always find a way to have a good time.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Zest or Passion

Escaping Death:

- Reason: You wish to escape the inconvenience of death, seeking to always live for another day.
- Enemy: Death itself, and anyone who wishes to push you into its cold embrace.
- Goals: Conqueror death and live forever.

- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Flexibility or Ingenuity

Exile:

- Reason: You have been outcast from your home. Forced to move, your life has been upended causing many problems for you.
- Enemy: Those who exiled you, or those who caused your exile.
- Goals: Regain your status, kill those who exiled you, or create a new life.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Astuteness or Grit

Forgetting the Past:

- Reason: You wish to forget your past, and the ones that brought you to where you are now. You wish to start with a clean slate, one that won't end up so messy.
- Enemy: Those from your past that want to bring you harm or those who are trying to pry into your past.
- Goals: Cut ties with your past life, kill all those in your past life that wish to bring you harm or already harmed you, or make an entirely new identity.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Endure or Ponder

For Freedom:

- Reason: You wish to be free, by any means.
- Enemy:Those who wish to keep you locked up or those who threaten freedom.
- Goals: Gain your freedom, secure your freedom, or spread your freedom.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Compassion or Finesse

Following the Family:

- Reason: Your parents were adventurers, your grandparents were adventurers, your ancestor was a hero whose name is still spoken today. Their blood runs in your veins, and it's weight is heavy on your heart.
- Enemy: Perhaps your family has some great nemesis that was defeated years ago only to resurface and threaten the world once more.
- Goals: Follow in your bloodlines footsteps, complete any workings left undone by them so that your families legacy can continue.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Focus or Persistence

I Want It All:

- Reason: You wish to have it all: fame, money, and power. Anything you desire, you will do anything to obtain.
- Enemy: Those who seek to horde or steal what belongs to you, it was never theirs to begin with.

- Goals: Steal, plunder, and horde all that you want.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Finesse or Nimbleness

If I Don't, Who Will?:

- Reason: You have a mission, one that others do not want to do or think is impossible. If you don't take it into your own hands to fix, then who will?
- Enemy: Those who you seek to bring down or anyone who stands in the way of your goal.
- Goals: Kill monsters so others don't have to, uphold a ritual that brings great sacrifice, or destroy an oppressive leadership.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Power or Passion

Justice:

- Reason: You see the world as a broken husk of its true potential. No matter where you go there lies corruption and darkness. You will be a beacon of light within the night.
- Enemy: Those who wish to corrupt and bring the world to ruin. Anyone who uses power to bully the weak.
- Goals: Bring forth a new age of light, hope, and heroes.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Face or Valor

Killer Curiosity:

- Reason: Your curiosity will get you killed someday, but the satisfaction always brings you back.
- Enemy: Anyone who does not let you explore your curious nature.
- Goals: Learn, observe, experience, and enjoy exploring the unknown.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Skill or Skill

Lost Connections:

- Reason: You seek to rekindle some lost connection(s). Wherever they are, you will find them. You must.
- Enemy: Those who wish to bring harm to you or your lost connection(s)
- Goals: Rekindle old friendships and bring and end to old enemies, or find someone you knew who went missing.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Compassion or Face

My God, is an Awesome God:

- Reason: You wish to spread the word of your god or other patron. Their word means the highest to you, and the world shall soon agree.
- Enemy: Anyone who hates your God/Patron.

- Goals: Spread the word of your God to all and create the greatest church this world has ever known.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Command or Compassion

My Master:

- Reason: Your master, teacher, or some other being who instructs you has gone missing. You seek to find where they have went, and who might have taken them.
- Enemy: Anyone who harbors ill will towards you and your master.
- Goals: Find your master, kill those you killed your master, carry on your masters legacy, or sever any connections you once had to your master.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Ingenuity or Focus

Oath Taker:

- Reason: An oath sworn by thee shall not be broken lightly. Upholding this oath is something you hold above all else.
- Enemy: Those who your oath directs you to confront, those who seek to break your oath, those who wish to see you break your oath, and those who have ill will towards you and your oath.
- Goals: Uphold your oath, strike down those who go against your oath, or spread your oath.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Valor or Persistence

Protector:

- Reason: You wish to protect the weak, become a shield for those who cannot shield themselves. You are the guardian of the meek, and no harm shall come to those under your ward.
- Enemy: Those who pick on the weak, those you threaten your charge, or anyone who acts against the interests of your charge.
- Goals: Ensure that whoever you protect can safely accomplish their own goals or keep any number of creatures, like a religious order or some other group of people, safe.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Endure or Astuteness

Thrill Seeker:

- Reason: Who needs coffee in the morning when dodging a dagger to your eye is so much more invigorating. You seek adventure, fun, and most importantly: danger.
- Enemy: Anything boring or overly mundane.
- Goals: To battle to your heart's content, live through seemingly impossible situations, and feel your body buzz with adrenaline.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Zest or Grit

Vengeance:

- Reason: Someone has taken the things dearest to you, now you want them to feel the same way you do.
- Enemy: The one who took everything from you.
- Goals: Kill your sworn enemy and make them feel the pain and loss you feel for those who are no longer with you.
- Skill Ranks: Choose a skill to gain a number of ranks equal to your starting level (min. 1):
    - Power or Grit

Higher Level Backgrounds:

These Backgrounds are designed for much higher level play, or a certain style of campaign. Each Background comes with a few abilities as well as skill points, these are more powerful than the abilities found in Who You Were, and the skill ranks go to multiple skills not just one like above in Your Motivation.

- These can be used for campaigns starting at a higher level than most, I would say at least Level 6, if not even higher.

Crownless King:

Downtime:

Downtime is when a party spends time within one area for an extended period of time, typically at least a week but can extend up to years if wanted. During downtime players can do whatever they want, or need, to get done for future endeavors.

Tasks:

Within a week, characters may choose to do 1 Major Task or 3 Minor Tasks.

- Hirelings may each be given 1 Minor Task to accomplish on their own time, allowing the character to focus on other matters.
- 3 Hirelings may spend their time working on a Major Task together.

Major Tasks:

Major Tasks, while time consuming, are incredibly beneficial to a character or the party. It includes Class Skill Challenges, Magic Item Creation, Forming a Guild, Power Training, and other activities.

Power Training: (Optional)

This is an optional rule set made to improve the stats of your players. It is recommended that you remove the stat increases from the level up chart.

Players can power train their characters stats during downtime. Each level of power training has its own DC you must beat before you gain the benefits.

- After completing a level of power training you gain a +1 to whichever stat you were training.

Stat Score	1-12	13-14	15-16	17-18	19-20
DC	10	15	20	25	30

Training different stat scores requires different styles of training. Below are some examples of different types of training your character can use to increase their stat scores.

Might:

- Weight Lifting
- Swimming
- Hard labor

Grace:

- Reaction training
- Sprint running
- Balancing books on your head

Tact:

- Memory training
- Basic information gathering
- Reading and learning

Whit:

- Learning how to use what you know
- Learning about the world
- Expanding your perception

Vigor:

- Long distance running
- Poison resistance (heavy drinking)

Charm:

- Talking with people
- Making new friends

Skill Training:

- Class Skill Challenge:
    -
- Skill Ranks:

Workshop:

- Working on projects that would typically take a few days of work
- Workshop Point system?
    - roll a die and gain an equal amount of points to spend on a project?
    - Roll a die for each week of downtime

Minor Tasks:

Minor Tasks are quick activities your character can accomplish that typically do not give a huge benefit, but can provide a fun roleplay experience. Some examples would include Shopping, Sightseeing, Gambling, or some other minor activity.

Auction House:

glorious magic items
selling unwanted (garbage) magic items
competing with nobles

- benefits and drawbacks

Shopping:

- glorious magic items
- prepping for the next adventure
- Auction House

Sightseeing:

- Scout for information within the city or area you are staying

Stealing:

- take all that shines and glimmers from the wealthiest of nobles

Gambling:

Golden Dragon:

- First roll 2D6 and add them together.
    - Win if you get a 2 or a 12
    - Lose if you get a 7 or 11
- If you don't win or lose, you can double your previous bet and roll 1D6 to add or subtract to your previous total to try to hit 2 or 12 again.
    - If you go over 12 or under 2 you lose.

Red Snake:

- Roll 4d6, keep them hidden. Pick one out of the 4 that you don't want to use and reveal that dice on the table in front of you. Everyone does this.
- Everyone then reveals another of their dice (this die is still added to your total), however the player who put forth the highest number die gets to keep all of theirs hidden.
    - If a tie occurs then no players get to keep their dice hidden.
- Betting starts, poker style (1 round) with the person who put out the highest dice and progressing clockwise.
- Once bets are settled, reveal the 3 hidden dice. The person with the highest total wins.
    - If a tie occurs they split the pot.

Guilds:

Joining a Guild:

- gives support to the party while causing them to be tied to an organization.

Creating a Guild:

- reserved for higher levels

Random Encounters:

- GM plot device
- Nobles flaunting
- rat catching

Lifestyle: Optional

During downtime a player can decide how to live while within the city, this determines the type of lifestyle they live that may provide certain benefits. A player must pay the lifestyle expense at the beginning of every week during downtime.

- they are free to change lifestyles when switching weeks
- If you wish to switch lifestyles after paying you must pay the full amount it would cost for your new lifestyle.

- After paying for your lifestyle make the appropriate rolls for your character (thievery, disease, etc).
    - If you get a disease you can roll on the Disease table to see what ales you

Characters need not spend the actual money shown below, if they are granted a place to stay of equal status then they can receive the same benefits at the GM's discretion.

- Players and GM's can feel free to flavor the bonuses to rolls as something else rather than staying at a nice place, like a Traveler getting ready to venture out into the wilds or a Berserker buying expensive meats to fuel their growing body.

Wretched:

- 0 gp
- Slums, streets
    - Living in these conditions during your downtime causes your characters well being to decrease
    - -10 on all Charm checks to interact with town guard, merchants, or other authority
    - -5 on all Charm checks interacting with towns folk
    - -1D8 on any main class ability skill check made during this downtime.
    - After your downtime is over your max hp drops by 1D4, this cannot be undone and wears off after a number of days equal to double the number of weeks you spent during downtime.
- Cutthroat
    - 50% chance to have gear stolen (encounter/ unattended goods)
- Putrid
    - 60% chance to contract a disease
- Starved
    - You are not provided meals and must source your own food.
- Elements
    - Due to your “living” conditions you must face whatever natural elements are in the area, sometimes it’s clear skies other times it’s a snowstorm in the middle of winter.
- No class

Squalid

- 5 sp
- Stables, broken down shack
    - Staying in these conditions is not ideal for any adventurer.
    - -5 on any Charm interaction with towns guard, merchants, or any other authority figure.
    - -1D6 on any main class ability skill check.
    - After downtime, your max hp drops by 1D4 for a number of days equal to the number of weeks spent during downtime.
- Dangerous
    - 25% chance to have gear stolen (encounter/ unattended)
- Diseased

30% chance to contract a disease.
- Hunger
    - At best you are provided scraps or other food.
- Low class

Poor
- 1 gp
- Poor tavern, stable, barn
    - Although it may smell, it's better than the streets.
    - -3 on any Charm skill check to interact with a town guard, merchant, or any other authority figure.
    - -1D4 on a main class ability skill check.
- Violent
    - 10% chance to have gear stolen
- Sickly
    - 15% chance to contract a disease.
- Low class

Modest
- 5 gp
- Tavern, temple, inn, house
    - No penalties to checks
- Rambunctious
    - 5% chance to have gear stolen
- Dirty
    - 5% chance to contract a disease.
- Lower middle class

Comfortable
- 10 gp
- Small cottage, private room at inn
    - +3 on any Charm skill check to interact with a town guard, merchant, or any other authority figure.
    - +1D4 on a main class ability skill check.
- Bold
    - 1% chance to have gear stolen
- Stale Air
    - 1% chance to contract a disease.
- Middle class

Wealthy
- 50 gp
- Fine lodgings or a comfortable suite at an inn
    - +5 on any Charm interaction with towns guard, merchants, or any other authority figure.
    - +1D6 on any main class ability skill check.
    - After downtime your max hp increases by 1D4 for a number of days equal to the number of weeks spent during downtime.

        - One servant boy
    - Upper middle class

Royalty

- 200 or more gp
- Town house, lakeside cottage, finest room in the inn
    - +10 on all Charm checks to interact with town guard, merchants, or other authority
    - +5 on all Charm checks interacting with towns folk
    - +1D8 on any main class ability skill check made during this downtime.
    - After your downtime is over your max hp increases by 1D4, this cannot be undone and wears off after a number of days equal to double the number of weeks you spent during downtime.
    - A handful of servants
    - Personal tailor
- Charismatic Coin
    - Due to your accommodations you may be invited to certain banquets and events in the general area. Maybe the king will want to see you.
    - Everyone, who is anyone, in the area knows where you're staying for your duration.
- Upper class

Towers, Palaces, and Organizations:

- Fortresses that players can build to improve their characters abilities or gain access to new ones.
- different rooms give different benefits to checks and rolls during downtime.
- Sometimes they speed up processes like learning new weapons or spells.
    - Rooms have different levels of "quality" ranging from copper to obsidian (follows the same levels as enchantments)
    - The better the room the more gold must be spent, or more exotic materials must be found for its construction.
- some buildings/rooms must be built in certain locations or biomes
    - ie an observatory must be made on the second level or higher
- Should be a symbol of power and a milestone for the character's growth.
    - maybe limit them so only level 5-6 characters can begin to make them.

Reputation:

- Prestige
- Notoriety
- 10 total levels for both
    - 1st level: people within your town/city know of you
    - 2nd level: people within your city know who you are and what you're known for.
    - 3rd level: Other towns and cities have heard of you

- 4th level: Other towns and cities know who you are and what you do
- 5th level: The kingdom, or general region, knows of you
- 6th level: the kingdom, or general region, knows who you are and what you've done
- 7th level: The Continent knows of you and what you have done.
- 8th: Your name and deeds have been talked about across multiple continents.
- 9th: The World knows of you and stories will be passed down for generations.
- 10th: The World and Higher Powers know of you and what you have done. Your tale will be passed down through generations, becoming legend.

Resting:

Short Rests:

During a day's journey one might find themselves a bit tired.

- A short rest takes 15 minutes, you can spend that time to recover up to half your Max HP.
    - You may take another 5 minutes per spent Hit Die to exceed half your Max HP.
- Once per short rest a player may also make a **Endure** check equal to 10 + (Levels of exhaustion they wish to ignore) to temporarily ignore the effects of those levels of exhaustion for a number of hours equal to how much you exceeded the DC by.

Hit Dice:
You have an amount of Hit Dice equal to your level. During a short or long rest you may spend hit dice to do one of the following effects:

- Regain HP equal to (roll hit die) + **VIG**.
- Expend a Hit Die to remove a level of Exhaustion.
- Increment your Martial or Spell die.

Long Rests:

Long rests involve your character resting for a total of 8 hours, at least 6 of which must be spent sleeping, the remaining two may be used to do light work.

- Regain all hp, spell slots, abilities, and spent hit dice.
- Remove levels of exhaustion equal to your **VIG.**
- You can only gain the benefits of a long rest once every 24 hours.

In the Wild:
An adventurer can only gain the full benefits of a long rest if they are in a safe area (ie. village, town, city, outpost, or hamlet).
if a long rest is taken within an unsafe area this is what the adventurer will get back:

- Regain ½ total hit dice
- Regain hit points equal to level + **VIG** + half max hp (+ any hit dice they would like to spend).
- Increment your Martial or Spell die a number of times equal to your Proficiency modifier, plus an additional time for each Hit Die spent.
- can roll a VIG save (10 + levels of exhaustion) to get rid of one level of exhaustion.

Resting in Armor:

A character may choose to sleep in their armor during a long rest. When they do so there will be restrictions on how much rest they gain.

Light Armor:

- You must succeed on a DC 10 Persistence check or suffer:
    - -1 hit die regained
    - -3 passive perception and investigation until you take a short or long rest.

Medium Armor:

- Can make a VIG saving throw, DC equal to 15 + (levels of exhaustion), to get rid of a level of exhaustion.
- You must succeed on a DC 14 Persistence check or suffer:
    - 1/4 spent hit dice regained.
    - -5 passive perception and investigation until you take a short or long rest.

Heavy Armor:

- Roll a VIG saving throw, DC equal to 20 + (levels of exhaustion), to get rid of a level of exhaustion.
- You must succeed on a DC 18 Persistence check or suffer:
    - 1/4 hit die regained.
    - -10 passive perception and investigation until you take a short or long rest.
    - Suffer a level of exhaustion

Sleep and Madness:

- If a pc goes more than 3 days without sleep they have a chance of going mad. They must make a Whit saving throw with the DC equal to 15 + number of days without sleep + levels of exhaustion.
- Roll on the madness chart to determine the type of insanity:

- the character never wants to sleep again or can't find themselves being able to sleep. They instead dream during the day. This can only be reversed by a wish.

Conditions:

Addicted:

A creature can become addicted to a substance, item, or certain actions that come into contact with at least one of their senses.

- A creature addicted to something must make WHI saving throws, DC set by the addiction, at the beginning of each long rest.
    - On a failure, that creature must either take some of that substance or spend quality time with their addiction. If they are unable to then they gain a level of exhaustion.
    - On a success, the creature manages to resist the need to indulge their addiction.
- A creature addicted to a substance for a long time, or just a strong substance, can end up needing it more frequently. For every three WHI Saving Rolls the creature fails, the addiction will worsen:
    - The Creature must make checks every Short and Long Rest.
    - The Creature must make checks after every Encounter as well as each Short and Long Rest.

- If a creature succeeds their saving throw three times in a row, then their addiction becomes more manageable. The creature's addition becomes less frequent, until they no longer need to roll.
    - If the character is around the substance they are addicted to a lot, a GM can decide, if reasonable, to give disadvantage or increase the amount of success the addicted creature needs before they can remove this condition.

Blinded:

A creature's vision becomes dark, an endless void surrounds them everywhere. Only creatures that don't rely on their vision for direction will find their way through the darkness.

- A blinded creature can't see and automatically fails any ability check that requires sight.
- Attack rolls against the creature have advantage, and the creature's Attack rolls have disadvantage.

Bloodied:

When a creature has sustained an amount of damage that they begin to draw closer to death. Wounds that are no longer trivial mark their body, time or great magic will be needed to mend those wounds.

- When a creature hits half their MAX HP.
- Elementals and similar creatures that are a huge size category or larger drop by 1 size, keeping everything else the same.

Bleeding:

A wound that is deeper than most you have taken begins to spill your life. You take ongoing damage until you are able to mend this wound closed. The more wounds like this you take the more damage you suffer.

- Each turn you must succeed a VIG saving throw vs the afflicter's DC. On a success you take 1D6 Damage, on a failure you take 1D6 Damage and suffer a level of exhaustion.
- This affliction can increase in level, increasing the damage by 1D6 each time, MAX 5D6.
- <u>How to remove this condition:</u>
    - Succeed on your VIG saving throw to remove a level of Bleeding.
    - Spell or Effect like Lesser Restoration will remove one level of Bleeding.
    - Spells or Effects like Greater Restoration will remove four levels of Bleeding.
    - A Tact or Whit check, DC = 10 + (2 x Bleed Level) allows a creature to remove one level of Bleed.

Burned:

- 1st Degree:
    - You no longer add your stat modifier to your weapon's damage rolls.
- 2nd Degree:
    - Any weapon attack dice damage you deal is halved for the duration.
- 3rd Degree:

    - Any weapon attack dice damage you roll is halved, additionally you do not add your stat modifier to the damage.
    - Your speed is halved
- 4th Degree:
    - Any weapon attack damage you roll is halved, additionally you do not add your stat modifier to the damage.
    - Your Speed is halved.
    - You can only take one attack per action, even if you can normally take more.
- <u>How to remove this condition</u>:
    - You can spend a hit die during a short rest to remove one degree of Burn.
    - A spell or effect like lesser restoration will remove one degree of Burn.
    - A Tact or Whit check, DC = 12 + (2 x Burn Degree) allows a creature to ignore this condition for one hour.

Cover:

A creature can use terrain or other objects to give them cover against potential enemy attacks.

- 1/4 cover: +1 to ac and GRA saving throws
- 1/2 cover: +3 ac and GRA saving throws
- 3/4: +5 ac and GRA saving throws

Dazed:

- Creatures can take an Action or a Quick Action but not both.
- Creatures make attacks of opportunity at disadvantage
- Any spell concentration checks are made with disadvantage.
- You cannot take the Charge action

Deafened:

- A deafened creature can't hear and automatically fails any ability check that requires hearing.
- A creature is unaffected by spells that require them to hear

Drowning:

- A creature starts drowning when they have run out of breath while under liquid.
    - A creature can hold their breath for a number of minutes equal to 1 + VIG modifier (minimum 30 seconds.)
- A PC can only do one of the following on their turn: take an Action, Quick Action, or Movement.
- A creature can be under the drowning condition for one turn before they gain the dying condition and fall unconscious.
    - If a creature does not have these conditions removed within a number of rounds equal to their level, they die.

Exhaustion:

Creatures can take levels of exhaustion equal to 9, after which they fall unconscious.

- Creatures take a -1 to all attack rolls, skill checks, and saving throws for each level of exhaustion they currently have.
- When a creature gains 10 levels of exhaustion they fall unconscious until a level of exhaustion is removed.
    - When a creature also has the Dying condition they fall unconscious at 5, instead of 10, levels of Exhaustion.
- Any attack or forced saving throw against a Dying and Unconsious creature will kill them.
- **Gaining Exhaustion Levels:**
    - If a character fails to remove a level of exhaustion after two days, they gain an additional level of exhaustion.
    - When a creature that requires sleep does not take a long rest they must succeed on a persistence check equal to 15 + (days without sleep (min. 1) x (current levels of exhaustion + 1)). If they fail they gain 1 level of exhaustion, if they fail by 5 they gain 2 levels, fail by 10 or more they gain 3.
    - Attempting to cast a Spell or use a Maneuver above your level will give you Exhaustion points equal to its Tier.
    - A dying creature gains levels of exhaustion when they act or are hit with an attack or spell (See Dying for further details.)
    - Any effect that gives a level of exhaustion.
- **Removing Exhaustion Levels:**
    - During a long rest you remove levels of exhaustion equal to your **VIG** modifier (min. 1).
    - During a short rest a player may spend hit dice to remove levels of exhaustion. Each spent die removes one level of exhaustion.
    - Once per short rest a player may also make a **Persistence** check equal to <u>10 + (Levels of exhaustion they wish to ignore)</u> to temporarily ignore the effects of those levels of exhaustion for a number of hours equal to how much you exceeded the DC by (min. 1).

Frightened:

when a player or enemy becomes frightened their flight or fight instincts kick in. you may choose to do one of the following things on your turn:

- Use your action to flee. you can make a WHI save to end this effect at the end of your turn if the enemy is no longer within your sight.
- use your action to fight: you run up to melee and attack the creature at disadvantage. you can make a WHI save to end this effect after each successful attack.

Grappled:

- A grappled creature's speed becomes 0, and it can't benefit from any bonus to its Movement.

- The condition ends if the Grappler is incapacitated.
- The condition also ends if an Effect removes the grappled creature from the reach of the Grappler or Grappling Effect, such as when a creature is hurled away by the Thunderwave spell.

Grappling a creature:

- Make a Power check vs their Power or Nimbleness check, the winner gets the favorable outcome.
    - If a creature, who is a target for a grapple, wins the contested Power check, they may reverse the grapple.
- You can only grapple a creature of your size or smaller
    - Attempting to grapple a creature one size category larger than you, you suffer a -5 x number of categories larger, to the check.

Hidden:

- Creatures are unaware of your location and you are unseen by others.
- Other creatures who have beaten your Hide Check with higher passive Astuteness or Intuition or an active roll ignore this condition.
- Noise above a whisper gives searchers advantage on their checks against finding you.
- You gain advantage to attack rolls.
- Direct attacks cannot be made against you but you are still subject to Area of Effects attacks.

Incapacitated:

- An incapacitated creature can't take Actions or Reactions.

Invisible:

- An invisible creature is impossible to see without the aid of magic or a Special sense and is considered Hidden.
- Attack rolls against the creature have disadvantage, and the creature's Attack rolls have advantage.

Marked:

- -2 to attack rolls that target any creature that did not mark you
- A creature can only have one mark on it at a time.
- A creature is marked until it dies, the creator of the mark dies, or until the creator stops marking them.
- You can mark a number of creatures up to your **TAC** modifier (min. 1).

Paralyzed:

- A paralyzed creature is incapacitated (see the condition) and can't move or speak.
- The creature automatically fails Might and Grace Saving Throws.

- Attack rolls against the creature have advantage.
- Any Attack that hits the creature is a critical hit if the attacker is within 5 feet of the creature.

Petrified:

- A petrified creature is transformed, along with any non-magical object it is wearing or carrying, into a solid inanimate substance (usually stone). Its weight increases by a factor of ten, and it ceases aging.
- The creature is incapacitated (see the condition), can't move or speak, and is unaware of its surroundings.
- Attack rolls against the creature have advantage.
- The creature automatically fails Might and Grace Saving Throws.
- The creature has Resistance to all damage.
- The creature is immune to poison and disease, although a poison or disease already in its system is suspended, not neutralized.

Poisoned:

There are four levels of the Poisoned Condition, each level adds onto the previous ones. A creature afflicted with the Poisoned Condition takes Blood damage at the end of each of their turns, this cannot be reduced, the severity of damage increases with each level. Special poisons may add additional effects.

- Minor: D4
    - The creature's speed is halved.
- Moderate: D6
    - The creature has disadvantage on Attack rolls and Skill Checks.
- Severe: 2D6
    - The creatures MAX HP lowers by the amount of damage they receive from this condition.
- Fatal: 2D10
    - The creature's speed becomes 0 and they auto-fail any MIG or GRA saving throws or skill checks.
- <u>How to remove this condition:</u>
    - During a long rest you may remove one level of Poison.
    - You may spend a hit die during a short rest to remove one level of Poison.
    - Spell or Effect like Lesser Restoration will remove one level of Poison.
    - Spells or Effects like Greater Restoration will remove four levels of Poison.
    - A Tact or Whit check, DC = 10 + (2 x Poison Level) allows a creature to ignore this condition for one hour.

Prone:

- A prone creature's only Movement option is to crawl, unless it stands up and thereby ends the condition.

- An underwater creature cannot be knocked or made prone.
- The creature has disadvantage on Attack rolls.
- An Attack roll against the creature has advantage if the attacker is within 5 feet of the creature. Otherwise, the Attack roll has disadvantage.

Restrained:

- A restrained creature's speed becomes 0, and it can't benefit from any bonus to its speed.
- Attack rolls against the creature have advantage, and the creature's Attack rolls have disadvantage.
- The creature has disadvantage on Grace Saving Throws.

Stunned:

- A stunned creature is Dazed (see the condition), has a movement speed of 0, and can speak only falteringly.
- The creature automatically fails Might and Grace Saving Throws.
- Attack rolls against the creature have advantage.

Susceptible:

- A creature that gains this condition becomes extremely weak to a certain type of damage or affinity. When hit by that damage or affinity they must make a ViG saving throw or immediately fall Unconscious.

Unconscious:

- An unconscious creature is incapacitated (see the condition), can't move or speak, and is unaware of its surroundings
- The creature drops whatever it's holding and all items in their Main Item Slots
- The Creature falls prone.
- The creature automatically fails Might and Grace Saving Throws.
- Attack rolls against the creature have advantage.
- Any Attack that hits the creature is a critical hit if the attacker is within 5 feet of the creature.

Madness:

There are ten levels of madness, much in line with exhaustion, each one decreasing a creature's sanity and driving it further into destruction.

- Madness partially relies on a player's role playing, however the effects help portray madness within the mechanics and rules.

<u>Levels of Madness:</u>

1. Anxiety

    - The creature feels an ever present sense of anxiety and worry, though they can never quite place why. They seek comforts of safety and friends at all times.
2. On Edge
    - The creature feels a sense of dread, like enemies are watching them at all times. They feel as though others are ready to ambush them at any point.
3. Impulsive
    - The creature begins to feel impulsive, acting without thinking first or having to do mundane things a certain number of times before they can move on.
4. Loss of Alignment
    - The creature no longer understands the difference between right and wrong. They only do what they desire, regardless of the consequences or who is hurt.
5. Untrustworthy
    - The creature begins to think of others, even close friends, to be untrustworthy. They keep close watch over their belongings and their own back. They will leave or betray others before others get a chance to do so to them.
6. Trusted Friend
    - The creature gains an ally, a single trustworthy friend whom they can trust with anything. Others cannot seem to perceive the new friend, speaking to how powerful they must be.
7. Everyone else is crazy
    - The creature believes that every other creature around them is crazy. Their actions make no sense to the creature, no matter how sensible they actually are.
8. Hide from Them
    - The creature needs to find a safe space to hide from the ones coming for them. Once a safe space is found, they won't leave.
9. Nowhere is safe
    - The creature believes that they will never be safe, no matter where they go. This may cause some to lash out at everyone around them, others will flee in fear at sight of any creature.
10. Insanity
    - The afflicted creature no longer knows themself or anyone else. They have no memories of their life and act only using a primal instinct making them dangerous to be around.
    - They can use their abilities on instinct but are unable to cast spells or use maneuvers.

<u>Getting Rid of Madness</u>:

-

Diseases:

Disease is a common plague, even in a world of magic. Each disease is different in nature and therefore requires a different method of curing its effects. Some diseases are magical causing the cure to sometimes seem strange or esoteric.

- **Aching Doom**:

    - <u>Curing this Disease:</u>
    - <u>Effect</u>:
- **Ash Burn**:
    - You feel as though your insides are turning to ash as your skin burns to a crisp in an oven. Suffer a level of Burn and suffer a level of Exhaustion at the end of every long rest. Every 3 levels of exhaustion you gain in this way increase the Degree of your Burn by 1, even if the levels of exhaustion are not concurrent.
    - <u>Curing this Disease:</u>
        -
    - <u>Effect</u>:
        -
- **Astral Flux**:
    - Most afflicts mages or other spellcasters. When casting spells there may be an extra effect that sputters out with the spell once cast. This has the possibility of causing a Wild Magic Surge.
        - Whenever a spell is cast or a spell like ability used the creature must make a Wild Magic Surge Check to see if it would cause something to happen.
        - So long as the creature has this Disease they will continue to roll a Wild Magic Surge Chance when they cast spells, the DC increasing by 1 each time they trigger the Surge Chance and it doesn't happen.
    - <u>Curing this Disease:</u>
        -
    - <u>Effect</u>:
        -
- **Bone Head**:
    - This Disease causes the afflicted creature's head to start to turn to bone. First the skin will become slightly harder and more stiff. Then their hair will begin to become brittle and break. The dangerous stages begin when the skin starts to turn bone white and gains a hard texture. In some cases bone spikes will start to grow out from the head of the creature. This Disease directly attacks the mind of its host, causing them to lose a lot of their intelligence.
    - The creature gains the Dazed condition, this cannot be removed until this Disease is cured.
        - At the end of a Long Rest the afflicted creature must make a VIG saving throw.
            - On the first failure their skin becomes dry and flaky.
            - On the second failure their hair begins to become brittle and easily breaks off.
            - One the third failure their face becomes bone white and their skin hardens like bone, small spiked pieces of bone begin to grow from their skull.
        - Once the creature has bone growths forming in front of their skull they must make a TAC saving throw at the end of each long rest.

            - On each failure they lose one point of their Tact, if a creature reaches -5 Tact they become catatonic until their mind can be restored or repaired.
    - <u>Curing this Disease:</u>
    - <u>Effect</u>:
- **Cavemind***:*
    - While under the effects of Cavemind a creature believes that they are perpetually lost. The creature suffers disadvantage on any check to navigate or search for something. Spellcasters are unable to prepare new spells, as the ones they memorized have become locked inside their mind. Spellcasters are also unable to Concentrate on spells.
    - <u>Curing this Disease:</u>
        - This lasts until they are able to either drink water touched by the Sun, or they are able to see sunlight. Casting lesser restoration or a greater healing spell will also cure this Disease.
        - Creatures can also make a WHI save, DC 20, at the end of each Long rest they take.
    - <u>Effect</u>:
- **Chimera Virus**:
    - Creatures with this virus tend to take on traits of the other creatures surrounding them. A dog owner might start barking at passers by, a horse owner might begin to trot when they walk, and a hen owner might find themselves waking early in the morning to yell at the sun. The next stage will cause the creature to begin to develop physical traits that match the mental ones they have picked up. Eventually they will solidify, changing their legs, arms, ears, bones, or some other feature or trait. Once that trait solidifies, other ones will begin to develop.
    - A creature with this disease must make a WHI saving throw at the end of each long rest, on a failure they begin to take on the traits of a different creature type.
        - If they fail a WHI saving throw three more times then they will begin to develop physical traits of that creature.
        - If the creature fails another three WHI saving throws then the physical trait manifests completely and the process starts over again.
            - The new physical trait might be good, bad, or a mixture of both.
    - <u>Curing this Disease:</u>
    - <u>Effect</u>:
- **Dragon Haze**:
    - A Creature afflicted with this Disease begins to develop an unhealthy relationship with treasure. They become greedy, angry, defensive, or untrusting over their coin and treasure.
    - What the creature specifically does in relation to the treasure changes depending on the Dragon that gave the Disease to them, or you can roll a D8 to randomly choose on the below list:
        - <u>1 - Red</u>: Everything you want is yours, take it by your authority and dishonor those who resist.

        - 2 - Orange: Anything that you want you can take, and if you cannot have it, then nobody will.
        - 3 - Yellow: All that glitters is gold, you are specifically attracted to golden treasures and coins.
        - 4 - Green: You will plot and scheme to achieve your goals of obtaining treasure, direct confrontation is bad for your image, best to blackmail them instead.
        - 5 - Blue: Your treasure must be kept safe. A vault of all vaults shall be needed to ensure their safety. Let nobody know where your treasure lies.
        - 6 - Purple: Coin and Gold are useless. Only true treasure like magic items, powerful materials, ancient tomes, and other magical artifacts will suffice.
        - 7 - White: Treasure was made to be spent. Don't worry about holding on to it, if you see something you like you should buy it!
        - 8 - Black: All treasure is cursed. That gold coin holds the spirit of a long dead lich that yearns for your flesh to touch its cold form. Do not trust it.
    - Curing this Disease:
    - Effect:
- **Dreamwake**:
    - You act out your dreams as though you were living them. You do not actually move or expended any real effort but you do talk and loosely mime everything that happens within the dream. You do not remember your dreams upon waking and must succeed a DC 12 VIG Saving Throw or suffer a point of Exhaustion.
    - Curing this Disease:
    - Effect:
    -
- **Ectophlem**:
    - Curing this Disease:
    - Effect:
- **Fairy Drip:**
    - Curing this Disease:
        -
    - Effect:
        -
- **Fortune Addiction**:
    - Creatures afflicted with this disease become obsessed with divining their own and other's futures. They will seek oracles, tarot shufflers, palm readers, and even the stars themselves to divine what might happen next. As the Disease worsens the creature begins to obsess over more and more specific things, starting with what the weather will be like, then certain foods they should or shouldn't eat, until they obsess over every action they take.
    - Curing this Disease:
    - Effect:
    -

- **Glyph Curse**:
    - Curing this Disease:
    - Effect:
    -
- **Greyshroom**:
    - Your skin slowly becomes gray and stone like. Small mushrooms sprout from your pores and leave a dusty cloud surrounding you at all times. The cloud will choke creatures who need air to breathe.
    - Curing this Disease:
    - Effect:
- **Hex Burn**:
    - Curing this Disease:
    - Effect:
- **Icy Hot**:
    - Suffer from the Dazed condition and a Level of Burn.
    - You cannot get Warm enough, and when you do, then you cannot get cold enough. It is always too hot and too cold.
    - Everyday you suffer from this disease you must take a point of Exhaustion.
        - Every two levels of Exhaustion you gain another Level of Burn.
    - Curing this Disease:
    - Effect:
- **Lich Vapors**:
    - Curing this Disease:
    - Effect:
- **Murshpus**:
    - Spreading in patches of yellow, green, and sickly purple with pus filled sacks ready to burst at the slightest agitation. The sacks fill with a yellowish liquid filled with black spots. When they burst the spots become new carriers of the mycelium network that spreads its way through organic compounds. Mostly non-fatal but the smell and pain are some of the worst. They say it feels rather good once the sacks burst.
    - Curing this Disease:
    - Effect:
    -
- **Mystic Breakdown**:
    - Curing this Disease:
    - Effect:
- **Phantom Chills**:
    - Curing this Disease:
    - Effect:
- **Pixie Fever**:
    - Curing this Disease:
    - Effect:
- **Red Blight**:

    - Curing this Disease:
    - Effect:
- **Rubber Legs**:
    - A creature's legs become rubber, it becomes harder for them to run at their full speed, and they cannot lift too many heavy objects or they will bend too much.
        - A creature's speed and Inventory slots are halved. If they do not empty out their inventory halfway then their movement becomes 0.
        - A creature suffers half falling damage while they suffer from this disease.
        - A creature's jump height and distance are doubled while they suffer from this disease.
        - Gain resistance to Lightning damage.
    - If a creature does not get this disease cured then it will begin to infect the rest of their body. At the end of each Long rest roll a VIG saving throw, DC 15. After three failures your arms become infected as well.
        - While your arms are infected you suffer disadvantage on Melee Weapon Attacks.
        - While your arms are infected you are Immune to Lightning Damage.
    - If you fail another three VIG saving throws after your arms and legs are rubber then your head turns to rubber and you die. Your corpse becomes a Rubberman with none of your memories or skills.
    - Curing this Disease:
    - Effect:
    -
- **Seers Madness**:
    - Those afflicted with this Disease become riddled with Futures yet to come, horrible ways that they could, might, or will die from. Futures that are bleak and yet sweet. Days in which they could never be. The creature ends up going mad from seeing too many possible futures, most of the bad, all of them being completely insane and useless to anything related to the mundane world.
    - Curing this Disease:
    - Effect:
    -
- **Skeletal Shakes**:
    - This disease causes the creature's skeleton to feel cold, this causes them to shake uncontrollably. Eventually the bones of the creature will start to rattle into each other and a soft clicking noise can be heard from their body.
    - A creature with this disease suffers from Disadvantage on Finesse and Nimbleness checks.
    - At the end of each long rest the afflicted creature must make a VIG saving throw.
        - After three failures their movement is halved and they gain disadvantage to attacks.
    - The creature must then make a VIG saving throw at the end of each Long Rest.
        - On each failure they lose one point of their Vigor stat, if a creature reaches -5 Vigor their body gives out and they die.

    - Curing this Disease:
    - Effect:
- **Spellrot**:
    - Curing this Disease:
    - Effect:
- **Titan Cramps**:
    - Curing this Disease:
    - Effect:
- **Vampire Gut:**
    - Curing this Disease:
    - Effect:
- **Vanishing Limb**:
    - This Disease causes your limbs to experience a temporal and quantum state of being and never have been. At the end of each long rest you must roll a D8, depending on the roll a different Limb “vanishes” and the other one returns, until your cure the Disease or your next long rest.
        - 1: Left Hand
        - 2: Left Foot
        - 3: Right Hand
        - 4: Right Foot
        - 5: Left Arm
        - 6: Left Leg
        - 7: Right Arm
        - 8: Right Leg
    - You can no longer feel your limb, but you can still use it to move things. Although there is nothing in that space, your limb can grab and move things as it normally would.
    - Curing this Disease:
    - Effect:
- **Voodoo Blisters**:
    - Curing this Disease:
    - Effect:
- **Wizard Syndrome**:
    - Those afflicted by this disease become obsessed with Wizards, either thinking they are a Wizard, fearing Wizards, wanting to attack Wizards, or some other weird thing related to Wizards. How they are obsessed or what specifics they are obsessed over are random for each creature. Here are some recorded examples:
        - A Berserker with the Disease thought of themself as the Master of Archmagi of the Unknown Order of Supreme Magic. Their strongest spells were Bash and Bam.
        - A Mage with the Disease began to see their own skin as paper than must be put into a book. It is said that in one of the Great Libraries there is a book with a bone cover and flesh pages. The words written within bleed and scab over, the letters in the exact handwriting as the mage.

        - A Dragon once contracted this Disease, they had begun to believe that each coin in their horde was a Mage. They began to meticulously sort and sift the coins, looking for a one that could turn them all back into Humans.
    - Those that contract this disease tread into madness. At the end of each Long Rest that you have this disease you must roll a VIG saving throw or gain a Level of Madness. The Greater the madness, the stranger the obsession.
    - <u>Curing this Disease:</u>
    - <u>Effect</u>:
        -

Equipment

Every Adventurer needs equipment if they are to survive within the wilderness.

Utility Die:

- Some equipment is too tedious to track by individual numbers so you can use a utility die instead
- Every time you use an item you must roll its utility die.
    - When you roll a 1 or 2 on the die it is incremented by one die size.
    - (D100 —> D20 —> D12 —> D10 —> D8 —> D6 —> D4)
- This mechanic could also be used for magic items like wands or potions.
- The GM decides what die to use.

<u>Kits, Materials, & Tools</u>:

Tools:

Tools are what's needed to perform tasks for certain professions, blacksmithing needs a hammer and anvil, sewing needs a needle and thread, and painting takes brushes and paint.

- Alchemist Tools
    - Cost: 40 gp
    - Allows one to perform Alchemy while not within a lab or brewery.
    - Comes with flask, burners, vials, and other instruments for alchemy.
- Brewing Tools
    - Cost: 25 gp
    - Allows one to brew alcohol while not within a brewery.
    - Comes with flasks, bottles, and a jug.
- Blacksmithing Tools
    - Cost: 25 gp
    - Comes with a portable forge, anvil, and hammer.
    - Allows one to perform blacksmithing while not within a proper forge.
- Carpenter Tools
    - Cost: 6 gp
    - Comes with D12 nails, a hammer, a ruler, a level, and a saw.
    - Allows one to make furniture or perform repairs while not within a workshop.
        - Make a repair check, D20 + GRA, repair 2D6 + GRA to any wooden object.
- Cartographers Tools
    - Cost: 10 gp
    - Comes with a portable drafting table, a compass, pen, and D6 pieces of paper.
    - Allows one to make maps while out in the field, gives advantage to all map making checks.
- Cooking Tools
    - Cost: 15 gp
    - Comes with a pot, frying pan, spatula, spoon, flint and steel, and a lid.

    - During a short rest you can choose to prepare a meal, adding 30 minutes to the short rest time. Any creature who eats the meal will gain (Level)D4 in temporary HP.
- Healer's Tools
    - Cost: 15 gp
    - 10 charges
    - As an action you can spend a charge to stabilize a creature.
    - As an action spend 5 charges to heal a creature for 1D6 + Medicine HP.
    - During a short or long rest spend 2 charges to restore HP equal to 1D6 + Medicine.
- Leather Workers Tools
    - Cost: 5 gp
    - Comes with a knife, an awl, a hammer, and some scrap leather.
    - Allows one to repair or make leather materials without the use of a workshop.
        - Make a repair check, D20 + GRA, repair 2D6 + GRA to any leather object.
- Masonry Tools
    - Cost: 15 gp
- Painting Tools
    - Cost: 12 gp
- Pottery Tools
    - Cost: 35 gp
- Rune Scribe Tools
    - Cost: 20 gp
    - This pouch comes neatly packed with everything you could need to scribe a rune on any surface. Chalk, a knife, paint, ink and quill, chisel and hammer, a small book, dyes, needle and thread,
    - When you use the Rune Scribes pouch to scribe a Rune you may roll with advantage.
- Tailoring Tools
    - Cost: 15 gp
- Thieves Tools
    - Cost: 25 gp
- Tinkering Tools
    - Cost: 40 gp
- Ward Craft Tools
    - Cost: 50 gp
    - This small bag comes packed with everything you could need to craft a ward. Along with everything from the Rune Scribes Pouch, it also comes with precise measuring instruments for straight lines, circles, the current temperature, humidity, and many other factors used in Ward Crafting. This allows the user to get pin point accurate measurements for any ward configuration. It also comes with a small abacus.

        - When you use the Ward Crafting Kit to help learn or break a Ward you may roll with advantage.
- Woodcarving Tools
    - Cost: 2 gp

Materials:
The raw materials you use for your tools, things like metal plates, fabric, and a canvas.

- Alchemist Materials
    - Cost: 40 gp

<u>Items:</u>

- **Complexity: 1**
    - Hammer
        - 2 gp
    - D10 Nails
        - 1 sp
    - Bell

        - 1 gp
    - Light Backpack
        - +10 Stored Slots
        - Can use one slot to store all items of tiny or smaller size.
        - 5 sp
    - Torch
        - 1 sp
    - Waterskin
        - 5 sp
    - Small pouch
        - 2 sp
        - Can store all items of tiny or smaller size using one slot.
    - Small chest
        - 8 sp
        - +15 stored item slots
        - Can store all items of tiny or smaller size using one slot.
    - Blanket
        - 1 sp
- **Complexity: 2**
    - Mirror
        - 5 gp
    - Spy glass
        - 20 gp
    - 10 feet of thread
        - 2 sp
    - 50 feet of rope
        - 10 gp
    - D10 pitons
        - 5 sp
    - D100 ball bearings
        - 5 sp
    - Bedroll
        - 1 gp
    - Medium Backpack
        - +15 stored slots
        - Can use one slot to store all items of tiny or smaller size.
        - 2 gp
    - Medium Chest
        - +20 stored slots
        - Can use one slot to store all items of tiny or smaller size.
        - 5 gp
    - Small tent
        - 4 gp

        - enough room for one medium sized creature comfortably, or two medium sized creatures uncomfortably.
    - Component pouch:
        - 20 Gp
        - Comes packed with everything a Mage could need when casting a spell. Neatly organized and labeled too.
    - Wand:
        - 20 Gp
        - Some material crafted into a more sleek and streamlined form. Great for portability.
    - Arcane Focus
        - 15 gp
        - Sometimes an orb, sometimes the horn of a dragon, could be the jar of some glowing jelly.
    - Divine Focus:
        - 10 gp
        - Typically a divine symbol, of a God, that has been made of valuable materials and blessed by some holy priest or priestess.
    - Primal Focus:
        - 5 Gp
        - Some material that represents the true spirit of nature. Perhaps a rotting log that never quite seems to break, a dead crow with feathers that never fall off its body, or maybe a flower growing within the ribcage of some poor beast.
    - Spellbook:
        - 20 GP
        - Allows a Spellcaster to memorize additional Spells per day equal to their Level.
- **Complexity: 3**
    - Jug
        - 2 gp
    - Barrel
        - 10 gp
    - Blank book
        - 5 gp
    - D4 Candles
        - 4 sp
    - D4 incense
        - 2 gp
    - Large backpack
        - +20 stored slots
        - Can use one slot to store all items of tiny or smaller.
        - 5 gp
    - Large Chest

        - +25 stored slots
        - Can use one slot to store all items of tiny or smaller.
        - 10 gp
    - Crowbar
        - 5 gp
    - D4 Lock picks
        - 5 gp
    - D4 soap bars
        - 2 sp
    - Ink pen
        - 2 gp
    - D4 sheets of paper
        - 5 sp
        - typically parchment, though it depends on the city and location.
    - 1 liter of oil
        - 2 gp
    - Lantern
        - 5 sp
    - Hooded Lantern
        - 2 gp
    - 1 foot of chain
        - 3 gp
    - Manacles
        - 2 gp
    - Tent
        - 8 gp
        - large enough for two medium sized creatures comfortably, and three medium sized creatures uncomfortably.
    - Staff:
        - 25 Gp
        - A large quarter staff with lots of space for enchanting. makes for a good utility tool and focus during rituals.

<u>Potions:</u>

- **Potions of Healing**:
    - When drinking a potion of healing a player can choose to use an action, when they do so they gain the maximum amount of healing from the potion
    - When a player administers a potion to another creature they can choose to take a full round action, when they do so the creature gains the maximum amount of healing from the potion.
- **Complexity: 1**
    - Potion of Lesser Healing
        - Heals 2D4 x Proficiency of the creature.
        - 30 gp

- **Complexity: 2**
    - Potion of Healing
        - Heals 2D6 x Proficiency of the creature.
        - 80 gp
- **Complexity: 3**
    - Potion of Greater Healing
        - Heals 2D8 x Proficiency of the creature.
        - 400 gp
- **Complexity: 4**
    - Potion of Superior Healing
        - Heals 2D10 x Proficiency of the creature.
        - 1200 gp
- **Complexity: 5**
    - Potion of Ultimate Healing
        - Heals 2D12 x Proficiency of creature.
        - 3500 gp
-

<u>Packs</u>:

- **Burglar's Pack (20 gp)**
    - Light Backpack
    - Bell
    - Crowbar
    - Hammer
    - Hooded lantern
    - Tinderbox
    - Waterskin
    - D4 pitons
    - D4 Flasks of Oil
    - D6 Days of Rations
    - D8 Lock picks
    - 10 feet of string
    - Bag of 1,000 ball bearings
    - The pack also has 30 feet of hempen rope strapped to the side of it.
- **Diplomat's Pack (40 gp)**
    - Medium Chest
    - Set of fine clothes
    - Bottle of ink
    - Ink pen
    - Lamp
    - Small Mirror
    - Sealing wax
    - Signet Ring
    - Vial of perfume

    - D4 Bars of Soap
    - D4 Flasks of Oil
    - D6 sheets of paper
    - 2 Cases for Maps and Scrolls
- **Dungeoneer's Pack (15 gp)**
    - Large backpack
    - Crowbar
    - Hammer
    - Tinderbox
    - 10 Foot Pole
    - Waterskin
    - D6 Pitons
    - D12 Torches
    - D12 Days of Rations
    - The pack also has 50 feet of hempen rope strapped to the side of it.
- **Entertainer's Pack (45 gp)**
    - Medium Backpack
    - Bedroll
    - Waterskin
    - Disguise kit
    - D6 candles
    - D8 Days of Rations
    - 2 costumes
- **Explorer's Pack (10 gp)**
    - Medium backpack
    - Bedroll
    - Mess kit
    - Tinderbox
    - Waterskin
    - D8 Torches
    - D12 Days of Rations
    - The pack also has 40 feet of hempen rope strapped to the side of it.
- **Merchants Pack (50 gp)**
    - Large Backpack
    - Lockbox
    - Artisans Tool
    - Blanket
    - Tinderbox
    - Waterskin
    - D12 Days of Rations
    - 50 feet of hempen rope strapped to the side.
- **Priest's Pack (20 gp)**
    - Medium Backpack
    - Blanket

    - Alms box
    - Censer
    - Holy Vestments
    - Tinderbox
    - Waterskin
    - D4 Days of Rations
    - D6 Incense
    - D8 Candles
- **Scholar's Pack (40 gp)**
    - Light Backpack
    - Book of lore
    - Bottle of ink
    - Hourglass
    - Ink pen
    - Small bag of sand
    - Small knife
    - Personal Journal
    - D8 sheets of parchment

Armory:

Light Armor					
	Cost	AC	Weight	Properties	Complexity
Padded Shirt	5 gp	11 + GRA	8		1
Leather	10 gp	11 + GRA	10	Slim	1
Studded Leather	45 gp	12 + GRA	13		2
Bark	70 gp	13 + GRA (max. 4)	13	Noisy	2

Medium Armor						
	Cost	AC	Weight	Properties	Might Minimum	Complexity
Hide	10 gp	12 + GRA (max. 3)	12		---	2
Chain Shirt	50 gp	13 + GRA (max. 2)	20	Slim	—	3
Scale Mail	50 gp	14 + GRA (max. 2)	45	heavy, Noisy	11	2
Breastplate	400 gp	14 + GRA (max. 2)	20	Slim	—	2
Half-plate	750 gp	15 + GRA (max. 2)	40	Loud, Heavy	13	3

Heavy Armor						
	Cost	AC	Weight	Properties	Might Minimum	Complexity
Ring Mail	30 gp	14	35	Heavy, Slim	12	3
Chain Mail	70 gp	16	55	Noisy, Heavy, Slim	15	4
Splint	200 gp	17	60	Loud. Heavy	17	4
Plate	1500 gp	18	65	Loud, Heavy	19	8

Shields

	Cost	AC	Weight	Properties	Might Minimum	Complexity
Buckler	10 gp	1	3			1
Round Shield	15 gp	2	5			2
Kite Shield	100 gp	3	15	Heavy, noisy	13	3
Tower Shield	350 gp	4	45	Heavy, Loud, Two-handed	18	4

Armor Properties:

- Noisy:
  - -3 on Hide checks
- Loud:
  - Disadvantage on Hide checks
- Heavy:
  - Requires a certain MIG score to use
- Slim
  - Can be worn under or with clothing.

Using Untrained Armor:

- When you wear armor you are not trained in, you gain the following restrictions:

Armor Type	Speed Modifier	GRA Check Modifier
Light Armor	-0 feet	-3
Medium Armor	-5 feet	-6
Heavy Armor	-10 feet	-10

- Spells become harder to cast when wearing armor you're unfamiliar with
  - Increase the casting time by one increment (Movement —> Quick Action —> Action —> Full round action)

Using Heavier Armor:

- If you use armor that is too heavy for you then you will suffer penalties.
  - You movement is halved
  - For every 3 hours of travel you gain one level of exhaustion
  - Standing up from prone takes your full movement
  - Your attacks and spells have disadvantage.
  - Disadvantage on all GRA and MIG checks.

Weaponry:

When you attack with a weapon that you do not have training in you do not add your Proficiency to the attack roll and you do not add your ability modifier to the damage.

Training:

- Training in a weapon takes time and money. You must spend 5 hours everyday training while learning a new weapon. The cost is dependent on the type of weapon:
    - Simple weapons: 15 gold per week of training
    - Martial weapons: 45 gold per week of training

Weapon Size:

- All weapons in the weapon chart are based on the medium sized weapon.
- You cannot proficiently wield a weapon that is more than one size category larger than yourself, unless you have an ability that lets you do so or meet the minimum MIG stat requirement.
    - If you have an ability that allows you to carry or move objects one size category above your own, then you may wield a weapon up to two size categories larger than your own with no penalty.
    - To wield a weapon that's a size category larger than you are, you must meet the minimum MIG stat requirement: 3 x (Number of Size Categories larger than your size).
- If a weapon has the heavy property then the MIG minimum increases by 1.
- If a weapon has the light property the MIG minimum decreases by 1.
- Weapon Sizes go by the following: Tiny, Small, Medium, Large, Huge, Giant, Gargantuan, Colossal

Weapon Size Damage:

- All weapons in the weapon chart are based on the medium sized weapon.
- Depending on your weapon size you will deal a different amount of damage. If you are a creature of size tiny then your damage dice will be decreased by one size. Alternatively if you are large or greater your die increases by one size.
    - 1D4 —> 1D6 —> 1D8 —> 1D10 —> 1D12 —> 2D8 —> 2D10 —> 2D12 —> 3D8 —> 3D10 —> 3D12
    - 1D4 is the minimum damage for a weapon unless specified otherwise.
- A Large sized Greatsword deals 2D8 damage, a huge sized greatsword would deal 2D10 damage, and a colossal sized greatsword would deal 4D10 damage.
- A Tiny sized club deals 1D4 damage, a colossal Club deals 2D10 damage

Simple Melee Weapons:

	Damage	Damage Type	Crit Range	Crit Damage	Range	Time to train	Properties	Complexity

Club	1d6	bludgeoning	20	x3	Melee	1 week	light, finesse	1
Dagger	1d4	piercing or slashing	19-20	X3	Melee, 20/40 ft	2 weeks	Light, finesse, thrown	1
Greatclub	1d8	bludgeoning	20	x2	Melee	3 weeks	heavy	2
handaxe	1d6	slashing	20	x2	Melee, 20/30 ft	1 week	Light, thrown	1

Attacks with Weapons:

- Martial Melee Weapons are affected by your MIG modifier, adding the Stat to your attack rolls and damage dealt.
    - Some Weapon Properties can change this to your GRA modifier instead.
- Ranged Weapons are affected by your GRA modifier, adding the Stat to your attack rolls and damage dealt.
    - This does not include weapons with the Thrown property unless they also have the light or finesse property.

Weapon Properties:

- Light
    - Easily handled in one hand, able to dual wield. Uses GRA for attack and damage rolls.
- Heavy
    - Requires a MIG score of 15 or higher
- Finesse
    - Able to use GRA or MIG for attack and damage rolls
- Thrown
    - Able to throw the weapon with accuracy
- Two-handed
    - Requires the use of two hands to use properly
- Versatile
    - Able to switch hand grip for more damage
- Special
    - Trident
        - Attacks underwater do not suffer disadvantage
        - Able to use the thrown property underwater

    - Lance
        - attacks against creatures within 5 feet are made at disadvantage
    - Net
        - Able to grapple a number of enemies depending on how big.
        - Each medium sized creature needs at least 10 feet (plus 5 for each size category larger)
    - Pike
        - attacks against creatures within 5 feet are made at disadvantage

Mastered Weapon Properties

A character can spend time honing their skills with a weapon of choice. Mastering a weapon gives you a new ability from the list below that you may use when wielding one of the listed weapon types. You must be proficient in a weapon before gaining mastery.

- Cleave:
    - Weapon: Any heavy weapon or a weapon being wielded in two-hands.
    - Effect: Any excess damage to a slain enemy will transfer to any adjacent enemy.
- Wood Splitter:
    - Weapon: Any weapon that deals slashing damage.
    - Effect: You gain Siege damage.
- Deadly Intent:
    - Weapon: Any weapon that can deal sneak attack damage.
    - Effect: reroll any 1s on sneak attack damage for this weapon
- Quick Stab
    - Weapon: Any weapon with the light property.
    - Effect: you may make one additional attack as a quick action with this weapon.
- Slick
    - Weapon: Any weapon with the light property or a net
    - Effect: You have advantage on trying to hide this weapon on your body.
- Overloaded
    - Weapon: Any weapon with ammunition.
    - Effect: As a quick action, you can load two pieces of ammunition at once in this weapon. You take a -5 to hit, but deal damage for each strike as though it was a separate shot, you can only target one enemy with this attack.
- Dance of a Thousand Strikes:
    - Weapon: Dagger, Javelin or Spear
    - Effect: As an action you may keep attacking an enemy within your range until you miss.
- Roundabout
    - Weapon: Any weapon with the reach property and flails.
    - Effect: Ignore the AC of shields and half or ¾ cover.
- Overkill
    - Weapon: Any bludgeoning or “great” weapon
    - Effect: When you kill an enemy, deal damage to all adjacent enemies equal to your damage modifier.

- Quick Toss
    - Weapon: Any weapon with the Thrown property
    - Effect: When you make an attack with this weapon you can make another ranged attack using the same type of weapon.
- Full Throw
    - Weapon: Any weapon with the thrown property
    - Effect: deal an additional damage die when you attack a ranged enemy.
- Knock Down
    - Weapon: Any shield or two handed weapon.
    - Effect: As a part of an attack you can make an opposing MIG roll to shove a target and knock them prone.
- Pummel
    - Weapon: any ranged weapon
    - Effect: As a quick action you can pummel a creature within 5 feet of you (make an attack roll) if you hit deal 1d4 bludgeoning damage and they will be temporarily blinded. your ranged attacks will not suffer disadvantage from them until the end of your turn.
- Handled with Grace
    - Weapon: Any versatile weapon
    - Effect: While wielding this weapon in one hand you can use GRA or MIG for attack and damage rolls.
- Shield Breaker
    - Weapon: Any bludgeoning weapon
    - Effect: On a critical hit you break the target's shield or lower their AC by 1.
- Chips and Cracks
    - Weapon: any Bludgeoning weapon
    - Effect: When you miss an attack you still deal your damage modifier to the target.
- Breaker
    - Weapon: Any Heavy weapon
    - Effect: Ignore Hardness of inanimate objects and constructs.
- Sweep
    - Weapon: Quarterstaff, Spear, or Halberd
    - Effect: As a part of an attack you can attempt to trip an enemy within range. They must succeed a GRA save, DC= 10 + prof. + MIG.
- Riposte
    - Weapon: Any light weapon
    - Effect: when an enemy misses you, take advantage of their strike and make an attack as a reaction
- Quickdraw
    - Weapon: Scimitar, Katana, and Sickle
    - Effect: you can make an additional attack as a quick action when you draw this weapon.
- Focused Strikes:
    - Weapon: Any melee weapon

        - Effect: You gain a 5% bonus to crit against an enemy each time you hit them, this lasts until the beginning of your next turn or when you attack a different target.
            - IE: First attack only 20 crits, second attack 19-20 crits, third attack 18-20, etc.
- Quickshot
    - Weapon: Any ranged weapon
    - Effect: After you attack with this weapon you can make another attack as a quick action, however the target must be within 30 feet.
- Scattershot
    - Weapon: Slingshot or sling
    - Effect: load up a handful of ammunition into the sling and throw it, every creature within a 15 foot cone must make a GRA save or be pelted by your ammunition, full damage on failure, half on success.
- Crunch!
    - Weapon: Bludgeoning weapons
    - Effect: On a Critical hit you dent/break your enemies armor/bones, subjecting them to disadvantage on GRA and MIG saving throws till the end of the encounter.
- Charging Slash
    - Weapon: any heavy weapon
    - Effect: If you move 10 feet in a straight line before attacking a creature you can add one additional damage die onto the damage.
- Jackhammer
    - Weapon: Bludgeoning weapons
    - Effect: Constructs and other monsters made of inorganic materials take an extra die of damage
- Bindstrike
    - Weapon: Whip, Net, Trident, or Sickle
    - Effect: You can grapple a target as a part of an attack.
- Crush!
    - Weapon: Any heavy weapon
    - Effect: You can use MIG or VIG for attack and damage rolls with this weapon.
- Juggling Act
    - Weapon: Any two handed or versatile weapon
    - Effect: You are able to use other objects while you are wielding this weapon with both hands, if the object would take both of your hands then you must temporarily drop or stow your weapon.
- Practiced Form
    - Weapon: Any weapon without a property
    - Effect: You can choose one property to add to this weapon while you wield it.

Inventory: Optional

Each player has an inventory of items, weapons, or other things that they carry with them on adventures. However, not all items are packed away evenly. In the heat of combat you won't be digging through your backpack as a free action, but a sword on your belt can be drawn with a free action.

You can gain more Slot types by wearing a backpack, bag, extra belts, or pouches. You can also convert Main Item Slots into Secondary or Stored Item Slots, basically your character straps them down to their body or places them in a safer, but harder to reach location. You also gain more Stored Item Slots the higher your Might Stat.

- You can also convert Secondary Item Slots into Main Item Slots, but keep in mind that when you drop to 0 HP all items within your Main Item Slots are dropped.

Certain Conditions can affect the amount of items you can hold in your inventory. Some Conditions can cause you to keep certain items within reach at all times, others may cause you to store them away so nobody but you may see its glory.

Item Slots:

- **Main Items** - *4 slots*: **Free Action**
  - Items often worn on your person with easy access.
  - *Examples: Sword, Shield, Wand, Dagger, anything in an open pouch*
- **Secondary items** - *6 slots*: **Free Action/Quick Action**
  - Left inside a pouch or shallow bag, easy enough to get to but more than a simple gesture or hand wave.
  - Players can make a Finesse check, DC equal to 10 + Number of Secondary Items, on a success they pull out whichever item they intended for, on a failure they must instead use their Quick Action if they wish to grab the item.
  - *Examples: Ball bearings within a tied pouch, a dagger in a buttoned sheath, a javelin bound in a bundle, or a frying pan strapped to the side of your bag.*
- **Stored Items** - *2 slots*: **Action**
  - Often deep in a bag or strapped down to secure it in place.
  - Every +1 in your Might Stat gives you an additional +2 Stored Item Slots.
  - Some items give you almost infinite Stored Item Slots, like a bag of holding or a storage ring.
  - *Examples: Leftover lunch inside your backpack, the soap bars left wrapped in towels, your secret journal inside the hidden pocket of your sleeping bag.*
- **More Slots:**
  - Having a higher MIG score will give you additional Stored Item slots equal to 2 Slots for every +1 you have.
  - Bags or other like items can give you more slots while only taking up one themselves.
  - Creatures gain an additional 3 Main, Secondary, and Stored Item slots for every size category larger they are than Medium.

Item Crafting:

<u>Item Crafting:</u>
Crafting an Item takes a base amount of coin and time.

- Some item crafters add in a Core Material to the item, this adds an ability or bonus to the item. This does not count as an enchantment.

Prerequisites:
You must have the appropriate tool in order to craft items.

- Crafting items without having that tools proficiency doubles the time it takes to craft the item
- If you do not have proficiency in the tool then you will not gain any bonus abilities or benefits from using a core material when crafting the item.

Tool and Item examples:
Ultimately what your character can craft should be a collaborative effort between the player and GM.

- Blacksmithing tools:
    - Metal Armor and Shields
    - Metal Weapons
    - Tongs and Spatulas
- Tailoring tools:
    - Garments
    - Mending fabrics
    - Fashion Statements
- Alchemist's Tools:
    - Potion making
    - Poison making
    - Bubbled water
- Thieves tools:
    - Lock picks
    - Trapped chests or locks

Time:

- It takes (Item Complexity x 2) days to complete an item.
- If the player has proficiency in the tools needed to craft the item, the time is lowered to a number of days equal to the Item Complexity.
- If the player has expertise in the tools needed to craft the item, the time is lowered to a number of days equal to half the complexity.

Coin:

- It takes half the item cost in base materials to make an item.
    - A core material's cost does not get halved from the base material cost.

Core Material:

- Different types of materials give various effects to the item
- These benefits are sometimes magical in nature, but do not interfere with any enchantments.
- They are mostly made from inorganic materials, although other types have been used.

Complexity:

- An item is given a base complexity.
- Adding a core material to the item will add its complexity to the total.

Magic:

Spells & Maneuvers:

Each spell and maneuver are made up of three parts that determine how they function.

- Affinity
    - Determines the Spells and Maneuvers that a character can use.
    - Changes the spells or maneuvers main form and power, potentially causing a spell or maneuver to act outside the limitations of its discipline.
- Discipline
    - Determines the contents of the spell or maneuver and what area it focuses in.
    - Spellcaster and Martial Classes typically choose a field to specialize in to gain further knowledge and skill in an attempt to push the boundaries of the Discipline.
- Foundation
    - The underlying workings of how you perform the spell or maneuver with your abilities.
    - Your Foundation must align with the spell or maneuver you are performing for it to work.

Learning New Spells & Maneuvers:

A spellcaster or martial class can only learn new spells or maneuvers by either developing them on their own, or by finding and learning them within the world. A Worshiper may ask for new spells, or may already have access to new spells when they are granted higher powers. But a Mage, an old hermit of a man, might have to venture out into the world to trade spells and develop new ones. A Warrior can choose to develop new maneuvers, or learn one from a master swordsman.

- Mediums are an exception to this rule, like most, when it comes to magic. When they gain access to higher level skills upon leveling up they may spontaneously choose whichever spells they need when they need them, so long as the spells affinity matches their own. They can also learn new spells by developing or searching for them.
- Ultimately it is up to the GM if they want to have players choose their own spells or be given/found by them through in-game events.

Copying:

For a Spellcaster or Martial Class to copy or learn a new spell or maneuver, it takes an amount of gold equal to (20 GP x Spell Tier). This must be done by looking at the Formula, Prayer, a step by step casting, or some other form of performing a Maneuver or Spell.

- Scrolls:
    - Spells and Martial Skills can be copied from scrolls that have the same foundation as themselves.
- Spell Books:
    - The best way to get a dead Mage's spells.
    - You must Alter the foundation to match your own in order to cast these spells.

- Instruction Manual:
    - Carried by some practitioners advancing within their discipline. Maneuvers can be learned by studying the techniques.

Altering Foundations:
To alter a foundation so that it would match your own you need to spend a number of hours equal to the tier revising the Maneuvers or spells properties.

- When revising a Maneuvers or spells foundation into your own, you keep any alterations made to the original Maneuver or spell and its current tier.

Concentrating on Spells:

- A caster can concentrate on a number of spells equal to their Tact modifier (min. 1).
- When you have to make a concentration check you must roll for each spell you are concentrating on, for each additional concentration check made, the DC increases by 2.
    - Start with the most recent spell you cast, working your way back to the first concentration spell you cast.
- Whenever you take damage you must roll for concentration, the base DC equal to 10 or half the damage you took, whichever is higher.
    - Ie. Your second concentration check would have a base DC of 12 or (half the damage +2) whichever was higher.

Spell Casting & Martial Maneuvers:

- Spell Casting and Martial Modifiers: Spellcaster and Martial Classes use a unique combination of stat modifiers and skills for their spells and maneuvers. This also determines what stat they use for their Martial or Spell Save DC.
- Preparing: Each class has a designated skill that determines how many spells and maneuvers they can prepare each day (1:1)
- Spellcasting and Maneuvers Modifiers:

Berserker ● Stat: VIG ● Skill: Grit	**Cultivator** ● Stat: MIG ● Skill: Power	**Guardian** ● Stat: MIG ● Skill: Valor
Hound ● Stat: GRA ● Skill: Flexibility	**Jinx** ● Stats: CHA ● Skills: Zest	**Mage** ● Stat: TAC ● Skill: Ingenuity
Medium ● Stat: VIG ● Skill: Persistence	**Shaman** ● Stat: WHI ● Skill: Compassion	**Tradesman** ● Stat: CHA ● Skill: Passion
Traveler ● Stat: GRA ● Skill: Nimbleness	**Warrior** ● Stat: TAC ● Skill: Astuteness	**Worshipper** ● Stat: WHI ● Skill: Intuition

- These are the basic examples of the Class's Spell casting and Martial modifier as well as their prepared spells/maneuvers Skill. These can be changed depending on what theme your character is trying to achieve.
    - IE A Jinx using Tact for their modifier instead of Charm, they are more of an intelligent character looking for loopholes in contracts to exploit their patron for more power.
    - Or a Guardian who relies more on his good nature and fair looks rather than his overwhelming strength.
    - Or a Hound relying on intel and a spy network to locate their targets position rather than breaking and entering or sneaking around places.
- If you wish to deviate from the standard, work with your GM to see what would work best for the campaign, your character, and the table.

Affinities:

All spells and magical abilities have a certain magical affinities that grant them their unique properties and effects. Most affinities have something that they are strong against and something that they are weak against.

- Changing a spell's affinity can cause the effect of the spell to change. An example would be the "Hand" spells.

Elemental Affinities:

Fire→Air→Water→Earth→Fire

Elements from these worlds can mix together and make new affinities. The same basic rules above still apply however these spells and magic effects can be mastered by people with different affinities. They are also much rarer and usually more powerful.

Air	Water	Earth	Fire
Lightning	Ice	Marsh	Lava
Ash	Blood	Wood	Metal

Ancient God Realm (Holy) and Syzyrus (Unholy)

Radiant ←→ Necrotic

Fey and Sunkyn

Light ←→ Shadow

Far Worlds and Material World

Psychic←→Psychic←→Force←→Force

Example Affinities:

- Flame, Glass, Iron
- Liquid, Snow, Adrenaline

- Wind, Thunder, Smoke
- Rock, Mud, Vine
- Blessed, Hollow
- Illuminate, Shroud
- Mind, Gravity

Foundations:

Spellcasting Foundations:

Your magical foundation determines the path you take as a spell caster. They all function very differently from each other, although some overlap or similar patterns occur. You cannot have two Spellcasting Foundations and you cannot cast spells outside your Foundation.

- You can Alter a Spellform to change its Foundation into your own. The GM can dictate which spells can be changed in this way at their discretion.
- Your Foundation will provide a unique magical ability for your character.

Arcane

- What modern day Mages use. Formulae and components used as mediums to cast magic.
- Effect:
    - During a short rest you can swap out a number of prepared spells with unprepared spells up to twice your Level.

Celestial

- Created by beings that have transcended and become something more. They use formulas and other advanced techniques that are beyond most modern day magic.
- Effect:
    - Spells with this Foundation are one Tier higher than usual.
    - You can learn a new spell from any foundation from just observing a Spell, Enchantment, Magical Item, Ward, or Spell-like Ability by making a Skill Check determined by the GM, DC equal to 10 + Spell Tier.

Divine

- Used by Worshippers who give faith to their God. Channeling magic to perform miracles or other acts of Divinity.
- Effect:
    - When the act of Casting a Spell aligns with your Gods tenants and virtues you can roll your Spell die twice and take either result.
    - When the act of Casting a Spell would go against your Gods tenants and virtues roll twice and take the lower.

Demonic

- Made by demons. Used to empower and make the body immortal.
- Effect:
    - When you would fall below 0 HP you may decrement your Spell Die instead, remaining at 1 HP.

Draconic

- Used by dragons. Included breath techniques and enchanting powers. Close to primal magic in its idea and conception.
- Effect:
    - When determining what you can enchant you can double your level.
    - You can change a spell with a range of touch into a 10 ft line breath attack, those in range must make a saving throw of either GRA or VIG.

Infernal

- Used by Devils. Based on the soul and twisting another's mind. Bring out the fears of others to use in your spells.
- Effect:
    - You have advantage against Mind altering, Charming, or Soul targeting spell saving throws or the caster suffers disadvantage on their spell attack roll.

Primal

- Nature based magic. Used to call upon the elements and natural energy of the world.
- Effect:
    - Gain Elementalism as a Magical Discipline.
    - When you roll on the Chaos Magic Surge table you can roll an additional time and take either instead.

Martial Foundations:

Your magical foundation determines the path you take as a Martial Class. They all function very differently from each other, although some overlap or similar patterns occur. You cannot have two Martial Foundations and you cannot perform Maneuvers outside your Foundation.

- You can Alter a Maneuver to change its Foundation into your own. The GM can dictate which Maneuvers can be changed in this way at their discretion.
- Your Foundation will provide a unique effect for your character's maneuvers.

Aggressive

- What most berserkers use to overwhelm and crush their foes. Good for explosive turns where a lot of attacks are made.
- Effect:
    - If your Martial Die Decrements, you may use your Reaction to move and critically hit any enemy within your range.

Defensive

- A turtle game. Unstoppable defense will eventually wear down even the sharpest of blades.
- Effect:
    - If you are hit with an Attack you may decrement your Martial Die and take no damage.

Elusive

- Good for hit and run tactics, allows one to make a clean escape from any battle.
- Effect:
    - You cannot be targeted by Attacks of Opportunity and gain advantage on escaping grapples.

Grappler

- Focused on Grappling enemies and either throwing them or putting them into submissions.
- Effect:
    - When you hit an enemy with a Melee Attack, you can attempt to grapple them as well.

Striker

- Those who have perfected their skill at killing. Aiming for vital targets or simply using overwhelming force to crush anything that stands in their path.
- Effect:
    - When you have advantage on an attack, you can roll three times taking whichever roll you want.

Tactical

- What modern day Warriors use. Know your enemy, know yourself, and win.
- Effect:
    - During a short rest you can swap out a number of prepared Maneuvers with unprepared Maneuvers up to your Level.

Flexible/ Improvisational

- Adaptive and fluid. Used by freestyle fighters who don't like to play by anyone's rules but their own.
- Effect:
    - You gain proficiency with improvised weapons and they deal damage determined by their size (Small D4->D6->D8->D10->D12->D20 Giant)

Disciplines:

Magical Disciplines:

A Discipline is what type of magic you specialize in. If Foundation is your College, then Discipline is your Major.

Depending on your Foundation you might find the flavor of your Discipline changing. A Primal Illusionist might use natural phenomena such as mirages for their spells, while a Demonic Illusionist will use the fear of the dark against one's mind, fooling one into seeing something that's not. Both of these Illusionists have a sense of mystery coming from their spells, but they are pulled from two different inspirations. Below are some example disciplines your character might pursue.

- Abjuration
    - Specializing in defensive type magics
- Conjuration
    - The materialization of imagined/real items or creatures.
- Chronomagy
    - The manipulation of time.
- Divination
    - Reading the future and discerning when certain events will happen.
- Elementalism
    - Control over the basic elements of nature.
- Evocation
    - Offensive and battle magics.
- Enchantment
    - Mind affecting magic
- Gravitology
    - Control over gravity and space.
- Hemomagy
    - The manipulation and magic of blood.
- Illusion
    - Sometimes Mind affecting, mostly sensory affecting magics.
- Necroism
    - The resurrection of the dead, or means of animating them with magic.
- Restoration
    - Helping the body or form regenerate and replace missing parts.
- Runecraft
    - The study and focus of Runes and their uses.
- Shamanism
    - Nature based magic, more mystical and strange.

- Transmutation
    - The act of changing one substance into another, or moving a substance from one location to another.
- Wardcraft
    - The study of Wards and their function, craft, and how to expand upon them.

Martial Disciplines:
A Discipline is what type of fighting you specialize in. Depending on your Foundation you might find the flavor of your Discipline changing. A Tactical Judo practitioner might use throws to move enemies around, while a Defensive Kickboxer may try to back them in a corner by absorbing attack after attack.

- Tai Chi
- Judo
- Kickboxing
- Fencing
- Iaido
- Karabiong

Attunement

Attunement is the process of forming a deep bond with a certain item, creature, or construct. It allows the attuned magical creation to better adapt and evolve to suit the user's wants and desires.

A creature can only attune to a maximum of three enchanted vessels. This attunement can be broken, but if done wrong will lead to disastrous effects. The attunement allows for the user and enchanted vessel to share power, the creation always ends up growing more from the relationship than the user.

You can attune to almost anything you want, an item, a creature, a construct, or some other magical force.
The subject in which you attune to must be magical in nature, or have some way of becoming magical.
Attuning to different types of enchanted vessels will bestow different types of bonds, and therefore different ways to interact through those connections.

Items:
A physical connection to the item. Allows the user to call it to them no matter their distance. The item will often develop full or semi-sentience depending on the users will and needs.
When attuning to an item you gain the following benefits:

- You may call that item to yourself at anytime, no matter the distance.
- You may exert your will through this item as long as you are on the same plane.
- The items Enchantment Quality increases by one grade, or gains one if not already magical.

- The magical creation responds to the users will, allowing for it to adapt to the users needs and wants.

Creatures:
An emotional connection to the creature. Allows the user and the creature to share telepathic thought and emotion. Often bestows greater Tact onto the creature.
When attuning to a creature you gain the following benefits:
- You know that creature's location at all times.
- You share a telepathic bond with that creature and are able to communicate through emotion or thought.
- It's Beast Tier increases by one.

Constructs:
A mental connection with the construct. This allows the user control over the construct over a vastly larger distance. Some are even able to pull power from the construct in order to perform greater magical workings.
When attuning to a construct you gain the following benefits:
- You can command that construct as long as you are on the same plane.
- You can exert your will through that construct.
- You can draw on the constructs power so long as you are on the same plane.

Concepts:
A Willed connection with the concept. This allows the user to manipulate their surroundings using the concept. This is not possible until level 10.

Attuning:

The process of attuning to something is not a complex task, however it is also not quick or easy.
- The user must perform a ritual that takes place over an hour. During this time they must remain in physical or ethereal contact with the magical creation, and must remain completely focused on it for that time.
- At the end of the hour a bond is formed between the user and the magical creation.
    - If the magical creation rejects the user for some reason then the bond is not formed and the user must wait a day before attempting again.

Breaking Attunement:
Breaking attunement usually leaves the user drained of power and the magical creation destroyed.
You can break an Attunement in the following ways:
- Destroy the enchanted vessel.
- Focus on breaking the attunement for 1 hour keeping in physical contact with the enchanted vessel.

- Depending on how long you've been attuned or how powerful the item is its Enchantment Quality will degrade and you will suffer some consequences. Exhaustion, Martial or Spell Die degrading, loss of Max HP, or some other such thing.

Alternative Casting

When you cast a spell you must use the specific verbal, somatic, and material components for it to be cast correctly.

- However there are a multitude of ways to cast the same spells; this can be demonstrated by Casters of different magical affinities and foundations using the same spells.
    - This has become the basis to change the requirements of the spell's casting.
    - By substituting requirements you can change what is needed to cast the spell.

This is easy in theory but hard in practice. Many casters have found that in order to swap components you must have a deep understanding of not only the spell but also of the magic used to cast it.

- *Many who have managed to swap out components are either blessed with great understanding or spent a great deal of effort to alter the spell*
- *In some cases swapping out components can make the spell weaker, or causing it to have untoward effects.*
    - *You can also empower a spell through this method but it usually becomes unstable.*
- *An example would be the spell Command. It uses a verbal component, which is the command you give to the creature you cast the spell on.*
    - *But what if you wanted to change the component from verbal to somatic? We would have to substitute out the command with an action or some other form of movement.*
        - *This might cause it so only those looking at you are affected by the spell.*
    - *What if you instead wanted to add a somatic component to it? Stating the command along with an action could increase the power of the spell*
        - *This could also cause the spell to require more mana causing it to increase in tier.*

Alternative casting has three different ways for a caster to manipulate the spell.

- Altering Spellforms:
    - Research the spell and find ways to manipulate it in your own way
    - Work with your GM to modify a spell. You may have to go on a quest to be able to do it.
- Ceremonies:
    - Takes a lot longer to perform
    - When performed your spell die is automatically decremented.
    - Can get some good buffs from it
- Rituals:
    - Allows the caster to gather ambient magic so they do not roll their spell die.

Altering Spellforms

Altering Spellforms is a great way to gain more utility from your spells. When attempting to cast an altered spellform you must first make a check, DC equal to the total complexity of all alterations made to the spell plus the spell tier. Once you successfully cast the altered spell once, you no longer need to roll.

- Make an appropriate Skill Check, depending on the type of spell caster you are, DC equal to Total Complexity of all Alteratons + spell tier. This check can be made as a part of an action, like attempting to cast the spell you're altering.
    - If you fail the check then the spell is not altered and you must wait until you take a long rest to attempt another alteration with that spell. If casting the spell you still cast the unaltered version.
    - On a success you manage to alter the spell form, its tier increasing by the effects complexity. (Ie a 3rd Tier spell, Fireball, is altered by an effect with 3 complexity, Extend, its new Tier is 6th. ***Spell Tier + Total Complexity***.)

Magical Affinity:

- Spells with a matching Affinity to your own count as one Spell Tier lower when you are making a skill check to Alter their Spellform.

Magical Foundation:

- You have advantage when Altering Spellforms with the same original Foundation as your own.
    - Spells learned by altering their foundations do not gain this benefit.

Magical Discipline:

- Spells with a matching discipline to your own increase by half the total complexity (rounded up) when you alter their spellform.
    - (Ie a 3rd Tier spell, Fireball, is altered by Pyromancer, with an effect with 4 complexity, Expand, its new Tier is 5th. ***Spell Tier + Half Total Complexity***.)

Alterations:

Below is a list of Alterations, if you would like an effect not described below then work with your GM to come up with something that works for your character and campaign.

- Archaic Casting:
    - Complexity: 2
    - Effect: Change the affinity and damage type of the spell.
- Bend Fate:
    - Complexity: 4
    - Effect: A target suffers disadvantage to their saving throw.
- Curse:
    - Complexity: 6
    - Effect: A target suffers disadvantage on all attack rolls, ability checks, and saving throws until the end of your next turn.
- Evoke:
    - Complexity: 2
    - Effect: Deal an additional damage die per tier of the spell.

- Expand:
    - Complexity: 4
    - Effect: For each Spell Tier, increase the radius of the spell by 10 feet.
- Extend:
    - Complexity: 3
    - Effect: Double the spell's casting range.
- Prolong:
    - Complexity: 6
    - Effect: Double the length of the spell's duration.
- Quicken:
    - Complexity: 6
    - Effect: Act as though you increased the casting time by one increment. You can only quicken a spell once, doing so again will have no effect.
        - Full Round Act -> Major Act -> Minor Act -> React -> Free Action
- Restore:
    - Complexity: 2
    - Effect: Roll an additional die for each level of the spell when restoring hit points or giving temporary hp.
- Recast:
    - Complexity: Triple the Spell Tier
    - Effect: Cast the spell a second time within the same action. You need not roll your spell die a second time.
- Silent Spell:
    - Complexity: 4
    - Effect: You can cast this spell without using verbal components.
- Still Casting:
    - Complexity: 4
    - Effect: You can cast this spell without having to use somatic components.
- Twinned Spell:
    - Complexity: Double the spell tier
    - Effect: when you cast a spell with a target of a single creature you can instead target 2.
- Warp Space:
    - Complexity: 4
    - Effect: manipulate the area of effect for a spell so it bends around allies/objects.

Ceremonies

Instead of immediately casting the spell you can instead choose to perform a Ceremony to increase the power of that spell.

- This increases the casting time of the spell by one hour for each tier, and your spell die is automatically decremented.
- Each hour that passes you must make an arcana, nature, persistence, or religion check depending on the type of spell you are casting, DC equal to 6 + Spell Tier + number of

hours passed. If you fail the check the ceremony ends in failure and your spell die must be rolled to see if it is decremented.

Under this effect the spell you cast may gain one of the following benefits:

- The duration of the spell is increased, turning minutes to hours, hours to days, days to weeks, and weeks to months.
- The range of the spell is doubled for every two levels you have. Spells that divine knowledge, like scrying, are not limited by what world or plane you or your target resides on.
- The number of targets for the spell can double for every two levels you have.
- You may set a trigger for the spell. If the spell is not triggered within a number of days equal to the spell's tier then the spell dissipates.

Rituals

When you cast a spell you may choose to make it a Ritual, provided it has the Ritual tag and you are able trained in Ritual spell casting.

- This increases the casting time by 10 minutes per spell tier as you gather the ambient magic to form the spell.
- Casting a spell in this way does not expend a spell slot.

Enchanting:

Enchanting is the process of permanently infusing Magic into an item. This process can take anywhere from a day to a full month. To have the Enchantment infused into an item and be stable it is important to have the proper materials. Each Ability must be properly bonded to the Materials used or else the Enchantment will not take hold and will fizzle out.

Also, a special type of Material is needed for each Enchantment, this is called a Core Material. They are used to anchor the Enchantment onto the item. An Enchantment may have multiple options for a Core Material, potentially giving it varying effects.

- GMs should allow their players to be creative with Enchantments. Allowing a spell scroll to be embedded into an item would be a creative solution to enchanting spells you cannot cast. There are endless ideas with Enchanting and the rules for them should enhance that feeling not hinder it.

Enchanting Dice:

- Each player gains 1D6 every odd level
- +1D6 if proficient in Enchanting
- May gain more through abilities

Enchantment DC:

- Enchantment DC is determined by the item to be enchanted, the ability used, how many materials are used, and if any curses are applied.
- Enchanting After Creation:
    - Ability Complexity(s) x Material Grade(s) - any curse added.
- Enchanting During Creation:

    - Ability Complexity(s) x (Material Grade(s) + Item Complexity) - any curse added.

Failure and Success:

- Roll your Enchantment Dice in an attempt to beat the DC, refer to the chart to see the outcome.

Roll:	**Outcome:**
Failed by 10+	Enchantment does not take hold. It explodes. Deal 1D10 force damage equal to the DC to all creatures in 30 feet.
Failed by 5+	Enchantment is barely held together, three random curses are added to the item.
Failed	The Enchantment is unstable, performs at 50% efficiency and potency.
Success	The Enchantment takes hold as expected.
Success by 5+	The Enchantment creates a synergy. Choose up to two material abilities to add to the item.
Success by 10+	The Enchantment is perfect. Add all material abilities to the item.

Ability:

- Choose an ability to Enchant the item with.
    - Each Ability has a complexity that will determine how difficult it will be to enchant.
    - Each Ability has a Core Material that they need in order to bind with the item.
- You can embed one item with an amount of abilities equal to your TAC modifier.
    - Additional abilities can mix with the original and create something new; sometimes better, sometimes worse, but mostly unexpected.

Materials:

Different materials have different Grades that determine the DC and unique abilities that can be added to the Enchantment.

- You can add a number of Materials into the Enchanted Item equal to your WHI modifier.
    - *Ie. Bennett plays an Elemental Shaman Owl Folk, Terros, and wants to create a magic item. With a WHI modifier of +4 he is able to include up to 4 materials into the enchantment.*

Inferior

- Grade: 5
- Lowest quality item usable.

Adequate

- Grade: 4

- Common items that are readily found and easily used. 1/10 chance

Standard

- Grade: 3
- The Enchanters standard and most used type of item 1/100 chance

Superior:

- Grade: 2
- A high grade item that is very suitable for enchanting. 1/1,000 chance

Perfect

- Grade: 1
- A perfect item for Enchantment that is beaming with potential. 1/10,000 chance.

Time:

- Depending on if you are adding an Enchantment or Enchanting during the items creation, the amount of time differs:
    - Enchantment After Creation takes a number of Hours equal to the Enchantment Complexity to complete an Enchantment.
    - Enchanting During Creation takes (Item Complexity + Enchantment Complexity) Hours.

Adding Enchanters:

- You can have a maximum number of enchanters equal to half the Enchantment DC.
    - If Enchanting during Creation, the amount of total Enchanters allowed decreases by half.
- For each Enchanter added you can decrease the amount of hours by half.
    - All Enchanters must use their full time to work on the item, collectively or separately.

Curses:

- Some Enchanters will add a curse onto the enchantment.
- A curse is always worse than the ability it bestows, but it does not always directly relate to the given ability.
- Some curses can shift and change depending on the wielder.
- They often become sentient, tricking naïve adventurers into thinking they are an ultra powerful blade.

Abilities:

Abilities are made up of:

- Complexity:
    - How complicated it is to Enchant something with this ability.
- Effect:
    - What the ability does when used
    - Differs depending on Enchantment process (After vs During).

    - [EAC]= Enchanted After Creation
    - [EDC]= Enchanted During Creation
- Core Material
    - A necessary component that the Enchantment needs to be able to work.
        - Core Items can be any item, from simple ones that carry a basic attribute to items of great power that will bestow amazing effects.
    - Although multiple Core Materials are listed you only need to select one when crafting the item.

Ability Examples:

- Please note these are examples of Enchantments and they can be changed at the GMs discretion.
- Enchantments may also change depending on the type of item being Enchanted. While this effect happens most notably within EDC it has been known to happen with some EAC.
    - Armor
        - Passive abilities
        - Healing or defense abilities
    - Weapons
        - Passive bonuses
        - Active abilities
        - Conditional abilities
    - Tools
        - Passive Bonuses
        - Re-roll abilities
    - Other
        - Varies by item
        - Usually an active effect that varies greatly depending on the item, ability enchanted, and GM discretion.
        - More obscure and Wondrous in nature.

Spell Imbuing:

- Complexity: Equal to Spell Tier
- Effect [EAC]:
    - Limited uses of the spell based off of the item enchanted, spell tier, and materials used.
- Effect [EDC]:
    - Limited uses of the spell, more likely to work with the item or have its ability changed to fit the item better.
- Core Material:
    - Tiers 1-2:
        - Any Inferior Material with a matching Affinity.
        - Any Adequate or greater Material.

        - Tiers 3-4:
            - Adequate Quality Material
            - Any Inferior material of the same Affinity
            - Any Standard or greater Material.
        - Tiers 5-6:
            - Standard Quality Material
            - An Adequate material of the same Affinity
            - Any Superior or Perfect Material
        - Tiers 7-8:
            - Superior Quality Material.
            - A Standard Quality Material of the same Affinity.
            - Any Perfect Quality Material.
        - Tier 9+:
            - Perfect Quality Material
            - A Superior Quality Material with matching Affinity.

Ignisl:

- Complexity: 4
- Effect (EAC):
    - When you hit with this weapon you can deal an additional 1D6 of fire damage to the target and an additional target within 5 feet.
- Effect (EDC):
    - Each time this weapon hits a creature you can deal an additional 1D6 fire damage to it and every adjacent enemy.
    - When you crit with this weapon those who suffer the Fire Damage also take a Degree of Burn (max. 1 Degree.)
- Core Material:
    - Fire Affinity Material

Ailer:

- Complexity: 3
- Effect (EAC):
    - You may take the Dash Action as a Quick Action once per encounter. When you do so you do not provoke attacks of opportunity.
- Effect [EDC]:
    - You may take the dash as a Quick Action once per Encounter. When you do so you may choose to gain a flying speed equal to your movement until the end of your next turn.
- Core Material:
    - Air Affinity Material

Stolus:

- Complexity: 3
- Effect (EAC):
    - Once per encounter you can bestow +1 AC to each ally within 15 feet. They also gain 1D6 temporary HP.
- Effect [EDC]:

        - Once per encounter you can use this ability to create a wall of stone size 5 feet by 10 feet by 10 feet, this provides full cover to a creature of size large.
        - Alternatively you can choose to bestow +1 to AC and Saving Throws to each ally within 20 feet.
- Core Material:
    - Earth Affinity Material

Alqui:

Complexity: 3

- Effect (EAC):
    - You may add 1D10 of temporary HP to all allies within 30 feet. This resets every Short Rest.
- Effect [EDC]:
    - The First time you bestow healing onto a creature, you may maximize the roll of an amount of dice equal to your proficiency modifier. This resets every Encounter.
    - Once per encounter you may bestow 1D12 of temporary HP to all allies within 30 feet.
- Core Material:
    - Water Affinity Material

Spark:

- Complexity: 2
- Effect (EAC):
    - When you crit on an attack your target is Dazed for 1D4 rounds.
- Effect [EDC]:
    - Deal an additional 2D6 lightning damage when you crit on an attack.
- Core Material:
    - Any Lightning Affinity Material
    - Air Affinity Material of standard quality or greater

Scorch:

- Complexity: 2
- Effect (EAC):
    - When you crit on an attack you can deal an additional D6 of Fire damage.
- Effect [EDC]:
    - When you crit you can inflict one level of burn onto the target, if they already have the burn condition increase its level by 1.
- Core Material:
    - Any Lava Affinity Material
    - Fire Affinity Material of standard quality or greater

Freeze:

- Complexity: 2
- Effect (EAC):
    - When you crit on an attack your target has its movement reduced by half.
- Effect [EDC]:

        - When you crit on an attack roll you can inflict two levels of Exhaustion onto the target of your attack.
    - Core Material:
        - Any Ice Affinity Material
        - Water Affinity Material of standard quality or greater

Swamp:

- Complexity: 2
- Effect (EAC):
    - When you crit on an attack your target falls prone.
- Effect [EDC]:
    - When you crit on an attack roll your target becomes Dazed and has their speed reduced to 0 until the end of their next turn.
- Core Material:
    - Marsh Affinity Material
    - Earth Affinity Material of standard quality or greater

Ashen:

- Complexity: 5
- Effect [EAC]:
    - Once per long rest you can teleport 40 feet to a spot you can see, you are considered to be incorporeal until the beginning of your next turn as your body turns from Ash back to Flesh. You cannot pass through liquid barriers with this teleportation.
- Effect [EDC]:
    - Once per short rest you may change into an Ash Cloud. You have a flying speed equal to 40 feet, you cannot pass through water, you cannot harm anyone in this form, and you otherwise act as an Ash Cloud for one minute.
- Core Material:
    - Ash Affinity Material
    - Air Or Lightning Affinity Material of Superior or Greater.

Magnetize:

- Complexity: 5
- Effect [EAC]:
    - Once per turn you can deal an additional damage die when you hit with an attack.
- Effect [EDC]:
    - Once per Short Rest you can choose two objects or creatures that you can see within 40 feet. Their size can be as large as your Proficiency modifier (small-1, medium-2, Large-3, Huge-4). They immediately are drawn to each other, the smaller object being drawn towards the larger. A creature or object can resist this with a MIG Saving Throw. This effect lasts until the objects touch.
    - Alternatively you can touch two objects, following the same size restrictions, and they will be drawn together for as long as you concentrate, starting whenever you want after having touched both objects. A creature can resist this by passing a WHI Saving Throw.

- Core Material:
    - Metal Affinity Material
    - Fire or Lava Affinity Material of Superior or Greater.

Leech:

- Complexity: 5
- Effect [EAC]:
    - Once per turn you can suffer 1D6 Necrotic Damage to gain a +1 in one Ability Modifier until the end of your turn.
- Effect [EDC]:
    - When you hit with this weapon you can deal an additional 2D6 Necrotic Damage to both the target and yourself, you also gain 2D8 temporary HP and have one Ability Modifier increases by 2 for 1D4 rounds. If you use this ability again the bonus is removed but the same Ability Modifier can be chosen again.
- Core Material:
    - Blood Affinity Material
    - Water or Ice Affinity of Superior or greater.

Bloom:

- Complexity: 5
- Effect [EAC]:
    - Once per short rest as an Action you can grow a non-magical plant within a 5 by 5 foot area.
    - As an Action you can use this item to restore half a targets missing HP as long as they are stabilized. A target can only benefit from this once per day.
- Effect [EDC]:
    - Once per day as an Action you can cause an area of 10 by 10 feet per level to bloom with growth of any non-magical plant. They can grow to whatever size or proportions you want as long as they remain within the area.
    - Alternatively you can wear the enchanted item giving you a protection from all disease, regeneration effect, and a OPD healing ability. This effect heals you 1 HP per round and can restore limbs given enough time. As long as you are not dead you will gain the benefits from this item. You can heal half of a Creatures max HP as an Action. They may only benefit from this once per day.
- Core Material:
    - Wood Affinity Material
    - Earth or Marsh Affinity Material of Superior or Greater

Mind Blank:

- Complexity: 4
- Effect [EAC]:
    - You are able to shield your mind from mind reading spells and abilities.
    - Once per Short Rest as an Action you may attempt to Stun a creature for 1 round. They must succeed a WHI saving throw or become Stunned until the end of your next turn.
- Effect [EDC]:
    - You are able to shield your mind from mind reading spells and abilities.

        - Once per day as an Action you may attempt to look into the memory of one creature, they must make a WHI saving throw equal to 18. On a fail both you and the target are knocked unconscious for 1 minute. You can choose a memory to view, or you get the closest thing to what you were looking for.
- Core Material:
    - A Psychic Affinity Material

Dimensional Space:

- Complexity: 3
- Effect [EAC]:
    - The Container gains a small pocket space. The size is proportional to the level of Enchantment, 1/4th the size and space of [EDC].
    - Living Creatures cannot enter this pocket space.
    - The pocket space takes the form of a void.
    - Material types do not greatly alter the effects of the pocket space.
- Effect [EDC]:
    - The container gains a Dimensional Space proportional to the level of Enchantment:
        - Copper:
            - 10 x 10 cubic feet
            - 500 LBS
        - Silver:
            - 50 X 50 cubic feet
            - 2500 LBS
        - Gold:
            - 250 x 250 cubic feet
            - 10,000 LBS
        - Platinum:
            - 1,000 x 1,000 cubic feet
            - 100,000 LBS
        - Obsidian:
            - 2,000 x 2,000 cubic feet
            - Talk to the manager.
    - Creatures can survive within the bag, however they can only remain inside a number of hours equal to their hit dice.
    - The Enchanter may decide how the Dimensional Space works:
        - Individual pocket spheres
        - One big Room
        - A void space
        - Or another reasonable solution
- Dimensional Bags are one of the Abilities most effected by the Materials used. These are a few examples that would scale according to the quality of the item.
    - Fire:
        - Bakes goods perfectly according to recipe
        - Hatch eggs

        - Keep things warm
    - Psychic:
        - Wearers are able to call items directly to their hands or clothing onto your body.
        - Often takes the form of a maze.
    - Ice:
        - Keeps items frozen
        - Decay slower
    - Wood:
        - Flora is able to grow within
        - Able to sustain fauna x2 for every level of enchantment.
    - Necrotic:
        - Acts like bag of devouring
        - Can store skeletons and stuff without getting the bones all jumbled up
    - Shadow:
        - Dimensional Space only accessible within dim or darker light.
        - Items are concealed unless you know they are in there or are the maker of this item
    - Force:
        - Increase Size dimensions by 1 increment
- Core Material:
    - Needs a standard quality material of any Affinity.

Shadow Shroud:

- Complexity: 3
- Effect [EAC]:
    - This item is invisible when in dim or darker light. A DC 20 perception check can spot the outline of the item, enough to see something is there but not what it is.
    - Once per day as a quick action you can teleport from one shadow to another within 30 feet, the shadow must be big enough to encompass your whole body and anything you are carrying
- Effect [EDC]:
    - This item is invisible when in dim or darker light. A DC 20 astuteness check can spot the outline of the item, enough to see something is there but not what it is.
    - Once per Short rest as a Quick Action you can turn Invisible when you step into dim or darker light. This lasts for 1 minute or until you step out of the shadows, you may renter the shadows within the time to become shrouded once more.
    - As a quick action you can teleport from one shadow to another within 30 feet, the shadow must be big enough to encompass your whole body and anything you are carrying.
- Core Material:
    - Shadow Affinity Material
    - Necrotic Affinity Material of Standard or Greater.

Waylight:

- Complexity: 3

- Effect [EAC]:
    - The path to your destination is lit with a stream of lights that take whatever form you desire. Choose a number of creatures up to your TAC, they all gain the benefits of this light.
    - Creatures chosen gain a +5 to astuteness checks.
- Effect [EDC]:
    - The path to your destination is lit with a stream of lights that take whatever form you desire. Choose a number of creatures up to your TAC, they all gain the benefits of this light.
    - While traveling on the path you gain a +5 to your astuteness and — scores. You cannot get lost while on the path and you are less likely to run into any other creatures.
    - Chosen creatures may communicate telepathically for the duration.
    - Nobody else can perceive the lights unless they use a true seeing ability or magic sense ability.
- Core Material:
    - Light Affinity Material
    - Shadow Affinity Material

Template:
- Complexity:
- Effect [EAC]:
- Effect [EDC]:
- Core Material:

Materials:

Materials:
- Different items have different qualities and can even bestow different abilities during the Enchantment process.

Material Grades:
Material grades determine a lot of factors about the Material, from bonuses (or deficits) to rolls when Enchanting, bestowing a materials effect for free, and bringing out different potentials in the material itself.
Different types of materials can be categorized in different ways depending on the setting and world building of the GM. It might be that the older a material is the higher it's quality, or maybe the opposite. It's also possible that materials are only of one quality and each are ranked within tiers.
Materials:
- Different items have different qualities and can even bestow different abilities during the Enchantment process.
<u>Inferior</u>
- Grade: 5

- Lowest quality item useable

Adequate

- Complexity: 4
- Common items that are readily found and easily used.

Standard

- Complexity: 3
- The Enchanters standard and most used type of item

Superior:

- Complexity: 2
- A high grade item that is very suitable for enchanting.

Perfect

- Complexity: 1
- A perfect item for Enchantment that is beaming with potential.

Index of Inorganics

Inorganic Materials include anything that is not made up of an organic material. Many of these are also used for crafting items.

- Red Steel:
    - Affinity: Fire
    - Effect: This metal is molten in form but gives off no heat of its own, containing it all within. It can be made solid if an electric current is run through it.
    - Habitat: Formed within Volcanos or other extremely hot areas.
    - Features: It looks as though it is constantly flowing like magma through channels. Its form is not solid in its base state making mining and gathering it dangerous.
- Black Iron:
    - Affinity: Necrotic
    - Effect: This Iron rusts other metals that come into contact or near it in order to grow its own mass.
    - Habitat: Found deep underground, can be detected by the smell of rust and rot.
    - Features: It is completely black and has a rusty orange sheen to its surface.
- Greenstone:
    - Affinity: Wood
    - Effect: This material is great for channeling Druidic magic through.
    - Habitat: Areas with lush flora and hardstone.
    - Features: Looks like stone
- Starglass:
    - Affinity: Radiant
        - Secondary: Shadow
    - Effect: This glass is able to shine brightly or obscure the image that it covers, warping the light to change its image. Often used for long range communication spells.This glass is able to shine brightly or obscure the image that it covers, warping the light to change its image. Often used for long range communication spells.

    - Habitat: Is found within mines located near vast oceans, mostly located near the equator or the poles
    - Features: This crystal clear glass has motes of light scattered throughout it, casuing waving shadows to appear within
- Dead Glass:
    - Affinity: Necrotic
    - Effect: When looked through you are able to tell when there are presences of holy or undead beings around
    - Habitat: Found within deep caverns that were once home to a molten stream and has a close connection to the Sunkyn
    - Features: Glass that looks to have a grey hue to it. Anything that it covers looks as though it were aged 100s of years
- Sun Quartz:
    - Affinity: Light
    - Effect: Able to radiate off a varying light source. Its color can change depending on the region that it is found or event he time of year
    - Habitat: Found in natural outcroppings that have been long exposed to the sun
    - Features: Its color changes depending on what type of sunlight it absorbs most of
- Moon Geniss:
    - Affinity: Radiant
        - Secondary: Shadow
    - Effect: Able to combine shadows or warp them in strange ways. Great medium for drawing glyphs or other magic symbols
    - Habitat: Can be excavated out of quarries or mines that receive direct light from the moon
    - Features: This rock is pale grey in color and has a chalky texture
- Vermiscus Clay:
    - Affinity: Earth
    - Effect: Most used for sculpting golems or planting specialized magic plants
    - Habitat: Found in extremely damp areas with lots of fauna
    - Features: Has small worm like creatures living inside of it, giving it the ability to repair and contain more durability.
- Dregium:
    - Affinity: Force
    - Effect: Amplifies the effects of magic rituals or ceremonies that are used with it as the focus
    - Habitat: Found in areas with a natural balance of affinities, mostly located within the bottom of valleys
    - Features: Crystal clear rocks, mostly found in rounder shapes or forms. Unable to be perceived underwater due to how clear it is
- Living Steel:
    - Affinity: Water
    - Effect: This steel is able to move like water when electricity is applied to it
    - Habitat: Found within iron veins that have been struck by lightning

    - Features: Looks to be a deep blue color with a sheen of silver on its surface
- Falvium:
    - Affinity: Air
    - Effect: Able to levitate for short periods of duration. The length of levitation is based off the quality of the material
    - Habitat: Found within area with higher magnetic field ratings or with common lightning strikes
    - Features: A rough stone texture with a white surface pockmarked with blue and yellow spots. The spots glow brighter when it levitates.
- Graphenite:
    - Affinity: Force
        - Secondary: Earth
    - Effect: has a natural harmony of its own type. Meaning it is attracted to other-like materials.
    - Habitat: Found in places of dense magic.
    - Features: Grey with black speckles throughout. Has a brittle surface
- Photovallium:
    - Affinity: Light
        - Secondary: Lightning
    - Effect: Can capture light and store its image within the clear portions of its surface.
    - Habitat: Found near river beds with lots of lightning storms in the area
    - Features: A lumpy grey rock with transparent yellow, blue, or white crystals speckled throughout.
- Zeolite:
    - Affinity: Water
        - Secondary: Earth
    - Effect: Able to amplify divine magics and a persons faith
    - Habitat: Found in places where a divinity has touched down.
    - Features: A light blue stone with a foggy inside that contains a soft glow from within.
- Living Mud:
    - Affinity: Earth
    - Effect: Living mud is a non-organic semi-sentient form of mud that can warp is size at its will.
    - Habitat: They normally like to burrow underground to devour more material to become larger.
    - Features: On occasion adventurers will have to go slay a Living Mud that has gained full sentience and plans to devour a town or maybe even a mountain.
- Petrified Bark:
    - Affinity: Wood
        - Secondary: Necrotic
    - Effect: Many use it for rituals or for a potent decaying powder. Necromancers use it to empower their undead soldiers, or themselves.

    - Habitat: Dead Bark comes from the tree of an ancient tree whose branch has died and hardened. This bark contains an amount of condensed necrotic energy in relation to the age of the tree.
    - Features: Looks like wood but has the qualities of stone.
- Stone Beans:
    - Affiniy: Earth
        - Secondary: Force
    - Effect: When held in one's mouth they will taste whatever substance the bean was soaked in last. They can add flavor to a meal that is lacking it or absorb flavors from meals still being cooked. If eaten whole, then you become stunned for one round for each bean you ate
    - Habitat: Found near river beds.
    - Features: These small pebbles look almost identical to beans.
- Starlight Iron:
    - Affinity: Metal
        - Secondary: Light
    - Effect:
    - Habitat:
    - Features:
    - A black metal speckled with small white crystals making it look like a starry night sky. This metal carries not only the look of the starry night but also its harsh void and immortal stars. This metal always feels colds and will sap the warmth from its surroundings.
    - If the stars are condensed together it allows for a great focus for magic users.
    - Found within dark caves with both Iron and Quartz crystals.
- Airolite:
    - Affinity: Air
        - Secondary: Light
    - Effect:
    - Habitat:
    - Features:
        - An extremely light but hard metal is perfect for small cutting implements; however it is quite brittle causing it to be not very useful for armors or other protections. It can be mixed in though and provides a lighter material to work with.
        - It is found within the peaks of mountains that reach at least 10,000 feet. It is light blue in nature and looks to be fused with a pale white as though wind were blowing through the blue sky.

Miscellaneous Materia

- Star Core:
    - Affinity: Light
    - Effect: Able to give off sunlight and transmute its form into a simple item.
    - Habitat: Meteors occasionally have one at the blast site.

    - Features: An item made from pure light condensed into physical form.
- Sands of Time:
    - Affinity: Psychic
        - Secondary: Earth
    - Effect: When a weapon is made or enchanted with this material, the user may roll another attack whenever they score a critical hot.
    - Habitat: Etan is known to bestow his followers some every so often.
    - Features: These golden grains of sand appear to shift slightly and move as though time were slightly delayed, reversing, pausing, and transmuting small distances.
- Sage's Fire:
    - Affinity: Fire
    - Effect: Able to scribe on events in the future or others in the present. Often vague or incomplete. The more the fire the clearer the vision.
    - Habitat: Unknown
    - Features: This fire dances with a beat of passion. Within its form you may glimpse your fortune or doom.
- Spacial Leaf:
    - Affinity: Wood
        - Secondary: Metal
    - Effect: Able to lock down spatial movement or sub-dimensional spaces.
    - Habitat: World Tree
    - Features: A leaf with a golden smooth texture on one side and a patina rough copper on the other side.
- Volcanic Heart:
    - Affinity: Lava
    - Effect: Extremely explosive
    - Habitat: Found inside volcanos. Dead volcanos often have one but it's a much worse condition than a living volcanos.
    - Features: Looks like a large bumpy rock with lots of vents, it gives of the stench of sulfur and has a warm glow coming from the inside.
- Void Bones:
    - Affinity: Necrotic
        - Secondary: Psychic
    - Effect: Able to summon spirits from past present or future.
    - Habitat: Liches occasionally have one or two if they study chronomancy. Like one or two in their skeleton.
    - Features: Often looks like a night sky trapped within a bone, it looks like a portal into another world.
- Thread of Fate:
    - Affinity: Radiant
        - Secondary: Psychic
    - Effect: Able to trace Fate forwards or backwards in time.
    - Habitat: Unknown but can occasionally be found at events of great importance

    - Features: A golden thread that seems to disappear at its ends.
- World Seed:
    - Affinity: Earth
        - Secondary: Water
    - Effect: Able to create an extra dimensional plane of existence that can sustain life.
    - Habitat: Legend says it comes from the world tree, wherever that is.
    - Features: An earthy smelling seed with strange swirling patterns over its shell.
- Hellfire:
    - Affinity: Fire
        - Secondary: Necrotic
    - Effect: Burn it all.
    - Habitat: Syzyrus, the Nine Hells.
    - Features: marbled black and red fire.
- Moon Tears:
    - Affinity: Water
        - Secondary: Radiant
    - Effect: Provides healing effects from conditions and afflictions.
    - Habitat: During a full moon it will occasionally rain and some of the rain that catches the moons light forms into a moon tear.
    - Features: a crystalized blue tear.
- Void Thread:
    - Affinity: Shadow
    - Effect: This thread has strong connections to dimension spaces, allowing it to enter and exit them at will.
    - Habitat: Can be extracted from gateways to other planes.
    - Features: This thread is an inky black and its ends look as though they run off into nothingness.
- Solar Ray:
    - Affinity: Radiant
        - Secondary: Light
    - Effect: Contains a sliver of the power of the sun, the power is related to the color of the ray.
    - Habitat: Can only be found when they descend during a solar eclipse.
    - Features: Looks to be a squirming thread that gives off a bright light, it is warm to the touch.
- Rainbow Feather:
    - Affinity: Air
        - Secondary: Light
    - Effect: This feather has strong illusion type abilities, the more colors the stronger the illusion.
    - Habitat: Found from a Rainbow Phoenix
    - Features: A Rainbow feather, it is a beautiful myriad of colors, the more there are the strong it is.

- Star Fire :
    - Affinity:
    - Effect:
    - Habitat:
    - Features:
- Arc Stone
    - Affinity: Earth
        - Secondary: Lightning
    - Effect: This stone has the unnatural ability to attract lightning.
    - Habitat: Found on top of mountains in regions of regular lightning storms.
    - Features: This stone has a glossy black texture and has lighting like veins on its surface. Each time it is struck by lightning the pattern on its surface changes.

Tome of Flora Alkimia:

Some of the following species have been very well documented leaving great research results about the smallest of details, others are less complete and pale in comparison. It is also important to note that regional variants may amplify or even change the effects of the species.

- Template:
    - Affinity:
    - Effect:
    - Habitat:
    - Features:
- Red cape moss:
    - Affinity: Wood
        - Secondary: Fire
    - Effect: Give a level of Burn to each creature within a 5 foot radius, including yourself, and heal for 2D8.
    - Habitat: On areas with lots of sunlight that get very hot. Arid places with lots of dry air.
    - Features: Burns very easily and makes for good kindling.
- 7 colored grass:
    - Affinity: Marsh
    - Effect: You transform into a random creature, quite typically one that is native to where the grass was found.
    - Habitat: Marshlands with multiple different grasses and access to both sea and fresh water.
- Purple heart vine:
    - Affinity: Wood
        - Secondary: Radiant
    - Effect: Restore a level of any condition afflicting you and heal for 2D4 (healing die scales with quality D4->D6->D8->D10->D12.)
    - Habitat: Grows from a purple heart tree. They grow from the bodies of those who selflessly sacrificed themselves to save another.
- Blue vein sap:

    - Affinity: Wood
        - Secondary: Marsh
    - Effect: You become slowed, you gain resistance to all physical non-magical attacks.
    - Habitat: Comes from Blue Lines, nasty vines that will strangle anything that gets too close. Found in Jungles near an area with cool air.
- Frost sand:
    - Affinity: Ice
        - Secondary: Earth
    - Effect: Take 2D6 Cold damage and increase your AC by 1 for 1 minute.
    - Habitat: Go find an ice desert.
- Clear plum plant:
    - Affinity: Earth
        - Secondary: Light
    - Effect: Your skin becomes camouflaged to its surroundings giving a passive +10 to your stealth for the next minute.
    - Habitat: Invisible Plum Tree. Very hard to find, most find it with a familiar or by following their nose.
- Soul Bark Tree:
    - Affinity: Necrotic
        - Secondary: Radiant
    - Effect: Make a death saving throw on a fail permanently lose 1 Vigor point. Cure one mind effecting ailment.
    - Habitat: Grows around areas with lots of dead bodies. it's bark pattern looks like faces
- Black yin lotus:
    - Affinity: Shadow
        - Secondary: Water
    - Effect: Your shadow attacks you and every creature in sight. Use the characters stats and abilities plus the abilities of a Shadow.
    - Habitat: Found in heavily shaded areas. Will fold up during the day and unfold during the night.
- White spotted fungi:
    - Affinity: Ash
    - Effect: You may transport through ash as though you were teleporting through it instead of moving through it. This lasts for 1 minute after which you suffer from the Ash Burn disease.
    - Habitat: areas of a massive fire after everything has been burnt to ash.
- Freezeflame Berry:
    - Affinity: Ice
        - Secondary: Fire
    - Effect: Eating this allows your body to have a perfect state of homeostasis no matter the temperature of your environment for 1 hour. After which you gain the Icy Hot disease.

    - Habitat: places of very cold climate that was once very hot or is hot periodically throughout the year.
- Sleeping Mist Root:
    - Affinity: Psychic
    - Effect: You fall asleep within 1D4 minutes. You suffer from the Dreamwake Disease while having horrible nightmares.
    - Habitat:
- Crystal Mind Sap:
    - Affinity: Psychic
    - Effect: You become shielded from mind effects for the next hour. You cannot say anything coherent or understand languages for the duration.
    - Habitat: Crystalized Sap from a Mind Trap. They're often found in Forests or areas with close connections to the Fae.
- Fuming Redpod:
    - Affinity: Air
        - Secondary: Fire
    - Effect: Your mouth feels as though it was on fire. Your speed is doubled for the next minute. After the duration you gain a point of Exhaustion.
    - Habitat:
- Wildthorn Leaf:
    - Affinity: Earth
    - Effect: You grow thorns where your hairs are for 1 minute. Take 2d6 piercing damage. Your AC increases by 1 and you can deal 1D6 piercing damage on a unarmed melee or grapple.
    - Habitat: Grown in the wild on bushes. Literally does not and cannot grow near civilization.
- Skinsense berry:
    - Affinity: Earth
        - Secondary: Psychic
    - Effect: Your skin gains an additional random sensory effect for one hour (roll D4):
        - Sight
        - Hearing
        - Taste
        - Smell
    - Habitat: Harvested from sunskin trees. They grow in a hill or mountainous area with lots of sun, a nearby water source, and tall grasses nearby for local fauna.
- Starlight Lily:
    - Affinity: Wood
        - Secondary: Radiant
    - Effect: Roll 2D4 and gain an equal amount of Temporary HP. For each temporary HP gained you can remove one disease affecting you.
    - Habitat: Near/in sacred shrines or areas with an element of earth and water combined.
- Death Soil:

    - Affinity: Necrotic
        - Secondary: Earth
    - Effect: Roll a Death Saving throw. On a failure you lose 2 Vigor points and are afflicted with the Dead Man Walking Disease. On a success you gain advantage in your next death saving throw.
    - Also used to preserve dead bodies for another 10 days per pound used.
    - Habitat: Formed in graveyards or near large quantities of death.
- Shade Seed:
    - Affinity: Shadow
    - Effect: Your shadow retracts into your body, for the duration you can project your shadow within 10 feet into any shape you desire.
    - Habitat: Comes from shadebark trees
    - Features: Looks like a small black haired seed. The hairier it is the higher quality.
- Vitalus Mushrooms:
    - Affinity: Force
        - Secondary: Earth
    - Effect: Removes a level of exhaustion and gives 1D6 temporary HP.
    - Habitat: Dense forests or jungles with lots of hardy life.
    - Features: A deep brown and green mushroom with a camouflage like pattern, it's underside is a dark sand yellow with a ribbed texture.
- Bloodwood Sap:
    - Affinity: Blood
        - Secondary: Wood
    - Effect: Able to heal wounds or repair damage to organic structures or organisms.
    - Habitat: Found in Bloodwood Trees which often grow in an area with lots of dead bodies.
    - Features: A deep red colored sap that looks like it carries small crystals within.
- Corpse Flower:
    - Affinity: Wood
        - Secondary: Necrotic
    - Effect: The flower gives off toxic fumes and is extremely poisonous but if prepared correctly can restore decades of life to someone.
    - Habitat: Grows from a living corpse.
    - Features: This flowers root system ingrains itself into the bodies blood system until replacing it completely.
- Brain Cactus:
    - Affinity: Psychic
        - Secondary: Wood
    - Effect: Able to sense the emotions of plants or other psychic attuned beings.
    - Habitat: Forms underwater within an oasis within a barren dessert.
    - Features: a cactus with a brain like structure, ridges and grooves allow the water to flow in fascinating patterns.

Runes:

More focused on quick assembly and one time usage
Limited by amount created at one time, one time usage,

Rune Carving:
Runes can be inscribed on any surface, however they are not restrained to stationary objects. Weapons or other equipment can be inscribed with runes, however they fade after its use.

Runes are much simpler than Wards, consisting of only a few glyphs instead of dozens. They typically only consist of one affinity, although there are exceptions that can contain more.

You must be proficient in Rune Carving in order to create them. Anyone can use a Rune that has already been carved.

You can create a Rune a number of times equal to your level, if you exceed that number then the first rune you scribed loses its power.

- A level 3 Rune Scribe can carry 3 Exploding Runes and 3 Blinding Runes.

To form a Rune you must make a Rune Craft check, DC equal to 10 + Glyphs.

- Your Rune Craft modifier is equal to your **WHI** modifier + Your Proficiency.
- Your Rune Save DC is equal to 10 + Rune Craft Modifier.

Learning Runes:
Learning a rune is a difficult process that involves a Rune Scribe's full attention and willpower. Runes are basic forms of magic that do not function on their own. A Rune Scribe must understand the Glyphs relationships with each other during the scribing process. With each Glyph they insert a piece of their Will.
Learning Runes is primarily based off studying the Glyphs that make it up. Each Glyph added to the rune increases the difficultly of learning and scribing it.

- Once you attempt to learn a Rune you must first inspect the scribes lines, how they connect and where, what Glyphs come together to form this particular Rune. Make an Investigation check, DC equal to 8 + (Glyphs x 2.)
- Next you must comprehend the meaning and relationships between these Glyphs. Make an insight check, DC equal to 10 + (Glyphs x 2.)
- Lastly you must scribe the Rune yourself to complete the understanding and lock the formation within your minds eye. Make a Rune Craft check equal to 12 + (Glyphs x 2.)

Carvings

Runes:

- **Accuracy:**
  - Effect: Any weapon inscribed with this Rune allows the wielder to double their proficiency.
  - Duration: 1 minute per level

    - Glyphs: 1
    - Affinity: Psychic
- **Bind**:
    - Effect: The creature affected by this Rune must make a **MIG** saving throw or become grappled by the Rune.
    - Duration: 1 round per level
    - Glyphs: 4
    - Affinity: Earth
- **Blind**:
    - Effect: The creature that activates this rune must make a **WHI** saving throw or become blinded for the duration. They may make a saving throw at the end of each of their turns.
    - Duration: 1 minute per level or until saved
    - Glyphs: 3
    - Affinity: Psychic
- **Disguise**:
    - Effect: Allows the item or creature to look as though they belonged and seem totally normal. Creatures who wish to see past the glamour must make a **CHA** saving throw to do so.
    - Duration: 1 minute per level
    - Glyphs: 4
    - Affinity: Psychic
- **Echo**:
    - Effect: A sound of the Rune Scribes choice echos from the Rune out up to 100 feet. The rune scribe can decide to set this rune up in a few different ways:
        - Ambient: any noise made within 5 feet of the Rune become amplified.
        - Recorded: Rune Scribe sets a recorded message that plays when activated.
        - Linked: The Rune Scribe links all of these Runes together allow them to talk through them (like a mic and speakers.)
    - Duration: 1 hour per level
    - Glyphs: 2
    - Affinity: Air
- **Explode**:
    - Effect: Can be scribed on a surface or weapon. When activated by either getting stepped on or hitting an enemy there is a flash of light and an explosion takes place causing every creature in (5 feet per level) to make a **GRA** save or take 2D6 fire damage.
    - Duration: Instantaneous
    - Glyphs: 4
    - Affinity: Fire
- **Illuminate**:
    - Effects: The Rune emits a light that can be adjusted up to (5 x level) feet. It may be switched on and off for the duration.

    - Duration: 1 hour per level
    - Glyphs: 1
    - Affinity: Fire
- **Mend**:
    - Effect: With this Rune objects and items will mend themselves overtime even if this Rune was broken as well.
    - Duration: 1 Day per level
    - Glyphs: 3
    - Affinity: Water
- **Phase**:
    - Effect: The object inscribed with this Rune can temporarily Phase through a type of substance the Rune Carver specifies beforehand. Flesh, Stone, Metal, Wood, etc. Can pass through 5 feet of the material per level.
    - Duration: 1 min per level
    - Glyphs: 5
    - Affinity: Force
- **Quicken**:
    - Effect: The speed of the object or creature empowered by this rune gains +1 to initiative and +10 movement speed.
    - Duration: 10 minutes
    - Glyphs: 2
    - Affinity: Air
- **Reflect**:
    - Effect: Magic effects and spells have a chance of being reflected off the creature, object, or surface. If a magic attack does not beat the AC of its target then it has a (5% x level) chance to reflect off and hit the original caster.
    - Duration: 1 round per level
    - Glyphs: 7
    - Affinity: Force
- **Reinforce**:
    - Effect: The AC of the object or creature empowered by this rune increases by +2, additionally they gain a Hardness equal to the Rune Scribes level.
    - Glyphs: 3
    - Duration: 1 minute
    - Affinity: Earth
- **Siphon**:
    - Effect: The creature affected by this Rune has their life force drained away and transferred to the Rune Scribe. They must make a **WHI** saving throw or take (2D6 per level) necrotic damage. The Rune Scribe gains temporary HP equal to half the damage dealt.
    - Duration: instantaneous
    - Glyphs: 5
    - Affinity: Necrotic

Wards:

A stationary construct made of a vast amount of glyphs; can be made in different configurations to perform different functions when activated.

- Does not have to be circular in composition, but the ends must connect someway (like a closed system or circuit.)

Composed of a multitude of different factors that can greatly alter the purpose, design, and power. Wards are complex combinations of Glyphs laid out to form a repeating pattern or structure.

You must be proficient in Ward Crafting in order to learn, create, and break them.

Ward Dice:
Ward dice are used to either Learn or Break a Ward. You have a pool of D6 that can increase in various ways.

- Any spellcaster gets 1D6 at every odd level.
- Having a **+5 GRA** or **TAC:** 1D6
- Magical Discipline is Wardcraft: +2D6
- Being Proficient in Rune Scribing or Enchanting: +1D6
- Any other ability or magic item that gives additional dice.

Learning a Ward:
You may learn a Ward through understanding or by copying. Either way will provide the same outcome.

- *Understanding* is much faster, only requiring you to roll your Ward Dice in an attempt to beat the Ward DC, equal to *Ward Complexity x 2,* to learn it.
- *Copying* takes an amount of hours equal to half the Wards Complexity, but requires no rolls.

Breaking a Ward:
Roll your Ward Dice in an attempt to beat the DC, then refer to the chart for the outcome. DC = Ward Complexity x 2.

Rolled:	Outcome:	Time Spent:
Failed by 10+	Ward is triggered once before turning dormant, a wild magic surge occurs, and the Crafter knows it's been tampered with.	30 min x Ward Complexity
Failed by 5+	Ward turns dormant for a number of minutes equal to half your level, but the Crafter knows it's been tampered with.	15 Minutes x Ward Complexity

Meet DC	Ward turns dormant for a number of minutes equal to your level.	5 minutes x Ward Complexity
Succeeded by 5+	Ward is broken.	1 Minute x half Ward Complexity
Succeeded by 10+	Ward is under your control.	1 Second x half Ward Complexity.

Ward Effect DC:

- Ward effect DC = Ward Dice + TAC + 8

Inscribing a Ward:

- You may scribe any Ward you know.
- When changing aspects of a ward, like Degradation or Duration, you must relearn the ward if the complexity changed.
- When inscribing a Ward you must decide its radius and type of activation.

Radius:

The Ward Crafter may decide how large of an area they wish the ward to encompass. The larger the size the more time it takes to inscribe.
The time it takes to scribe a ward depends on its complexity and the radius of the ward:

- Per 10 feet: 1 minute per complexity
- Per Mile: 8 hours per complexity

Active vs Dormant Wards:

Active Wards:

- You may have a number of active Wards overlapping equal to your **WHI** modifier.
- A Ward Scribe can have a number of active wards equal to their level + **WHI**. Exceeding this number causes the first Ward activated to go dormant.

Dormant Wards:

- Although dormant, they can turn active in an instant.
- The ward is made of simple, mundane glyphs that are waiting to be activated. You cannot use detect magic to locate a dormant ward due to this.

Activation:

To turn a ward from a dormant state into an active state. There are a few different ways to activate a ward:

- Completion:
  - Upon scribing the Ward it activates.
- Remote:
  - The ward waits in a dormant state until the Ward Scribe uses a free action to activate it.
- Primed:

    - The next creature or object (Ward Scribes choice) to come within the Wards Range activates it.
- Trigger:
    - The Ward Scribe sets an action or other trigger that will activate the Ward.

Ward Complexity:
How complicated a Ward is to break or learn.
- *Ward Complexity = Degradation + Duration + Formation + 2 per Affinity*

Degradation:
This determines how many times a Ward can be used before it destabilizes and its scribed lines corrode.

Degradation:	Complexity:
Level	1
Level per Year	2
Level per Month	4
Level per Week	8
Level per Day	12

Duration:
How long a Wards effect will last each time it is activated. This can vary from an instantaneous effect to an effect that lasts days, months, or even years. Refer to the chart to see how changing the duration effects the complexity:

Duration:	Complexity:
Instantaneous	1
1 Round per level	2
1 Minute per level	3
1 Hour per level	6
1 Day per level	10
1 Week per level	15
1 Month per level	20

1 Year per level	30

Affinity:
Wards may also have an Affinity granted to them which gains some benefits, all good Ward Crafters have found a way to do so. The exception being for spells, which the Ward will take on the natural affinity of. For each affinity you add, increase the complexity by 2.

Air:
- It takes half as long to inscribe this Ward.

Water:
- You may change the Degradation and Duration by one increment each.

Earth:
- All creatures within, of the Wards Crafter's choice, gain AC equal to your Ward Dice.

Fire:
- Increases effect DC by Crafter's proficiency.

Psychic
- Anyone who passes your Ward must succeed a WHI saving throw, against your Ward Effect DC, or they forget that it existed.

Force:
- Whenever the Ward is triggered, it acts as though it was triggered twice.

Shadow:
- Ward turns invisible where shadow overlaps its radius.

Light:
- When active, the Ward blocks line of sight for creatures outside its radius.

Necrotic:
- Ward deals a number of D6, equal to your Ward Dice, of necrotic damage to creatures within, of the Ward Crafter's choice, each round it is active.

Radiant:
- Ward gives a number of D6, equal to half your Ward Dice, Temporary HP to creatures within, of the Ward Crafter's choice, each round it is active.

Formations

- Alarm:
  - Ability: When a creature not designated by the Ward Scribe comes within its Range the Ward Scribe is immediately notified and can have a sound or other sensory effect take place within the radius to alert others.
  - Complexity: 1
- Attention:
  - Ability: Able to draw or disperse attention from outside viewers. A creature with line of sight to the Ward must make a WHI saving throw. On a success nothing happens, on a failure:
    - **Draw:** Creatures gain the Dazed condition, the -5 to perception does not apply to looking at the Ward.

        - **Disperse**: Creatures take a -10 to perception when attempting to observe the Ward or objects/creatures inside of it, they are also compelled to feel like nothing is wrong or out of place where the Ward was scribed.
    - Complexity: 4
- Barrier:
    - Ability: You create a wall of force that repels a type of substance:
        - **Solid Barrier**: Blocks solid objects from passing through.
            - AC equal to 12 + Level + Spell Casting Ability Modifier.
            - Hardness equal to Level x 2.
            - Hit Points Equal to Level x 15
            - Can be broken by a **MIG** check, DC equal to 20 + Ward Scribes Level, or by being under weight exceeding Level x 100 pounds.
        - **Liquid Barrier**: Blocks liquids from coming inside the Radius.
            - Can be broken by a weight exceeding Level x 200 pounds.
            - Liquid Based creatures and attacks treat the shield as though it were a Physical Barrier.
        - **Gaseous Barrier**: Blocks all gases from entering or exiting the radius. (This will cause someone to suffocate eventually.)
            - Can be broken by weight exceeding Level x 500 pounds.
            - Gaseous based attacks and creatures treat the shield as though it were a Physical barrier.
    - Complexity: 3 per Barrier type
- Cloak:
    - Ability: All creatures and objects the Ward Scribe chooses within the radius become invisible. All noises that travel from outside the radius are deafened.
    - Complexity: 3
- Confuse:
    - Ability: Any creature, not designated by the Ward Scribe, that enters the radius must make a **CHA** saving throw, on a failure they gain the Confused condition. This lasts until they succeed on the saving throw.
    - Complexity: 2
- Float:
    - Ability: A creature that walks within the radius must make a **GRA** saving throw or else they float upwards a number of feet set by the Ward Scribe (no more than 10 feet per level.) They are suspended for the duration, after which they harmlessly float to the ground.
    - Complexity: 1
- Rebound:
    - Ability: A repelling force spreads out of the Ward causing each target within range to make a **MIG** save or be forced back a number of feet, equal to <u>Ward Scribes Level x 10</u>, and fall prone. On a success they are knocked back half the distance and do not fall prone.
    - Complexity: 3
- Seal:

    - Ability: When a creature comes within the radius of this Ward they must make a WHI saving throw, on a failure they immediately become sealed within. The creature cannot move, speak, use mental abilities, or any other spell like effects. Creatures with an amount of hit dice exceeding the Ward Scribe gain a +5 bonus to the saving throw, while creatures with less hit dice suffer a -5 on the saving throw.
    - Complexity: 8
- Shield:
    - Ability: All creatures the Ward Scribe chooses within the radius gain a bonus to AC and saving throws equal to your proficiency.
    - Complexity: 1
- Spike:
    - Ability: Creatures that come within the radius are attacked by piercing spikes, made out of whatever material the Ward was scribed on, forcing every target to make a **GRA** save or take 1D6 piercing damage, on a success they take half damage. This formation repeats each round it is active.
    - Complexity: 1
- Trap
    - Ability: When a creature, not designated by the Ward Scribe, comes within the radius of this Ward they become trapped within. The walls have an AC of (15 + Level), Hardness equal to (2 x Level), and HP equal to (10 x Level.) Alternatively the creature trapped can make a **MIG** save vs the Ward Complexity + level, on a success they manage to break out.
    - Complexity: 5
- Embed a Spell:
    - Ability: Expends a spell slot to embed a spell into the Ward. Once a Ward with an embedded spell has activated it must be recharged by expending a spell slot of the same tier.
    - Complexity: equal to spell tier

Familiars:

Familiars are an important companion to many adventurers. They serve as a powerful ally. Unfortunately all familiars are not made equal, as such they are divided into tiers.
Familiars can rise in might and change tiers as they become more powerful.

Tier	**Abilities/Bonuses**	**Hit Dice:**
Critter	1	1–2
Beast	2-3	3–4
Spirit	4	5–6
Mythic	4-5	7–8

Sovereign	6	9–10

Aside from tiers that determine their power, there are two tiers that determine quality.

- Common, meaning a standard companion of whatever species they are.
- Unique, holds some special qualities and traits that are either dormant in its species or from something new altogether.
- Below are some examples of creatures within each tier.

Common:

- Rat
    - Able to crawl into small places
    - Grants a +2 when making Nimbleness checks.
    - Hit die: D4
- Cat
    - Can climb to high places and keep an eye out.
    - Grants a +2 to Face checks.
    - Hit die: D8
- Bat
    - Can find it's way in the dark.
    - Grants +2 to hide checks.
    - Hit die: D4
- Spider
    - It's webs can detect when they are stepped on
    - Grants a +2 to face.
    - Hit die: D4
- Snake
    - It's venom is dangerous to those without resistance
    - Grants a +2 to persistence checks.
    - Hit die: D6
- Raven
    - It's skyward view can improve the sight of its companion
    - Grants a +2 to astuteness checks
    - Hit die: D6
- Dog
    - Its keen senses can detect the intent of others.
    - Grants +2 to astuteness checks
    - Hit die: D10
- Lizard
    - It's speed in climbing is not to be underestimated
    - Grants a +2 to Flexibility checks
    - Hit die: D8

Unique:

- Vermin

    - A tricky creature that is very slick.
    - Grants a D6 reroll when lock picking.
    - Hit die: D6
- Fox
    - A sneaky ally able to aid in sabotage
    - Grants +2 to face and hide checks.
    - Hit die: D6
- Leech-wing
    - This vampiric creature will drain its victims of all their blood.
    - Grants a D4 of temporary HP once per short rest.
    - Hit die: D4
- Tarantula
    - Its webs can help stitch together wounds and cuts.
    - Grants a +2 to Creativeness checks. Once per long rest you can automatically stabilize a creature.
    - Hit die: D4
- Cobra
    - It's venom can kill an elephant
    - Grants a poison effect to a weapon once per short rest, DC 10 + Level or target is poisoned.
    - Hit die: D8
- Crow
    - A loyal companion that can recognize foes and friends at a glance
    - Grants a +2 to intuition and astuteness checks.
    - Hit die: D6
- Wolf
    - A loyal companion that can hold its own in battle
    - When adjacent to its companion they both gain Pact Tactics, granting advantage to hit an adjacent target.
    - Hit die: D12
- Wyrmling
    - It's small now but contains the blood of Dragons, give it time.
    - Grants a +2 to Arcana checks
    - Hit die: D10

Chaos Magic:

<u>Chaos Magic Chance:</u>
Sometimes spells or other magical effects do not go as intended and have a chance of malfunctioning. When this happens you may roll a Chaos Magic Chance:

- Roll a D100 and consult the chart to decide if the magical effect caused a Chaos Magic Surge.
    - Unlikely it will: 5%

        - *We're probably fine*
    - Low Chance: 20%
        - *Things might get bumpy*
    - Medium Chance: 50%
        - *Risk it for the biscuit*
    - High Chance: 80%
        - *We done goofed*
    - Unlikely it won't: 95%
        - *We're probably dead*

<u>Chaos Magic Surge:</u>

When magic goes haywire you may consult the chart to determine what magical effect takes place. Roll a D20 once for each table to determine what happens during the Chaos Magic Surge, putting the combination of words together in whatever way you see fit.

- Chaos Magic is a chaotic force that is ever changing and growing. Due to this it is up to the GM and Players to infer what the effects are.
    - This allows Chaos Magic to feel more unique and in the moment, also allowing for more random effects to occur.
    - Certain attributes are up to the GM and players to decide, with the GM having any final say.
- The GM should decide the severity of the Chaos Magic Surge, and then choose the columns they deem appropriate for the player to roll on.
    - Alternatively you can roll a D6
        - 1/2/3: Mild
        - 4/5: Wild
        - 6: Chaos

<u>Target D6</u> (optional, most fun to roll last):

1. Self
2. Object
3. Ally
4. Enemy
5. AOE
    - Radius: 3D8 x 5 Feet
6. Terrain
    - Radius: 6D10 x 5 Feet

	—Mild—	—Wild—	—Chaos—
1	Seldom	mindfully	Frantically
2	Simply	Secretly	Frequently

17	Cloud	Ruin	Forest
18	Cut	Slice	Angel
19	Burn	Scorch	Demon
20	Shout	Bellow	Devil

Class Abilities:

A list of sample abilities are listed down below. They can be taken and changed depending on the level of play, or even made into a new subclass. They can also be used as rewards for completing Quests.
Abilities are split into three main sections: Martial, Spellcaster, and General. These are only to organize the abilities and allow someone to quickly find them.

- GMs may want to rule that Spellcasters and Martial classes are banned from taking Abilities within their counterparts category, but this is up to their world and style of game.
- Abilities all have a level next to their name, this is meant to be a suggestion and guideline for players and GMs. An ability that is overpowered for some campaigns can be next to useless in others.

Martial Abilities:

Level 1

- **Aiding Presence**:
    - As a Quick Action you can aid a number of creatures equal to your Level within 30 feet, their next ability check or attack roll gets a bonus equal to your Valor modifier. A creature can only gain this benefit once per long rest.
- **Battle Orders**:
    - When you roll initiative you can switch the initiatives of two party members (yourself included).
- **Conquering Strike**:
    - Once per Day, you can deal an extra 2D6 on your next melee attack that hits. The target must make a WHI saving throw or they suffer disadvantage on all attacks made against you.
- **Defying Strike**:
    - Once per encounter, when an enemy makes a melee attack against you, you can use an Interrupt to meet them head on, both you and the enemy make attacks against each other, both having advantage.

- **Dog Piled**:
    - Once per encounter, when you hit an attack you can deal an extra D4 of damage for every enemy within 5 feet.
- **Fighting Presence**:
    - When you hit a melee attack against a creature you can choose to Mark them.
- **Fighting Devotion**:
    - Your devotion has reached new heights allowing you to remain determined and focused.
    - As a quick action you can attack a creature marked by you.
- **Focused Attack**:
    - You can choose to make one attack at advantage for this round, however until the start of your next turn you are unable to use an Interrupt.
- **Iron Punch**:
    - Your unarmed strikes deal 1D6 + MIG or VIG bludgeoning damage.
- **Lightweight**:
    - Gain +10 movement speed while not wearing heavy armor.
- **Marking Save**:
    - A creature marked by you suffers -1D6 against all saving throws made against you.
- **Marking Skill**:
    - When you mark a creature they suffer a -1D6 penalty to all skill checks.
- **Persistent Will**:
    - Once per short rest when you fail a saving throw or miss an attack roll, you can add your WHI to the roll, potentially turning a failure into a success.
- **Resilient**:
    - When you roll hit dice during a short rest you can roll twice and take the better result on each die you spend.
- **Recovering Spirit**:
    - As a Quick Action you can expend a Hit Die and gain HP equal to the amount rolled + VIG.
- **Reinforcement**:
    - When you are hit by an enemy's attack you can use your Interrupt to roll your Weapon Die + VIG and subtract that amount from the damage.
- **Steel Dome**:
    - As an action you can end a mind affecting or charm/spell effect.
- **Shield Adept**:
    - trained in shields.
- **Try Again**:
    - Once per day, if your Martial Die would Decrement you may reroll it.
- **Critical Strike**:
    - When you roll your weapon damage dice on an attack and add on more dice (through ability or otherwise), you may add extra damage equal to double the number of added dice.

        - (ie. Vuli, the Hantu Hound, crit on their attack roll, they add 8 more D6 on top of their regular damage dice, they add 16 points of damage to the roll. Abilities or Maneuvers that increase the amount of dice you roll would also trigger this effect.)
- **Pummeling Grapple**:
    - While you are grappling a creature, you may still use your full movement and attack other targets.
- **Speedy**:
    - After you use a Maneuver, you may move up to half your speed.

Level 2

- **Armored Body**:
    - Your body becomes hardened and reinforced.
    - You have advantage on MIG saving throws.
    - While you are not wearing armor your base AC becomes 14+ GRA or VIG (doesn't stack with unarmored defense).
- **Athletic Burst**:
    - Once per short rest instead of rolling for a MIG check you can use (10 + your skill bonus) for the roll instead.
- **BANK! Or BUST!**:
    - When you roll your attack damage you can choose to reroll all 1s. However, if you end up rolling another 1, all attack dice damage becomes 1.
- **Battle Tactician**:
    - When you make an attack against an enemy you can choose to "mark" them, when you mark a creature this way you gain a +1D4 to hit them. You can only mark one creature at a time like this.
- **Be the Blade**:
    - Choose one weapon to become an extension of your body.
    - Attack rolls made with it gain a +1D4 to hit.
- **Blood Thirsty**:
    - When a creature becomes bloodied you can use your Interrupt to make one melee attack against them.
- **Psyche Out**:
    - Once per short rest, when you are hit by an enemy you can force them to make a Whit saving throw, on a fail they have disadvantage on all attacks they make until the end of their next turn, on a success only their next attack has disadvantage.
- **Charger**:
    - Always ready to wade out into battle, you enjoy rushing into the fray.
    - You can charge as a movement instead of an action, when you do so increase your speed by 10 until the end of this turn.
- **Cursing Fate**:
    - As an Interrupt, when a creature within 30 feet succeeds on an attack roll, saving throw, or skill check you can subtract your Whit from the target's roll.
- **Concealing Aura**:

    - Once per short rest, when you make a hide check you can give yourself advantage.
- **Dazzling Presence**:
    - Once per Day, you can force all creatures of your choice within 30 feet to make a **WHI** saving throw or become dazed until the end of their turn.
- **Draining Strike:**
    - When you strike a creature you can deal an additional D4 of necrotic damage, you gain temporary HP equal to the amount of necrotic damage dealt.
- **Enhanced Focus:**
    - Once per short rest, as a Quick Action you can increase your attack and damage rolls by your WHI or TAC modifier until the end of this round.
- **Extra Attack**:
    - When you take the attack action you can make another attack as a part of that action.
- **Featherweight**:
    - While you are not wearing armor your speed is increased by +20 feet.
- **Fortuitous Luck**:
    - Once per short rest, If you fail a skill check you may add one D6 to the check possibly turning a failure into a success.
- **Frenzied Attack**:
    - At the beginning of your turn you can choose to have advantage on all attacks you make on your turn, however all attacks made against you also have advantage until the end of this round.
- **Frenzied Cry**:
    - Channel your rage into a weapon of destruction and lay waste to your foes.
    - Once per Day, you can battle cry forcing all enemies that can see or hear you within 60 feet to have disadvantage on attack rolls not made against you until the beginning of your next turn.
- **Hearty Taunt**:
    - Each creature of your choice that can hear you within 30 feet becomes Marked by you.
    - For each creature marked in this way you gain 1 Temporary HP.
- **Kinetic Burst**:
    - As an <u>Interrupt</u> you can choose to let out a burst of force, you immediately <u>Mark</u> a number of creatures within 5 feet equal to your **MIG**, the marked creatures take force damage equal to (**MIG** + Level).
- **Luck of the Dodge**:
    - You can use your good fortune to avoid danger. When you are hit by an attack, you can use your Interrupt to expend and roll any amount of your <u>Class Dice,</u> subtracting the result from the damage you take.
- **No Pain No Gain**:
    - Choose one type of damage to gain resistance against:
        - Bludgeoning
        - Piercing

        - Slashing
- **Protecting Presence**:
    - As an Interrupt, when an ally within 30 feet makes a saving throw you can add your CHA modifier to the roll. A creature can only benefit from this ability once per Day.
- **Retaliating Strike**:
    - As an Interrupt, when an enemy Marked by you misses their attack roll, you can make a Melee Attack against them.
- **Rushing Fury:**
    - When you make a Charge Attack you can add a D6 to the attack's damage.
- **Shadow Boxing:**
    - As an Action, you sprout shadowy visages of your arms that hover beside them. Whenever you make an Unarmed Attack against a target your shadows will attack that same target with a new Attack Roll.
- **Striking Range**:
    - When a creature comes within your melee weapons attack range you can use an Interrupt to make one Melee Attack against them.
- **Striding Attack**:
    - When you use your Movement before making an Attack that is not a Charge, you gain a +1 to hit for every 10 feet you move.
- **Stone Skin**:
    - Once per short rest, as an Interrupt you can roll your Hit Die and add it to your AC until the beginning of your next turn.
- **Soothing Rest**:
    - Whenever you finish a short rest you and a number of allies up to your CHA modifier within 30 feet gain temporary HP equal to half your Level (min.1) + CHA.
- **Tactical Shout**:
    - As a Quick Action you can call out to any ally, they may use their Movement as an Interrupt, provoking no attacks of opportunity. An ally can only gain this benefit once per Day.
- **Tag In**:
    - As an Interrupt, when a creature Marked by you makes an Attack against an ally within 5 feet of you, you can swap places with that ally and have the attack target yourself instead.

Level 3

- **Battle Hungry**:
    - For each enemy that exceeds the number of your allies within 15 feet you may take an extra attack.
- **Boundless**:
    - You gain advantage on all **MIG** Skill Checks and Saving Throws.
    - Once per round, if you miss a **MIG** based Melee Attack you can choose to reroll it at Disadvantage.
- **Critical Recharge**:

    - Whenever you roll a 20 on an Attack Roll you can Increment your Martial Die.
- **Exhausting Blow**:
    - The next Attack you hit deals an extra 3D10 and you gain a level of Exhaustion.
- **First Strike**:
    - Your first melee attack each turn has advantage, you also gain advantage on Attacks of Opportunity.
- **Gallant Strike**:
    - As an Interrupt, when a creature marked by you makes an attack against an ally within 30 feet you can move up to your speed towards that creature, if you end adjacent to the marked creature you can make an attack against them. For every attack of opportunity you took while moving your target takes 1D6 additional damage.
- **Heroes Action**:
    - Once per Short Rest, you can take an extra Action during combat.
- **Ki Armor**:
    - Once per Short Rest, as a Quick Action you can increase your **AC** by your Martial Die + **VIG** until the start of your next turn.
- **Marking Strike**:
    - A creature Marked by you suffers -1D6 to its **AC** against your Attacks.
- **Point Blank Sniper**:
    - Your accuracy with ranged weapons is close to mastery.
    - You no longer have disadvantage on ranged attacks when an enemy is within 5 feet of you.
    - You no longer suffer attacks of opportunity when making ranged attacks within melee.
    - Additionally, enemies do not benefit from ½ or ¾ cover when they are within 30 feet of you.
- **Potential Charge**:
    - When you hit with a melee attack you start to build a Potential Charge within your weapon, your next Attack gains a +1 to its Attack and Damage Rolls. This stacks with each hit maxing at a +3.
    - Each time you miss or do not take an Attack against a creature your Potential Charge lowers by one.
- **Resilient**:
    - You gain 10 max HP.
    - You also gain advantage on **VIG** Saving Throws and Skill Checks.
- **Shifty Duelist**:
    - Your superior battle technique allows you to move freely around the battlefield.
    - After you hit an enemy you can Shift 10 feet.
    - When you dash enemies have Disadvantage on Opportunity Attacks.
- **Sound Mind and Body**:
    - Advantage on Might and Whit Saving Throws.
- **Stunning Ki:**

    - Once per Short Rest, as a part of an Attack you can force an enemy to make a **VIG** saving throw, on a failure choose an effect: Blinded, Deafened, or Dazed.
    - If they fail your DC by 10 or more they are Stunned until the beginning of your next turn.
- **Shadow Shift**:
    - While you are within **dim light** or **darkness** you can use a Quick Action to teleport to another space of dim light or darkness within your Movements range. You can only move half your Movements after using this ability.
- **Smiteful Mark**:
    - You can deal an extra 2D6 of **radiant damage** each time you hit a Marked creature on your turn.
- **Trampling Strike**:
    - When you hit with a Charge Attack you can force your target to make a **MIG** Saving Throw, on a failure they're Knocked Prone and you're able to take an additional Attack as a Quick Action.
- **Wrath**:
    - Able to make a **Face** check as a part of an Attack, you're able to use **Might** instead of **Charm**. If the check is successful, DC set by the GM, your target becomes Frightened until the end of your next turn.
    - You gain Advantage on **Might** saving throws and Disadvantage on **Whit** Saving Throws.

Level 4

- **Divine Sense**:
    - As an action you can gain blindsight of 20 feet for a number of hours equal to your Level.
- **Emulate swordplay**:
    - When you see a creature use a Martial Ability that uses a weapon you can make a Focus check, the DC equal to 15 + creature hit dice, you can then emulate that Ability until your next short rest. You can only emulate one ability at a time
- **Grounding Presence**:
    - Before an ally, within 30 feet, rolls a CHA, TAC, or WHI saving throw, you can use your Interrupt to have them succeed. You can use this once per Short Rest.
- **Heroes Surge**:
    - As a quick action you can call out to your allies within 30 feet, all allies gain temporary HP equal to your level as well as giving everyone advantage on one saving throw, ability check, and attack roll made before the start of your next turn
- **Rest is for the dead**:
    - When you are knocked down to 0 hit points you can make a Persistence check with a DC equal to 10 + ½ damage taken, on a success you are instead knocked to 1 hp.
    - Whenever you use this ability the DC increases by 2, resetting on each Day.
- **The Shield**:

    - You have become the protector for your party. All party members within 5 feet gain an additional bonus to their AC equal to half the bonus you receive from your shield.
    - Also, you can make a shove attack with your shield using your quick action doing 1D6 + MIG bludgeoning damage.
- **Unaware**:
    - You gain Resistance to Psychic damage and advantage on Saving Throws from Psychic effects.

<u>Level 5</u>

- **Mindless**:
    - You are immune to charms or any other mind affecting ability.
    - You gain resistance to psychic damage.
- **Observational**:
    - You can learn a new Maneuver from just observing a Technique, Attack, or Maneuver-like Ability by making a skill check DC equal to 10 + Maneuver Tier.
- **Rising Armor**:
    - Raise your Armor class by 1 for each turn you do not make an attack or force a saving throw. This resets at the end of an encounter or when you Attack or force a Saving Throw.
- **Shadow Skulker**:
    - your stillness of body and mind has given you unnatural sneaking abilities. You have advantage on all stealth checks made in dim or darker light.
    - You may reroll 1s (once) on your Hide Checks.
- **The Fray**
    -

<u>Level 6</u>

- **Last Counter**: 6
    - When an enemy attacks you when you have less than (VIG + Level) of your HP left, you can use an Interrupt to make a Melee Attack against the attacker. On a hit you automatically crit. Once per Day.
-

Spell Caster Abilities:

<u>Level 1</u>

- **Blessed Boon**:
    - Whenever you take damage of the same type as your Affinity you gain temporary HP equal to 1D6 + **WHI**.
- **Blue Mage**:

    - Your study of the defensive magical arts has strengthened your battle prowess. You can cast shield, without rolling your Spell Die, a number of times equal to your proficiency modifier.
    - Mage armor becomes a known spell for you and when you cast it your AC becomes 15 + GRA.
- **Black Mage**:
    - your black magic grows stronger, undead will no longer attack you unless you provoke them first or they're being controlled.
    - You can cast Inflict Wounds a number of times equal to your proficiency modifier without rolling your Spell Die.
- **Empathetic Concentration**:
    - While concentrating on a spell that targets another creature, you gain advantage on all concentration checks.
- **Light Armor Adept:**
    - Gain Proficiency in Light Armor.
- **Magical Discipline**:
    - Gain another magical discipline.
- **Medium Armor Adept**:
    - Gain Proficiency in Medium Armor.
- **Proficient Healer**:
    - You gain proficiency in the Astuteness skill. During a short rest you can expend a use of a healer's kit and heal the max on a number of spent Hit Dice equal to your WHI modifier. Once you use this ability you cannot use it until you finish a long rest.
    - You can also use this on your allies, allowing them to spend their own Hit Dice.
- **Potion Brewer**:
    - Brewing potions requires ½ the total cost in materials to make. The time it takes to brew a potion is equal to one hour for every 100 gp spent (minimum brewing time of one hour). Gain proficiency with Alchemist Tools.
- **Ritual Casting:**
    - Proficient ritual casting.
- **Red Mage**:
    - Your spells become more powerful against the foes foolish enough to challenge you. Whenever you cast a spell that deals damage you can add 1D6 of force damage onto it, you can use this a number of times equal to your TAC modifier.
    - You can cast Magic Missile once per Day as a Quick Action without rolling your Spell Die.
- **Urgent Operation**:
    - Whenever you administer magical healing to an unconscious creature you can maximize the amount given. You can use this once per Short Rest.
-

<u>Level 2</u>

- **Arcane Casting**:

    - TAC can be used for your spellcasting modifier.
    - You can prepare a number of additional spells equal to half your Focus modifier.
    - Choose a magical discipline, the time and money it takes to learn new spells of this discipline are halved.
- **Bloody Recovery**:
    - When you or a creature within 15 feet becomes bloodied you can add 1D6 to your pool of blood dice. As an Action you can spend a number of blood dice to heal a creature for the amount rolled. Your pool of blood dice has a max equal to your Level and resets each Day.
    - You gain a new Trigger for your Class Dice pool: Whenever a creature within 15 feet becomes bloodied.
    - You gain a new Interrupt for your Class Dice pool: Roll any number of your Class Dice and heal a creature within 30 feet for that amount.
- **Alchemical Buffer**:
    - Every time you drink or administer a potion you can give 1D6 + TAC temporary HP.
- **Battle Strike**:
    - Every time you miss on an Attack or get hit with a Critical Attack, add 1D6 to your next Melee Attack that hits.
- **Bonded Kin**:
    - As an Action you can choose to bond with a willing creature, while bonded you share damage taken (split it between) and you are able to cast spells on that creature as long as you're on the same plane. The bond lasts until dismissed or one of you dies. You can only be bonded to one creature at a time.
- **Elemental Blessing**:
    - Choose an Elemental Affinity, you gain that Affinity and become resistant to that type of damage. You also gain one of the abilities below:
        - Water: Give a number of creatures equal to your **VIG** temporary HP equal to 1D6.
        - Earth: Give one creature +1 AC for one hour.
        - Fire: Increase one creature's attack and damage bonus by +1 for one hour.
        - Air: Increase one creature's speed by 15 feet for one hour.
- **Life Drain**:
    - As an Action you can make a Spell Attack roll against a creature within 10 feet. You choose the Tier and deal 1D6 + **TAC** necrotic damage, healing for the amount of damage dealt. For every tier above first add an additional D6 and an additional 5 feet to the spells range.
- **Mana Recovery**:
    - Once per day, during a short rest you can Increment your Spell Die.
- **Melee Adept**:
    - Gain Proficiency in two Melee Weapons, Power Skill Checks, Light Armor, and Shields.
- **Persistent Sorcery**:

    - Once per Short Rest, when you would lose Concentration on a Spell before the end of its duration, you may keep Concentrating on it instead.
- **Sages Foresight**:
    - Once per Day, if you fail a Skill Check or Saving Throw you may reroll it adding +2 to the new roll.
- **Sweet Talk**:
    - Once per Day, you can charm one person who you have been speaking to for at least a minute, if they have equal or more hit dice than you they must succeed a **CHA** Saving Throw, if they have at least double the amount of hit dice you do then this ability has no effect.
    - They are charmed for a number of Hours equal to your Level. While charmed this way they are friendly towards you and your allies. They will follow your suggestions but won't do anything that could bring them harm.
- **Souls Fate**:
    - As an Interrupt, when a creature within 30 feet dies you can call to it's soul and decide it's fate:
        - Guide: give one creature within 15 feet 1D6 temporary hp.
        - Reap: choose one creature to deal an extra 1D6 on their next Attacks damage.
- **Studious**:
    - You may also learn spells from a spell scroll of any Foundation.
- **White Mage**:
    - you feel the power of the light flow through you. You can cast lesser restoration a number of times equal to your proficiency modifier per Day.
    - When an ally you can see within 60 feet goes down you can use your Interrupt to cast one healing spell within range on them (healing is maxed).

<u>Level 3</u>

- **Arcane Surge**:
    - When a creature rolls a natural 1 on a saving throw against one of your magical effects, any damage they would take is maximized.
- **Affinity Resonance:**
    - When casting a spell with an Affinity matching one of your own, you may add an extra die to the damage/healing roll.
- **Backlash Dampening:**
    - Half the levels of exhaustion that you would gain from casting a spell over your level.
- **Blood Sacrifice**:
    - When a caster is out of spell slots they can sacrifice a bit of their own life to cast a spell. You can cast a spell when you are low or out of slots by expending your own life force. When you do this you take force damage equal to 2D6 per spell point used.
    - This damage ignores immunities and resistances to force damage. Healing spells cannot be cast through these means.

- **Close Caster:**
    - You do not provoke attacks of opportunity when you cast spells in melee.
    - Targets within 15 feet suffer Disadvantage against your Spell Saving Throws.
- **Cursing Hex**:
    - Once per Encounter you can use your Quick Action to hex an enemy within 30 feet. While hexed they have a penalty to saving throws made against your Spells or Abilities equal to your **CHA** modifier.
- **Devil's Eyes**:
    - You channel power from a Devil into your eyes. You now can see through any darkness with a range of 120 feet.
- **Easy Enchantment**:
    - When you cast a spell from the Enchantment Discipline you can do so without having to use verbal or somatic components.
- **Faithful Healing**:
    - When you magically heal a creature you can choose to expend a Class Die to add a 2D8 of temporary HP.
- **Faithful Mark**:
    - Once per short rest you can mark a creature. When a creature is marked this way your Critical Hit Range increases by 1.
- **Heavy Armor Adept**:
    - Gain proficiency in Heavy Armor
- **Primal Strikes**:
    - Gain Proficiency in Unarmed Attacks, they deal 1D6 + MIG Bludgeoning damage.
    - You can channel your Affinity to change the damage type of your Unarmed strikes into your Affinity's type.
- **Primal Smite**:
    - Once per Short Rest, When you hit with a Weapon Attack you can add an extra 2D8 of damage as the same type as your Affinity.
- **Radiant Aura**:
    - You can empower magical healing taking place within 30 feet of you by giving temporary HP equal to your Half Level (min. 1) + Spellcasting modifier
- **Shadehop**:
    - As a Quick Action, while you are within a shadow of dim or darker light, you can teleport to another shadow you can see within 30 feet.
- **Smiteful Strike**:
    - Once on each of your turns you can expend a Class Die to add an extra D8 of Radiant damage on a Melee Weapon Attack.
- **Spell Altering**:
    - Choose one of the options below, when you cast a spell you can change its properties using the option:
        - Quickened Spell (1 point per tier (min. 1)): cast a spell with a casting time of 1 action as a quick action.

        - Twinned Spell (2 points per tier (min. 2) when you cast a spell with a target of a single creature you can instead target 2.
        - Bend fate (1 point per tier (min. 1)): One target of the spell has disadvantage on the saving throw.
        - Warp Space (2 Mana points): manipulate the area of effect for a spell so it bends around allies/objects.
        - Archaic Casting (1 point): Change the damage type of a spell.
        - Lost Memories (2 points): You can recall a past life and remember how to use a certain item, skill, or tool.
            - You gain training/proficiency in that option. This lasts until your next short rest or when you use it again.
- **Sword Mage**:
    - A title bestowed upon those that wield the arcane arts in one hand and the mighty blade in the other. Your weapon can become your spellcasting focus.
    - Once per Short Rest, you can change the casting time of a Spell from an Action to a Quick Action.
- **Wyld Casting**:
    - When you learn a new spell you are not limited by its Spell Tier.
    - When you cast a Spell above your Level you must roll on the Chaos Magic Surge Table.
-

<u>Level 4</u>

- **Beastshape**:
    - Once per Short Rest, you can change part of your form into that of a beast. You can only transfer one part of your body at a time, tales of those who did not heed the words of old are said to never return to their normal forms, losing their minds to the feral instincts of a beast. This form lasts until you dismiss it or take a short/long rest.
        - **Beastial Claws**: Your hands grow claws that deal 2D6 + **MIG** or **GRA** slashing damage. As a Quick Action you can make a melee attack with your claws.
        - **Beastial Maw**: your teeth turn sharp to fangs that deal 1D10 + **MIG** piercing damage. Whenever you bite a living creature you drain its life force and heal for 2D6 hp.
        - **Beastial Legs**: Your legs take the form of a beast. Your Movement speed doubles. You can make powerful kicks with your beast legs; they deal 1D10 + **MIG** bludgeoning damage.
- **Divine Healing**:
    - You can channel your god's healing powers through your body.
    - Whit can be used for your spellcasting modifier.
    - You can prepare an additional number of spells equal to half your Compassion modifier.
    - You always know the Cure Wounds and Healing Word spells.

    - Pick two cantrips and one other spell to learn from your God.
- **Evoking the Elements**:
    - Once per Short Rest, you can cast a tiered spell that is half your level and is the same element as your Affinity without rolling your Spell Die.
- **Elemental Absorption**:
    - As an Interrupt, when taking a type of elemental damage you can store half the amount of damage you took and add it to the next spell attack you make.
- **Foreseen Fortune**:
    - Every time you fail Skill Check you can add 1D6 to a pool of Sage Dice that can be used on any Skill Check. You can choose to use your Sage Dice after you have seen your D20 roll but before you know the exact result. Your pool of Sage Dice reset after a Short Rest.
- **Faithful Recovery**:
    - Once per Day, during a Short Rest you can regain half of your maximum HP.
- **Faithful Servant**:
    - Once per Day, as an Action, you can call a creature back from the dead, choose a body that you can see within 30 feet, it rises under your command until your next Short Rest.
        - Creatures maintain their abilities so long as the undead form would not restrict them from using them.
        - Creatures that could use Maneuvers or Spells are unable unless specified otherwise.
- **Mana Absorption**:
    - As an Interrupt, when someone casts a spell with you as the target, you may try to absorb that spell, make an Spell Casting Ability Check. The DC is 10 + the Spells Level.
    - When you absorb a spell like this you can cast one Spell of Equal Level without rolling your Spell Die. You may only absorb one Spell per Short Rest.
- **Past Life**:
    - Once per short rest you can make a history check to remember a spell that you used in your past life, DC equal to 10 + Spell Tier, on a success you're able to add that Spell to your known Spells until the end of the Day.
- **Primal Burst**:
    - Once per long rest you can double the amount of damage you do with a spell of your chosen Elemental Affinity.
- **Spell Strike**:
    - After you cast a tiered spell you can make a Melee Attack as a part of that Casting.
-

<u>Level 5</u>

- **Affinity Link:**
    - When casting a spell with an Affinity matching one of your own, you may roll your Spell Die twice taking either result.

- **Backlash Protection:**
    - Quarter the levels of exhaustion you would gain from casting a spell over your level.
    - This replaces Backlash Dampening.
- **Black Blood**:
    - You are immune to disease and poison.
    - You may use your blood to create a poison or disease of your choice.
- **Create Gem Golem**:
    - You use a precious gem as a golem core and mold the surrounding elements to form its body. Depending on the size and type of the gem the size and form of the golem changes:
    - Gem Type:

Gem Type	**Form**	**Affinity**
Amethyst	Controller	Psychic
Diamond	Healer	Radiant
Emerald	Defender	Earth
Onyx	Curser	Necrotic
Sapphire	Supporter	Water
Topaz	Attacker	Fire

- **Death Mage**:
    - Undead that you have created through a spell or spell-like effect do not leave your command.
- **Primal Blessing**:
    - You gain an Elemental Affinity as well as a benefit based on that affinity:
        - **Earth**: Resistance to Earth damage. While you are not wearing armor or a shield your <u>AC equals 12 + **GRA** + **VIG**</u>.
        - **Fire**: Resistance to Fire damage. When you hit a spell attack roll against a creature, deal an extra 3D6 Fire damage.
        - **Air**: Resistance to Air damage. Your speed increases by 20 feet. Attacks of opportunity made against you have disadvantage
        - **Water**: Gain resistance to Water damage. You can breathe underwater and move at full speed, unrestricted by the water. Once per turn when you hit an enemy with a melee attack you can force them to make a **MIG** saving throw vs your spell save DC or the next attack on them has advantage.
-

Level 6

- **Empathetic Save**:
    - Every time a target succeeds on a saving throw against you or you fail a saving throw against another creature, add 1D6 to a pool of Empathy Dice. When a target makes a saving throw against your effect you can spend an amount of Empathy Dice and subtract the amount rolled from the target's saving throw. Alternatively, when an ally within 60 feet makes a saving throw, you can spend an amount of Empathy Dice and it add the result.
- **Foresight**:
    - Once per Day, you can roll a d20, you can replace the roll of one creature within 30 feet with the number rolled on that D20.
- **Spell Channeling**:
    - When you make an Attack, you can cast a tiered spell that will target the same creature as part of the attack. You have Advantage to hit the target, or the Suffer Disadvantage on their Saving Throw.
- **Skill for Spells**:
    - You can expend 2 Class Dice to Increment your spell die.

Level 7

-

Level 8

- **Backlash Immunity**:
    - You are immune to the effects of casting a spell over your level.
    - This replaces Backlash Protection
-

Level 9

-

Level 10

-

General Abilities:

Level 1

- **Called Shot:**
    - You declare to the GM where your character is attempting to hit, your attack hit bonus does not benefit from your proficiency modifier. On a successful hit your

enemy is crippled in some way depending on where you hit. Lost eye, mangled arm, deafening them, etc.

- **Con-man**:
    - You have a knack for getting people to buy into whatever you tell them.
    - Gain proficiency in Face
    - Once per long rest you can double your proficiency for one CHA skill check you make.
- **Dedicated Followers**:
    - You gain two followers that are dedicated to you in some way. They will carry your things and will do anything you ask within reason. They will not go into dungeons or other dangerous locations.
    - Both have commoner Stats, but can gain levels when you are 4th level.
    - Should your followers die you must hire, persuade, or otherwise convince another NPC to become your loyal follower.
- **Heavy Armor Adept**:
    - Gain training in heavy armor
- **Inspiring Force**:
    - You become a force of inspiration and hope for your allies. As a quick action, choose one ally within 30 feet to gain 1D6 on their next attack roll, saving throw, or skill check. You can only use this a number of times equal to your **CHA** modifier per long rest.
- **Inspiring Speech**:
    - At the end of a short rest you can give a short speech or meaningful gesture to your party. Choose up to 10 creatures to gain temporary HP equal to your hit die + your CHA modifier.
- **Magnetic Touch**:
    - Your hands become magnetic, able to provide a field that is 5 feet in a cone allowing you to attract any loose metal within that range. You can choose to let the objects touch or hover over your hands.
- **Rising Expert**:
    - choose two skills/tools to gain proficiency in, if you are already proficient in them then you may gain expertise (double the proficiency modifier).
- **Saving Face**:
    - Once per day, before you roll an attack roll, saving throw, or skill check you can add a +1 to the roll for every ally within 30 feet.
- **Still of heart**:
    - your emotions are always in complete control, and you can extend that control and calmness to others. you can cast calm emotions a number of times equal to your proficiency modifier. You're immune to being frightened or charmed.
- **Unarmed Brawling**:
    - Your Unarmed Attacks deal a D6 + MIG bludgeoning damage.
-

Level 2

- **Adept Dexterity**:
  - As a quick action you can dash, disengage, hide, or make a Nimbleness check
- **Beast Companion**:
  - You choose a beast companion from the beast companion chart.
    - Your companion has HP equal to (half your max hp) + your level.
    - Your beast shares your saving throw bonuses, unless its original are higher.
    - Your companion takes its turn before or after yours, you can decide each round of combat.
    - If your beast dies you must spend 8 hours looking for a new beast to tame.
    - You may use an action to command your Beast companion.

Beast Companion Chart

Air Beast Companion

- Small Beast
- Armor Class 13
- Hit Points: Half your max + your level
- Speed 10 ft. walk, 40 ft. fly
- Senses: Darkvision 60 Ft.
- Languages. Any you know, cannot speak
- MIG 10 (+0) GRA 16 (+3)
- VIG 12 (+1) TAC 8 (-1)
- WHI 14 (+2) CHA 12 (+1)
- Abilities:
  - **Flyby**: does not provoke attacks of opportunity when leaving a creature's reach.
- Actions:
  - **Gouge**: 3 + Prof. hit, 1D4 + 3 slashing damage, range 5ft.
  - **Screech**: each creature within a 10 Foot cone must succeed a VIG saving throw vs your spell save DC, on a failure they take 1D4 + 2 psychic damage and are dazed until the end of their next turn.

Earth Beast Companion

- Small Beast
- Armor Class 15 (natural armor)
- Hit Points: Half your max + your level
- Speed 25 ft. walk, 20 ft. burrow
- Senses: Tremorsense 20 Ft.
- Languages. Any you know, cannot speak
- MIG 12 (+1) GRA 14 (+2)
- VIG 16 (+3) TAC 8 (-1)
- WHI 12 (+1) CHA 10 (0)
- Abilities:
  - Protective Nature: As an Interrupt when your partner is targeted for an attack you can grant some protection, raising their AC by 2. They must be within 10 feet to use this ability.
- Actions:
  - **Claw**: 2 + Prof. hit, 1D6 + 2 slashing damage, range 5ft.
  - **Mud Ball**: 2 + Prof. hit, 1D4 + 2 bludgeoning damage, earth affinity, range 30 ft. The target must succeed a VIG saving

throw vs your spell save DC, on a failure they are blinded until the end of their next turn.

Land Beast Companion

- Medium Beast
- Armor Class 12
- Hit Points: Half your max + your level
- Speed 40 ft. walking, 30 ft. climbing
- Languages. Any you know, cannot speak
- MIG 16 (+3) GRA 14 (+2)
- VIG 12 (+1) TAC 8 (-1)
- WHI 12 (+1) CHA 10 (0)
- Abilities:
    - **Pouncing Strike**: When the land beast companion moves 15 feet before attacking a creature they gain a +2 to the attack roll and deal an extra D8 of damage.
- Actions:
    - **Slash**: 3 + Prof. hit, 1D8 + 3 slashing damage, range 5 ft. on a hit you can have the target make a MIG saving throw vs your save DC, on a failure the target becomes marked by you and your land beast companion.

Water Beast Companion

- Medium Beast
- Armor Class 14 (natural armor)
- Hit Points: Half your max + your level
- Speed 10 ft. walk, 40 ft. swim
- Languages. Any you know, cannot speak
- MIG 16 (+3) GRA 12 (+1)
- VIG 12 (+1) TAC 8 (-1)
- WHI 14 (+2) CHA 10 (0)
- Abilities:
    - **Amphibious**: can breathe both air and water
- Actions:
    - **Slam**: 3 + Prof. hit, 1D8 + 3 bludgeoning damage, range 5ft. The creature must succeed a MIG saving throw Vs your spell save DC or be knocked prone.
    - **Water Shot**: 2 + Prof. hit, 1D6 + 2 bludgeoning damage, water affinity, range 30 ft.

- **Backstab**:
    - Once per turn, When you land an attack while Hidden, you can make an additional attack with a light weapon as an immediate follow up.
- **Beast-bonded**:
    - Double your Proficiency for your companions attack rolls
- **Charming Attack**:
    - Once per turn you can expend a charm die and add it to an attack or damage roll.
- **Chow Down**:
    - Constantly eating your body has learned to turn the food you eat into direct energy when in a pinch.
    - During a short rest you can consume a ration to gain temporary hit points equal to (roll hit die).

    - As a quick action you can consume a ration to restore 1D6 HP and raise your AC by 1 for 1D4 rounds. You can use this once per long rest.
- **Critical Recovery**:
    - Every time you roll a natural 20 on a Saving Throw, increment your Maneuver or Spell Die.
- **Frictionless**:
    - You can touch a creature, object, or surface (15 foot square) and turn its friction to almost 0.
    - Creature:
        - To use this on an unwilling creature you must make an unarmed touch attack. Using this ability on a creature lasts up to 1 minute.
        - While under the effect they gain the following:
        - +3 to AC
        - Speed is 1/4 original (unless they come up with an alternative way to move)
        - Cannot be grappled or restrained
        - All GRA saving throws auto fail
    - Object:
        - To use it on an object that is being worn or carried you must make an unarmed touch attack.
        - The object can no longer be picked up or carried unless you succeed on a DC 20 quick fingers check.
        - Any attack against the object, except for a CRIT, is an auto miss.
        - This ability lasts up to 10 minutes.
    - Surface:
        - The area of a 15 foot radius becomes frictionless.
        - Any creature moving through that area must make a DC 20 Nimbleness check or fall prone. A creature cannot stand up from prone while within the radius.
        - The area counts as difficult terrain for any creature that begins its turn with the area.
        - This ability lasts up to one hour.
- **Get 'Em**:
    - As a Quick Action or Movement you can command a beast companion, summon, or other like creature.
- **Improvised Attacks:**
    - You gain Proficiency with improvised weapons. Each size deals a different amount of damage and requires a certain MIG score.
    - Small: D6 + MIG.
        - MIG minimum of -2
    - Medium: D8 + MIG
        - MIG minimum of 1
    - Large: D10 + MIG
        - MIG minimum of 4

- **In tune with nature**:
    - Gain proficiency in nature. You also have advantage on checks dealing with plants or animals.
- **Master Of None**:
    - You can add half your level, rounded down, to all skills you are not already proficient in.
- **Meditative Respite**:
    - You no longer need to sleep. You can now meditate during a long rest, in doing so you only need to meditate for 4 hours to gain the benefits of a long rest.
- **Shield Adept**:
    - you gain proficiency in shields
    - You gain an additional +1 AC from shields
-

<u>Level 3</u>

- **Big Game**:
    - Once per turn when you hit a creature that is at least one size category larger than you, you can give yourself advantage on the next attack roll you make. You can use this a number of times equal to your Whit modifier per long rest.
- **Breath of Dawn**:
    - Breath weapon once per short rest. 15 foot cone. 2D8 fire damage. GRA save or full damage and make a VIG save or 1st level burn.
    - Can be used to grant temporary hp to a number of creatures equal to your WHI. 2D4 temporary hp.
    - Can also be used on an ally. Restore 1D8 hp to one creature within 15 feet.
- **Cursing Attack**:
    - Once per encounter you can use your quick action to Curse an enemy within 30 feet. While Cursed you gain a bonus to damage equal to your **CHA** modifier against the target.
- **Dead-Eye**:
    - You can double your proficiency to your attack rolls made against creatures within 30 feet.
- **Dual-Shot**:
    - When you have advantage on an attack you can choose to instead forgo the advantage and take two separate attacks on the same target. You may only use this once per turn.
- **Giant's Blood**:
    - Increase your size category by 1 to a maximum of Huge.
    - You may roll your Hit Die twice, adding your VIG only once, and increase your maximum HP by that amount.
- **Give Me That!**:
    - Once per Short Rest you can attempt to teleport an object within 30 feet to yourself, the size of the object must be at least one size category smaller than you are. If the object is being worn or carried you must make a contested Arcana

or Quick Fingers vs Athletics or Persistence check unless the creature is willing to give the object up.

- **Hunting Mark**:
  - When you hit a creature with an attack you can choose to mark that creature.
    - While marked this way the creature has disadvantage on stealth checks from you and you know their general location as long as they are within 1 mile.
    - You can also deal an extra 1D6 psychic damage to that creature once per turn as part of an attack.
- **Insightful Gaze**:
  - Once per short rest you can make an opposed intuition vs face check against a creature, on a success learn two of the following:
    - Max Hp
    - Class and Level
    - Armor Class
    - Any Stat Score
    - Alignment
    - One Ability
- **Liars Sight**:
  - When a creature answers a question with “yes” or “no” you can tell if they are lying or not.
- **Strategic Strike**:
  - As a quick action on your turn you can choose an enemy within 30 feet and quickly pick up on their fighting patterns. You have advantage on your next attack made against them. You can use this a number of times equal to your TAC modifier per long rest.
- **Speedy Stealthiness**:
  - You (not the party) can remain hidden even when traveling at a normal pace.
  - You may also move half your movement each time you hide.
- **Taunting Curse**:
  - Once per encounter you can use your quick action to Curse an enemy within 30 feet. While Cursed they have a penalty to attack rolls against any target other than you, equal to your CHA modifier.

<u>Level 4</u>

- **Preserve**:
  - Once per day, when your spell or martial die would decrement to a size smaller than your level, you may keep it instead of decrementing it.
    - (ie a level 4 Berserker’s Martial Die would decrement from a D4 to nothing, they may choose to keep it at a D4.)
- **Phoenix**:
  - Once per long rest after you have fallen unconscious you can, on your turn, choose to regain 4D8 HP forcing all creatures within 10 feet to make a GRA save or they take an equal amount of fire damage.

- **Shifting Retreat**:
    - After an enemy hits you, you can shift as an Interrupt and then use your full Movement.
- **System Shock**:
    - After dealing physical damage to a creature that exceeds half their MAX HP, they must make a VIG saving throw or instantly be knocked unconscious.

Level 5

- **Doppelgänger:**
    - You can freely change the way you physically look, able to shift between different ancestries and even genders.
    - Your mass remains the same and cannot be shrunk or expanded.
    - You do not gain any abilities of the creature you copy.
- **No need to rest**:
    - When you would take a long rest you can ignore that and instead take an hour to gain the following:
        - Regain all HP and restore your Maneuver or Spell Die
        - Gain two levels of exhaustion. These levels can only be removed by taking a Long Rest.
- **Seeing Beyond**:
    - Once a day you can gain truesight to see beyond the planes for one minute.

Level 6

-

Level 7

- **Double Trouble:**
    - You create a Double that retains your stats and gear, it's HP is half of your Max HP.
    - The double cannot use Maneuvers or Spells.
    - The Double can perform all the same Abilities as yourself, however if you have already expended an Ability the Double will have as well. The Double does not regain the use of Abilities after a Short or Long rest.
    - When the Double is released, destroyed, or killed you gain the experience that they had during the duration. You also gain levels of exhaustion equal to the number of days of the duration, to a maximum of 9.
    - You can release the Double so long as you are on the same plane of existence.
- **One with the World**:
    - As an Action you can cast any teleportation spell, the spell's effect only works for you. No Verbal, Somatic, or Material components needed.
-

Level 8

●

Level 9

●

Level 10

- **Inspiring Charisma**:
    - Your tales of legends instill hope and awe into the hearts around you. Whenever you give someone a charm die they can roll the die twice and take either result.
- **Lucky Die**:
    - As a quick action, when you hit with a sneak attack, but before you roll the damage, you can decide to only roll one Shade Die. Multiply the result by your total Shade Dice
- **Re-Roll!**:
    - You can choose to re-roll a number of Shade dice equal to your proficiency modifier when dealing damage, however you must keep the new outcome.
- **Ring Leader**:
    - When you roll initiative you can choose a number of allies up to your WHI mod and expend a charm die to add the amount rolled to their initiative.
- **Hairy**: You gain resistance to Cold Damage and have Advantage on Saving Throws from Exhaustion within Cold Climates.
- **Quick Feet**: Once per short rest, you may gain Advantage on all Attacks made on creatures that go after you in the Initiative Order.
- **Bark Sharper than Bite**: Once per short rest, you can double your Face Skill modifier when attempting to intimidate.
- **Guard Guard Guard**: Once per short rest, as an Interrupt, you can increase the AC of a creature within 5 feet by your Level.
- **Aggressive**: As a Quick Action you can use your Movement to Charge towards an Enemy.
- Tactical Fighter: You can use TAC in place of GRA for Attack and Damage Rolls.
- **Screech**: Once per short rest, as a Quick Action, you can scream causing all creatures within 15 feet to be dazed until the end of your next turn.
- **Painted Face**: Once per short rest, you can make a Face check vs an enemies Intuition check, on a success they become frightened of you.
- **Galloping Charge**: When you take the Charge Action, you can double your Movement speed.
- **Bulging**: Once per Long Rest, you can Roar forcing all enemies within 30 feet to gain the Frightened condition until the beginning of your next turn.
- **Quick Swim**: You gain a swimming speed equal to your walking speed.
- **Night Vision**: Gain Darkvision as one of your senses.

- **Camoskulk**: Once per short rest, as a quick action, you can turn invisible until the beginning of your next turn.
- **Murky Skin**: Once per short rest, as a quick action, you can increase your AC by your VIG modifier until the end of your next turn.
- **Amphibious**: You can breathe while underwater
- **Tiny Sized**: Gain +2 to AC against larger sized creatures.
- **Mouse's Pride**: Once per short rest you can end one mental condition affecting you.
- **Rat's Cunning**: One per long rest you can polymorph into a rat for 1 hour.
- **Quickest Fingers in the West**: Gain proficiency in Finesse.
- **Arcanum Iris:** You are able to see the faint glow of magic, an almost oily iridescent color. You know the school of magic of any magical effect you can see.
- **Frostsight**: Able to see cold objects and creatures but cannot sense warm objects or creatures.
- **Dark vision**: You have darkvision up to 60 ft. In addition to grays you also see blues, purples, and some greens.
- **Torchsight**: Able to sense warm objects and creatures, but can't sense lack of heat in objects or creatures.
- **Depthsense**: While inside a cavern or dungeon you can tell your relative position to sea level.
- **Moonsight**: When the moon is full and unobstructed you can see as though it were daylight.
- **Dragon Blood:** Choose the color dragonborn you are. You gain resistance to whatever element corresponds with your color
- **Dark vision**: You have darkvision up to a range of 80 feet.
- **Wave Waker**: Once per short rest you can regain 1D6 + WHI modifier HP.
- **Arcane Adept**: Once per long rest you can cast faerie fire without expending a spell slot. CHA is your spellcasting ability when you cast this spell in this way.
- **Cloud Jump**: Once per short rest you can choose to gain a flying speed for one round equal to ((1D6 + GRA modifier) x 5 feet). If you are in the air at the end of your turn you start falling.
- **Heat Wave**: Once per short rest you can incinerate the surroundings causing all creatures within 10 feet to make a GRA saving throw, on a failure they take 1D6 + VIG modifier fire damage, on a success they take half damage. All burnable objects that are not being worn or carried catch fire.
- **Earth Smash**: Once per short rest when you hit an attack you can deal an additional 1D6 + MIG force damage. When you do this you can also choose to make the 10 foot radius around the target into difficult terrain.
- **Savage Hit**: When you deal a critical hit add an extra damage die.
- **Exoskeleton**: Your unarmed strikes deal 1D6 + MIG
- **Dense Build**: Your carrying capacity is doubled
- **Shifty Strike**: Once per short rest you can shift as a free action and the next attack you make is at advantage.
- **Aware**: You cannot be surprised.
- **Methodical Mandibles**: You can add your TAC modifier to any GRA check you make.

- **Charismatic Form**: Once per short rest you can add a D6 to one CHA check you make.
- **Anti-charming**: You have advantage on saving throws against charms or other mind altering effects.
- **Leveled Strike**: You can use your quick action to add your level to an attack roll you make.
- **Fury of the Ants**: When you score a critical hit, multiply your damage modifier by the weapons crit multiplier and add it to the roll.
- **Honey Healing**: When hit points are restored to you or by you, gain or give an additional amount of temporary HP equal to your WHI modifier.
- **Acidic Goop**: Once per encounter you may add 1D6 Blood damage to one attack you make.
- **Wanderer**: Add your Tact to your survival skill.
- **Soul Step**: Once per long rest as a quick action you can teleport up to 30 ft. you must see where you are teleporting to.
- **Deductive Dexterity**: Add your Tact to your quick fingers skill.
- **Idle Hands**: Once per long rest you can attempt to teleport an object within 30 feet to yourself, the size of the object must be at least one size category smaller than you are. If the object is being worn or carried you must make a contested Arcana or Quick Fingers vs Athletics or Persistence check unless the creature is willing to give the object up.
- **Dark vision**: You have darkvision up to 120 ft
- **Thoughtful Gaze**: Add your Tact to your perception skill.
- **Charging Quick Strike**: When you Charge a creature you make one attack as a quick action on the same creature.
- **Quick Charge**: You can Charge as a quick action.
- **Demonic Might**: Once per encounter you can add 1D6 to an attack roll and damage roll.
- **Undeath**: Damage Resistance to necrotic damage. Damage Vulnerability to Radiant damage
- **Death Calls:** You cannot be brought back from death and the DC for death saving throws becomes 12.
- **Unchained Soul:** Once per long rest you can leave your body as a spirit. While in this state you cannot affect the corporeal world and it cannot interact with you. You can move through walls at half speed. This lasts for 10 minutes. During which your body is inanimate. After which you must find your body before [They] find you. For every round you spend outside of your body after the 10 minutes is up you take 2D6 force damage.

Game Master:

- Creating a Campaign
- Making a Quest/Adventure
- Building an Encounter
- Villains and Bad Guys
- Finding your Style
- Creating your own setting

Progressing the Game State:

- Significant Actions
- Milestone Actions

Starting A Game:

Where to Meet:
Most games begin with starting in a tavern, a sort of neutral ground for the characters to meet. This is a solid start to any game, but if you like to leave things to chance, below are a few listed options to give you some more ideas for your next game.

1. In a tavern
2. Greeting on the streets
3. Fight on the streets
4. Outside the dungeon
5. Within the dungeon
6. Already traveling together

Setting of Ityrnus:

The setting of the campaign can help set the tone for the adventures and overall vibe that the characters will be interacting with.
Ityrnus is the Realm after the Realm, that is to say it is what is left after the last Realm had shattered. The subsequent worlds that developed from this are each unique and varied from each other, though some similarities may occur. A campaign may see many of these worlds, traveling through Gates or using magic to transport your party to another world. It is also possible that a campaign will only ever see one world, confined to it through narrative or circumstance.
This is to say, if you want to use your own setting there will be no issue in substituting a few names for Gods, locations, and other important factors.
The following is an outline for the Realm of Ityrnus and its many worlds.

- Provide details for the setting of Berugar / Ityrnus
    - Gods
    - Locations

Berugar:

Formed at the heart of the shattering, protected by the only Pact all Higher Beings deemed to sign. The Demonlords tore their flesh to use as a Foundation, the Ancient Gods used their blood as the Ink, the Archdevils used their Souls to Bind the contract, and the Lords used their crowns to embed their Essence. With this the Abdin Pact was formed, an Eternal decree that would prevent Berugar from being directly altered by any one of these forces.

Change Logs:

Update 3.1(—/—/—):

- **Conditions:**
    - Poisoned now has four levels of severity, each getting nastier.

Update 3.0 (12/08/2024): Revival

- **Creating a character:**
    - Each character gets three skills and two saving throws to become proficient at level 1.
- **Leveling Up**
    - made table for slow, medium, and fast leveling.
- **Class**
    - <u>Berserker:</u>
        - You have natural AC when unarmored and gain Non-magical Damage resistance equal to level x 2.
        - Skill Challenge allows for you to gain more HP
    - <u>Cultivator</u>:
        - Unarmed attacks now can use MIG or GRA. Make a number of Unarmed attacks equal to your Prof. Mod.
        - Gain unarmored AC
        - Class die passive improves to hit by number of momentum dice.
        - Skill challenge allows you to increase your Unarmed Attack dice as well as gaining a skill point in a MIG or GRA skill.
    - <u>Guardian</u>:
        - Those around you gain benefits from your shields AC
        - Skill challenge allows you to increase the range of your protective aura
    - <u>Hound</u>:
        - Create lock picks quicker, pick locks faster, and increase crit range on foes you are hidden from.
        - Skill challenge halves the amount of time of lock pick crafting and picking locks. Also increases your hidden crit range by 1.
    - <u>Jinx</u>:

        - Hexes stem from your pacted Patron and may be changed to better fit your level.
        - Skill challenge allows you to form a new bond with a new patron, or to further your connection to your current patron, either way you gain a new Hex or you improve an old one.
    - Mage:
        - Bestows an additional magical discipline.
        - Skill challenge allows to gain a new discipline and spell.
    - Medium:
        - Have a chance to cause a wild magic surge, increment your spell die when you cause one.
        - skill challenge increases the chance of a Wild Magic Surge.
    - Shaman:
        - Gain an additional affinity as well as a spell that uses that affinity.
        - Skill challenge allows you to gain another affinity and spell of that affinity or one you had already.
    - Tradesman:
        - Allows you to create crafts equal to your level within 1 hour of work. When you help an ally with a skill check you may roll with advantage.
        - Skill challenge allows you to create an additional item in that hour as well as grants proficiency with a new tool set.
    - Traveler:
        - Learn information about a target, gain extra movement, and learn a new language or read lips.
        - Skill challenge allows you to learn a new language, choose a new terrain, and gain advantage in learning about creatures within that terrain.
    - Warrior:
        - Half the time it takes to train or master a weapon. You may mark a target as a part of an attack. You may take an additional attack or use an additional maneuver against a marked target.
        - Skill challenge allows you to master a weapon you have proficiency in and allows you to mark an additional target.
    - Worshipper:
        - Divine aura allows for additional healing within its range.
        - Skill challenge increases the range of your divine aura and the amount of healing within it.
    - Hit Die now scale from D6-D10
        - D6: Mage, Medium, Jinx, Hound,
        - D8: Shaman, Traveler, Tradesman, Worshiper
        - D10: Berserker, Cultivator, Guardian, Warrior
    - No longer decides which saving throws and skills you are proficient in, lists suggestions instead.
    - Subclasses no longer exist.
- **Magic**

    - <u>Alternative Casting:</u>
        - Got rid of Upcasting to change into Altering Spellforms.
        - Alter spell forms to upgrade spells at the cost of increasing their tier.
    - <u>Magical Foundation</u>:
        - different foundations give the caster different abilities through magic.
    - <u>Magical Affinity</u>:
        - Allows spells to be changed and act outside their schools of magic.
    - <u>Spell and Maneuver Die:</u>
        - Die system instead of points?
        - Restore on rest?
        - Abilities to restore them
        - If you roll the spell/martial tier or lower then the die is decremented.
    - <u>Spells and Maneuvers</u>:
        - Classes now have an amount of points that they can use to cast spells or use martial skills.
    - <u>Spells</u>:
        - The Stop Spell now deals a D8 when you have the same amount of hit dice as the target and a D6 when the target has less.
- **Lineage**:
    - Elves have more thematic abilities that relate more to their ancestry.
    - shark folk impulsive bit deals 1D8 now
    - Exquians now exist
    - Merged shark and whale lineages into the Beast folk section and changes the Sea folk into Exquians.
    - every main beast lineage has been added into the game. most coming with three or more bloodlines.
- **Equipment**:
    - Staffs: Grant a +1 to spell things but you lose half your movement
    - inventory system:
        - slots that represent how many items your character can carry
        - more slots can be added with greater Might score, or an item like a backpack.
        - The Main slots represent items within reach of your character at all times. 4 slots.
        - Secondary slots are for items that your character might have to do some digging for. the more Grace you have the more likely you are to pull the item you want. 6 slots.
        - Stored Slots are items that require more than a free action to interact with. They are often deep in a bag or strapped down to secure it in place. base 5 slots, +2 slots per +1 MIG.
        - exhaustion and other status effects can cause inventory slots to become unusable.
    - **Weapons**

        - Changes mastery in weapons so they are no longer weapon specific but instead have certain requirements the weapon must meet.
    - **Armor**:
        - Removed Armor Points
- **Combat**:
    - What's around me:
        - rolling for objects that may be around and useable/important in combat
    - Charge:
        - You must move 15 feet to gain this benefit
    - Critical Hits:
        - When you exceed your target's AC by 10 or more it counts as a critical hit.
    - Initiative new optional rules:
        - 20s matter: roll a natural 20 on initiative and you gain two actions your first round.
        - Grouped initiative: players all roll one die for initiative or together and take average.
- **Resting:**
    - Short rests now automatically restore up to half your max hp. you may spend hit dice to gain back more HP.
        - you may spend a hit die during a short rest to increment your martial or spell die.
    - Long rests in the wild now increment your martial or spell die a number of times equal to your proficiency modifier.
- **Fate Dice**:
    - No longer restores Main class ability uses.
    - Can now immediately stabilize a dying creature
- **Dying**:
    - Massive damage may cause a character to be instantly killed or given some levels of exhaustion
    - Bargaining with death allows a player to give up some abilities or boons to save their life.
    - A Dying creature can act but takes levels of exhaustion. At 10 levels they fall unconscious.
    - They can only be stabilized by healing or by a character making a skill check to give them HP equal to the character's proficiency modifier (can only be used on dying creatures.)
        - A Dying creature suffers the levels of exhaustion at the end of each act they take on their turn, instead of at the end of their turn as a whole.
- **Exploration:**
    - Encounters now only appear on a 1 when rolling the encounter die
    - Roll a D6 to determine which type of encounter they come across.
    - Optional rule: Combat or Roleplay
        - least players decide course of actions over the journey.

- **Abilities:**
    - Athletic burst now 10 + skill bonus instead of doubling your skill bonus.
- Hiding:
    - DC set by skill used in the situation
    - Searching for a creature succeeds when the searcher beats or meets the hiding creatures Save DC

Update 2.5 (05/06/2024):

Spells:

- Call of the living:
    - let's a player use their turn without gaining exhaustion
- Moving illusion:
    - able to make a minor illusion move within the area of the spell
- Magnetic pulse
    - Able to have target attract or repulse metallic objects

Abilities:

- Shove Attack—> Rebounding Blow

Attunement:

- Can only attune to three magical creations.
- Different creations give different benefits.
- Consequences for breaking attunement.
- Players have a limit on how powerful of an item they can attune to.

Fate Die:

- Chaos now gets auto-crit on next attack.

Wards:

- Changed how many Ward dice you get and how learning/breaking wards work. Now it's not impossible lol.
- Provided rules on how a non ward craft user can attempt to break a ward.
    - Powerful enough wards can only be taken down by another ward crafter
- Both Jinx, Mages, and Shadows (Hounds??) get Ward Dice as their Main class ability gets stronger.
    - Mages and Shadows get half the amount of Arcana and Shade dice they have, and Jinx has an amount equal to their contracts.

Formations:

- Trap: STR check changed to save.

Dying:

- Made rules more clear and simple.
- No more insta-dying from attacks

Shadow—> Hound???

- Execution dice —> Shade Dice

Berserker:

- Spend a fury point when damage would reduce you to 0 HP, Persistence check DC equal to 10, Increasing by 5 each additional time it's used before a long rest.

Conditions:

- Addicted condition added
    - Creatures suffering addictions must make WIS saving throws to resist the urge.
- Drowning is now a condition
    - Drown for one turn before you fall unconscious.
    - Creature can breath number of minutes based on CON mod

Item Crafting:

- Reduced time it takes to make an item.

Skill checks:

- Taking 10
- Suffering 20
- Helping: Doubled the numbers so it scales from 2-10 instead of 1-5
